

NOTES FOR AUTHORS

Papers submitted for publication in the *Bulletin of Entomological Research* should be sent, in duplicate, to the Director, Commonwealth Institute of Entomology, 56 Queen's Gate, London SW7 5JR. They must deal with original research concerning insects, mites or ticks of economic importance in the agricultural, medical or veterinary fields; they must be of more than purely local interest, and taxonomic papers will not be accepted unless the organisms dealt with are of definite importance in the field of applied entomology. Review articles may also be submitted, but will normally be by invitation. Papers must not have been published or accepted for publication elsewhere. They will normally be published in order of their receipt in definitive form.

For general guidance on presentation and style, including the preparation of illustrations, contributors are urged to consult *Writing Scientific Papers in English. An ELSE-Ciba Foundation Guide for Authors* (by Maeve O'Connor & E. Peter Woodford), 116 pp., Amsterdam, Associated Scientific Publishers, 1975, ISBN 90-219-4035-3.

Text

Papers should be typewritten (double spaced, with ample margins and on one side of the paper only) and a current number of the *Bulletin* should be consulted for details of style and lay-out. Titles should be as brief as is consistent with clarity. Abbreviations should conform to *British Standard 1991, Part 1, 1967*, and are alike in singular and plural; stops will be used only where ambiguity might occur, e.g. 'in.' not 'in' for inch, but 'in²' for square inch. Metric units are preferred; if non-metric units are used, metric equivalents should be given at least once in each article.

Tables

Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must on no account be of a size or form that will not conveniently fit into the page of the *Bulletin*.

Illustrations

Line drawings and graphs must be in jet-black indian ink, preferably on bristol board or tracing cloth. Graphs may be drawn on paper ruled in pale blue or light grey; paper having green, red, yellow or brown lines should not be used. Any stippling or hatching, as well as any numerals or lettering, on the text-figures must be completed, by the author, in a form suitable for reproduction; this work is *not* undertaken by the printer. Text-figures, when reproduced, cannot exceed 12.7 cm in width; if, therefore, the original drawings are larger, the lettering on them must be in proportion, so that it is still legible when reduced; special attention should be paid to the relative scales of lettering and line thicknesses in relation to the figure as a whole. Photographs for reproduction as figures are admissible when they are a real contribution to the text. Captions to figures should be typed on a separate sheet.

Abstract

Each paper must contain a carefully prepared and accurate informative abstract that shall be complete in itself and intelligible without reference to the text or figures. It should not exceed 250 words, and should be included at the beginning immediately after the title, author and author's affiliation.

References

References must be based on the name and year system and conform to the present usages of the *Bulletin*. Titles of journals should be abbreviated as in the 4th edition of *The World List of Scientific Periodicals*. References to unpublished information should normally be included only in the text—(A. B. Jones, pers. comm.) or (A. B. Jones. Control of sandflies by insecticides. Unpublished report. Ross Institute, London, 1950).

Offprints

Free copies of offprints are allowed as follows: One author—20 copies; two or more authors—30 copies. Further copies may be obtained on payment, and the number required should be specified when the paper is submitted.

BULLETIN OF ENTOMOLOGICAL RESEARCH

(Word List Abbreviation: *Bull. ent. Res.*)

ISSN 0007-4853

	PAGE
AUSTIN, A. D. New species of Platygasteridae (Hymenoptera) from India which parasitise pests of mango, particularly <i>Procontarinia</i> spp. (Diptera: Cecidomyiidae)	549
SUBRA, R. & DRANSFIELD, R. D. Field observations on competitive displacement, at the preimaginal stage, of <i>Culex quinquefasciatus</i> Say by <i>Culex cinereus</i> Theobald (Diptera: Culicidae) at the Kenya Coast	559
YATES, M. G. The biology of the oak bark beetle, <i>Scolytus intricatus</i> (Ratzeburg) (Coleoptera: Scolytidae), in southern England	569
FARNHAM, A. W., O'DELL, K. E., DENHOLM, I. & SAWICKI, R. M. Factors affecting resistance to insecticides in house-flies, <i>Musca domestica</i> L. (Diptera: Muscidae). III. Relationship between the level of resistance to pyrethroids, control failure in the field and the frequency of gene <i>kdr</i>	581
AMIN, A. M. & WHITE, G. B. Relative fitness of organophosphate-resistant and susceptible strains of <i>Culex quinquefasciatus</i> Say (Diptera: Culicidae)	591
TUCKER, M. R. Possible sources of outbreaks of the armyworm, <i>Spodoptera exempta</i> (Walker) (Lepidoptera: Noctuidae), in East Africa at the beginning of the season	599
FORNO, I. W. & BOURNE, A. S. Studies in South America of arthropods on the <i>Salvinia auriculata</i> complex of floating ferns and their effect on <i>S. molesta</i>	609
HOLMES, P. R. A field study of the predators of the grain aphid, <i>Sitobion avenae</i> (F.) (Hemiptera: Aphididae), in winter wheat in Britain	623
HARRINGTON, R. & CHENG, X. N. Winter mortality, development and reproduction in a field population of <i>Myzus persicae</i> (Sulzer) (Hemiptera: Aphididae) in England	633
READY, P. D., LAINSON, R., WILKES, T. J. & KILLICK-KENDRICK, R. On the accuracy of age-grading neotropical phlebotomines by counting follicular dilatations: first laboratory experiments, using colonies of <i>Lutzomyia flaviscutellata</i> (Mangabeira) and <i>L. furcata</i> (Mangabeira) (Diptera: Psychodidae)	641
CAMERON, P. J., POWELL, W. & LOXDALE, H. D. Reservoirs for <i>Aphidius ervi</i> Haliday (Hymenoptera: Aphidiidae), as a polyphagous parasitoid of cereal aphids (Hemiptera: Aphididae)	647
GUILLOT, F. S. & WRIGHT, F. C. Reduced fecundity of <i>Psoroptes ovis</i> (Hering) (Acari: Psoroptidae) on calves treated with ivermectin	657
CHISHOLM, I. F. & LEWIS, T. A new look at thrips (Thysanoptera) mouthparts, their action and effects of feeding on plant tissue	663
WOOD, R. J., PASTEUR, N. & SINÈGRE, G. Carbamate and organophosphate resistance in <i>Culex pipiens</i> L. (Diptera: Culicidae) in southern France and the significance of <i>Est-3 A</i>	677
RANDOLPH, S. E. & ROGERS, D. J. Movement patterns of the tsetse fly <i>Glossina palpalis palpalis</i> (Robineau-Desvoidy) (Diptera: Glossinidae) around villages in the pre-forest zone of Ivory Coast	689
CHAMBERS, J., MCKEVITT, N. J. & STUBBS, M. R. Nuclear magnetic resonance spectroscopy for studying the development and detection of the grain weevil, <i>Sitophilus granarius</i> (L.) (Coleoptera: Curculionidae), within wheat kernels	707
INDEX OF AUTHORS	725
INDEX OF GENERA AND SPECIES	731
