

THE MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM

THE ASSOCIATION was founded in 1884 to promote accurate researches leading to the advancement of zoological and botanical science and to an increase in our knowledge of the food, life, conditions and habits of British fishes. The work of the Association is controlled by a Council elected annually by its subscribing members.

Professor T. H. Huxley took the chair at the initial meeting held in the rooms of the Royal Society and was elected the first President. Among those present were Sir John Lubbock (afterwards Lord Avebury), Sir Joseph Hooker, Professor H. N. Moseley, Mr G. J. Romanes, and Sir E. Ray Lankester who, after Professor Huxley, was for many years president of the Association. It was decided to build a laboratory at Plymouth, where a rich and varied fauna is found.

The Plymouth Laboratory was opened in June 1888, and, since that date, considerable additions have been made to the buildings, including a library, lecture-hall, and extensive laboratory accommodation with up-to-date equipment. Additional sea-water reservoirs have also been built, and an aquarium, modernized in 1959, opened to the public.

Since its foundation the Association has been supported by subscriptions and donations from private members, universities, learned societies, the Fishmongers' Company and other public bodies. For some time past, however, the main financial support for the work of the Plymouth Laboratory has come from Government funds, and since 1965 the Laboratory has been grant-aided through the Natural Environment Research Council.

The Marine Biological Association, under the direction of its Council, undertakes research in all branches of marine science and the main results are published in this Journal. Accounts of the laboratory and aquarium are to be found in Vol. 27 (p. 761), Vol. 39 (p. 391) and Vol. 43 (p. 281), and summaries of the activities and research of the Association are given annually in the Report of the Council in the November issue of the Journal.

The laboratory is open throughout the year and its work is carried out by a fully qualified research staff under the supervision of the Director. The names of the members of the staff will be found on the inner page of the front cover. Accommodation is available for British and foreign scientific workers who wish to carry out independent research in all branches of marine science. Arrangements are made for courses for advanced students, and marine animals and plants are supplied to educational institutions.

Work at sea is undertaken by three research vessels and by a motor boat, and these also collect the specimens required in the laboratory.

TERMS OF MEMBERSHIP

	<i>£</i>	<i>s.</i>	<i>d.</i>
Annual Members, receiving the Journal per annum	3	0	0
Annual Members, without the Journal per annum	1	1	0
Junior Members, receiving the Journal per annum	1	1	0
Life Members. Composition fee	45	0	0
Founders	100	0	0
Governors	500	0	0

Members of the Association have the following rights and privileges: they elect annually the Officers and Council; they are entitled to receive the Journal of the Association at a much reduced rate; they are admitted to view the laboratory at Plymouth, and may introduce friends with them; they have the first claim to rent a place in the laboratory for research, with use of tanks, boats, etc; they have the privilege of occupying a table for one week in each year free of charge; and they have access to the books in the library at Plymouth.

The Commissioners of Inland Revenue have approved the Association for the purposes of Section 16, Finance Act, 1958, and that the whole of the annual subscription paid by a member who qualifies for relief under the section will be allowable as a deduction from his emoluments assessable to income tax under Schedule E.

All correspondence should be addressed to the Director, The Laboratory, Citadel Hill, Plymouth.

CONTENTS

	PAGE
I. MANTON and G. F. LEEDALE. Observations on the microanatomy of <i>Coccolithus pelagicus</i> and <i>Cricosphaera carterae</i> , with special reference to the origin and nature of coccoliths and scales	1
RAY GIBSON and J. B. JENNINGS. Observations on the diet, feeding mechanisms, digestion and food reserves of the entocommensal rhynchocoelan <i>Malacobdella grossa</i>	17
B. L. ROBERTS. Spontaneous rhythms in the motoneurons of spinal dogfish (<i>Scyliorhinus canicula</i>)	33
B. L. ROBERTS. The spinal nerves of the dogfish (<i>Scyliorhinus</i>)	51
M. R. REEVE. Growth, metamorphosis and energy conversion in the larvae of the prawn, <i>Palaemon serratus</i>	77
L. CHUECAS and J. P. RILEY. Component fatty acids of the total lipids of some marine phytoplankton	97
L. CHUECAS and J. P. RILEY. The component combined amino acids of some marine diatoms	117
J. B. GILPIN-BROWN. Host-adoption in the commensal polychaete <i>Nereis fucata</i>	121
G. T. BOALCH and J. P. MOMMAERTS. A new punctate species of <i>Halosphaera</i>	129
P. E. KING, JULIE H. BAILEY and P. C. BABBAGE. Vitellogenesis and formation of the egg chain in <i>Spirorbis borealis</i> [Serpulidae]	141
FU-SHIANG CHIA and J. B. BUCHANAN. Larval development of <i>Cucumaria elongata</i> [Echinodermata: Holothuroidea]	151
C. S. WILLIAMS. The effect of <i>Mytilicola intestinalis</i> on the biochemical composition of mussels	161
D. M. JOHN. An ecological study on <i>Laminaria ochroleuca</i>	175
R. G. HALLIDAY. Distribution and regional variation of <i>Argentina sphyraena</i> [Pisces: Isospondyli]	189
P. R. DANDO. Lactate metabolism in fish	209
G. W. BRYAN. The absorption of zinc and other metals by the brown seaweed <i>Laminaria digitata</i>	225
P. B. TETT. The effects of temperature upon the flash-stimulated luminescence of the euphausiid <i>Thysanoessa raschi</i>	245
ABSTRACTS OF MEMOIRS	259

The subscription price of the Journal to non-members of the Association is £14 net a volume of four parts, post free, or \$47.00 in U.S.A., payable in advance. Subscriptions may be sent to any bookseller or to the Cambridge University Press, and in U.S.A. to the Cambridge University Press American Branch.
