

ENTERPRISE AND NATIONAL DEVELOPMENT

ESSAYS IN CANADIAN BUSINESS AND ECONOMIC HISTORY
Edited by GLENN PORTER AND ROBERT CUFF

These essays deal with a wide range of important topics in the interaction of business, government, and society in Canada. Their value is two-fold. As careful explorations of Canadian history, they provide important insights into the Canadian past. But the issues they treat are still with us, and these essays make important contributions to the continuing debate over such enduring issues as the mainsprings of national identity, the impact of foreign influence on the economy, the search for economic growth, and the optimum relationship between federal and provincial governments in shaping national development.

These essays appeared originally in *Business History Review*. Contributors: Glenn Porter, Christopher Armstrong, H. V. Nelles, Michael Bliss, T. W. Acheson, Stephen Scheinberg, Patricia E. Roy, Alan Wilson. 138 pp. \$2.50/\$6.95.

ANNUAL SERIES

Review of Volume 1 . . . *"This experimental new series, devoted to 'the publication of research papers that are longer than a conventional, journal-length article yet shorter than a monograph," is a most welcome addition to the publishing outlets available to economic historians. The nine substantial papers included in the first volume augur well for the success of the venture . . . One of the most remarkable features of this volume — and propitious for the future of the series — is that although some of the contributions fall short of the quality one expects in a major scholarly journal, so many meet or exceed it."*

THE BUSINESS HISTORY REVIEW

¶ The Newcomen Society in North America, in cooperation with the *Business History Review*, announces a prize of \$1,000 and scroll to be awarded in 1979 for the best book on the history of business published in the United States during the years 1976-1978.

¶ For the purposes of this award, "the history of business" will be interpreted in its broadest sense, including not only the history of firms or industries, but books tracing interactions of businessmen, analyses of business philosophy or behavior, and studies of the adjustment of businesses and businessmen to their economic, political, and social environments.

¶ Criteria for selection will include contribution to knowledge, depth of analysis, soundness of reasoning, clarity of style and organization, and general readability and format.

by Alan L. Olmstead ❧

This study offers a unique view of often-ignored business practices and philanthropic activities of an important set of entrepreneurs during the formative years of American capitalism. It provides new insight into the development of the antebellum capital market, and sheds light on how the institutional environment, particularly usury laws and lending restrictions on financial institutions, affected the accumulation and allocation of financial resources.

Empire building in the Pacific Northwest

James J. Hill was the moving force behind the Great Northern and Northern Pacific Railroads from 1878 to 1916, and the man almost singlehandedly responsible for the opening of the Pacific Northwest. He is best known for his head-to-head battle with Teddy Roosevelt, whose prosecution of the Northern Securities case was one of the most celebrated lawsuits in American legal history. This biography of the titanic Hill is "an important piece of scholarship and an exciting story." —*John A. Garraty, Columbia University*
