# “TABLOIDS”

## FOR LARYNGOLOGICAL USE.

A “**TABLOID**,” when intended for the treatment of the throat and voice, is compressed hard so as to dissolve slowly and produce a prolonged action on the mucous membrane. There are no sugary or gummy substances present to interfere with the direct application of the medicament to the affected surfaces. Placed upon the tongue, a “**Tabloid**” is immediately acted upon by the saliva, forming a highly-concentrated solution, which remains in continuous contact with the affected mucous membrane until the whole of the “**Tabloid**” is dissolved.

### RED GUM “TABLOIDS.”

**Red Gum**, an exudation from the Australian *Eucalyptus rostrata*, is a mild styptic and antiseptic, and an excellent local and general astringent. When a **Red Gum “Tabloid”** is allowed to dissolve in the mouth, the continuous action of the drug on the throat is fully secured. Great care has been exercised so to adjust the relative portions of the ingredients that the full therapeutic effect of the drug may be obtained without offending the palate or affecting the appetite.

Supplied in Boxes of 30 and Bottles of 100 “**Tabloids**” at 5d. and 1s. each.

### TAR “TABLOIDS.”

In a paper, entitled “A Mode of Administering Tar,” which appeared in the *Medical Press and Circular*, a distinguished physician reports as follows:—

“I have recently had my attention called to ‘**Tabloids**’ of **Tar**, containing one grain; and these, I think, constitute by far the best mode of administering the drug. They contain the whole of the constituents of tar and are palatable and speedily disintegrate. The new mode of administration is three or four every four hours; but a better plan is to suck one frequently—in fact, every time the cough is troublesome.”

These “**Tabloids**” are supplied in Bottles of 50 and 100 at 5d. and 9d. each.

### VOICE “TABLOIDS.”

Composed of Chlorate of Potash, Borax, and Cocaine.

These “**Tabloids**” impart a clear and silvery tone to the voice. As they are easily retained in the mouth while singing or speaking, and because of the instant relief they give from irritation, they are now used by leading singers and public speakers throughout the world. A single “**Tabloid**” may be slowly dissolved in the mouth to remove huskiness or hoarseness.

Supplied in Boxes or Bottles of 30 and 80 at 8d. and 1s. 3d. each.
