of the

AUSTRALIAN MATHEMATICAL SOCIETY

Volume 36 Number 1

August 1987

| | |
|--|-----|
| The power structure of finite p -groups Mingyao Xu | 1 |
| The persistence of universal formulae in free algebras Anthony M. Gaglione and Dennis Spellman | 11 |
| Stability of a constant mean curvature surface in \mathbb{R}^3 Sung Eun Koh | 19 |
| Optimal results in local bifurcation theory J. Isquimas and J. Lopez-Gomez | 25 |
| On the total torsion of certain nonclosed sphere curves Stephen M. Zemyan | 39 |
| On circulant matrices for certain periodic spline and histospline projections François Dubeau and Jean Savoie | 49 |
| Non-symmetric translation invariant Dirichlet forms on hypergroups Walter R. Bloom and Herbert Heyer | 61 |
| Common fixed point theorems in complete metric and probabilistic metric spaces Mila Stojakovic | 73 |
| Asymptotic distribution of the number and size of parts in unequal partitions G. Szekeres | 89 |
| Translation complements of C -planes: (I) M. L. Narayana Rao, K. Kuppuswamy Rao and G. V. Subba Rao | 99 |
| A commutativity criterion for prespectral operators Werner Ricker | 113 |
| Semi-homomorphisms of rings S. A. Huq | 121 |
| On the logarithmic derivatives of subordinate functions M. M. Elhosh | 127 |
| Adjoint-triangle theorems for conservative functors G. B. Im and G. M. Kelly | 133 |
| On the ordered set of reflective subcategories G. M. Kelly | 137 |
| A note on groups with separable finitely generated subgroups R. G. Burns, A. Karrass and D. Solitar | 153 |
| Some aspects of relative injectivity S. Engelstock and R. Raphael | 161 |
| ABSTRACTS OF AUSTRALASIAN Ph.D. THESES | |
| On the dictionary between transformations, Krieger factors and ergodic flows Sing Yan Robert Wong | 171 |
| Dirichlet problem with L^p -boundary data Thomas Hoffmann-Walbeck | 173 |

INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field.

As even minor revisions are generally not permitted, authors should read carefully all the details listed below and on the inside back cover.

For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Nevertheless some meritorious papers will have to be rejected because speed of publication involves space limitations.

Authors should submit THREE clean, high quality copies to

The Editor, Bulletin of the Australian Mathematical Society,
Department of Mathematics, University of Queensland,
St. Lucia, Queensland, 4067, Australia

but should not send the original typescript of their papers, as material submitted to the BULLETIN will usually not be returned. Authors should note that each paper submitted must include an abstract and one or more classification numbers following the 1980 Mathematics Subject Classification. (1985 Revision).

Abstracts of PhD Theses

The BULLETIN endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.

© **Copyright Statement.** Where necessary, permission to photocopy for internal or personal use or the internal or personal use of specific clients is granted by the Treasurer, Australian Mathematical Publishing Association, Inc., for libraries and other uses registered with the Copyright Clearance Center (CCC), provided that the base fee of \$A2.00 per copy of article is paid directly to CCC, 21 Congress Street, Salem, MA 01970, U.S.A. Special requests should be addressed to the Treasurer, Australian Mathematical Publishing Association, Inc., c/- Department of Mathematics, University of Queensland, St. Lucia, Qld., 4067, Australia. Serial-fee code: 0004-9727/87 \$A2.00 + 0.00.

ACTA APPLICANDAE MATHEMATICAE

An International Survey Journal on Applying Mathematics
and Mathematical Applications

Managing Editor

MICHIEL HAZEWINDEL, The Mathematical Centre, Amsterdam, The Netherlands.

The journal is devoted to the art and techniques of applying mathematics and the development of new applicable mathematical theories. It contains papers on the different aspects of the relation between theory and application: descriptive papers on actual applications, papers on technique and method when applying existing mathematical tools (e.g. in working examples), and of special importance, papers on mathematics motivated by the prospect of potential application, and on those established parts of mathematics which seem to be on the threshold of application.

In particular, the editors hope to create a forum through which mathematicians and other scientists can be introduced to new techniques of applying mathematics and/or to new fields of application. This is achieved via the medium of longer survey, review and state-of-the-art papers which are written with a large and varied academic audience in mind. Mathematics is applicable to a truly imposing range of problems in a wide variety of fields, often in surprising ways, and this journal aims to contribute significantly to establishing and communicating this applicability.

Periodically special issues will be devoted to particular fields of application, often under the guidance of a guest editor.

Subscription Information

ISSN 0167-8019

1987, Volumes 8-10, (9 issues)

Institutional rate: Dfl. 570.00/US\$237.00 incl. postage/handling

Private rate: Dfl. 270.00/US\$108.00 incl. postage/handling

Private subscriptions should be sent direct to the publishers.
