

Hegel's HERMENEUTICS

PAUL REDDING

“A significant contribution to Hegel scholarship . . . well written, clear . . . all in all, an impressive achievement.”

—Terry Pinkard,
Georgetown University

“Paul Redding makes a major contribution to contemporary Hegel studies and to the plausibility of a quite general non-metaphysical approach to the world.”

—Peter J. McCormick,
University of Ottawa

An advance on recent revisionist thinking about Hegelian philosophy, this book interprets Hegel's achievement as part of a revolutionary modernization of ancient philosophical thought initiated by Kant. In particular, Paul Redding argues that Hegel's use of hermeneutics, an emerging way of thinking objectively about intentional human subjects, overcame the major obstacle encountered by Kant in his attempt to modernize philosophy. The result was the first genuinely modern, hermeneutic, and “nonmetaphysical” philosophy.
