Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 18 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 22, 2019 (18 issues):
Internet/print package: £1325/\$2542 Americas only/€2124 EU only
Internet only: £959/\$1820 Americas only/€1525 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and which are not, and will not be obliged to give reasons to prospective

advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to Cambridge University Press
1 Liberty Plaza
Floor 20, New York

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing

interests. The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Nutritional status and body composition

Using multiple correspondence analysis to identify behaviour patterns associated with overweight and obesity in Vanuatu adults
A van Horn, CA Weitz, KM Olszowy, KN Dancause, C Sun, A Pomer, H Silverman, G Lee, L Tarivonda, CW Chan, A Kaneko, JK Lum and RM Garruto 1533

Visceral adiposity index is a better predictor of unhealthy metabolic phenotype than traditional adiposity measures: results from a population-based study
FG Ferreira, LL Juvanhol, DG da Silva and GZ Longo 1545

Behavioural nutrition

Frequency of eating alone is associated with adolescent dietary intake, perceived food-related parenting practices and weight status: cross-sectional Family Life, Activity, Sun, Health, and Eating (FLASHE) Study results
M Reicks, C Davey, AK Anderson, J Banna, M Cluskey, C Gunther, B Jones, R Richards, G Topham and SS Wong 1555

Early educators' practices and opinions in relation to pre-schoolers' dietary intake at pre-school: case Finland
R Lehto, C Ray, H Vepsäläinen, L Korkalo, K Nissinen, E Skaffari, S Määttä, E Roos and M Erkkola 1567

Nutritional epidemiology

Discretionary intake among Australian adults: prevalence of intake, top food groups, time of consumption and its association with sociodemographic, lifestyle and adiposity measures
F Fayet-Moore, A McConnell, T Cassettari, K Tuck, P Petocz and J Kim 1576

Eating habits in the population of the Aeolian Islands: an observational study
PL Spina, R Savica, A Ciacciarelli, M Cotroneo, C Dell'Aera, F Grillo, C Casella, MC Fazio, G Trimarchi and RF Musolino 1590

Determinants of undernutrition prevalence in children aged 0–59 months in sub-Saharan Africa between 2000 and 2015. A report from the World Bank database
C Ricci, H Asare, J Carboo, C Conradie, RC Dolman and M Lombard 1597

Knowledge, attitudes and practices related to dietary salt intake among adults in North India
V Garg, R Shivashankar, D Kondal, S Ghosh, S Khandelwal, R Gupta, A Krishnan, R Amarchand, D Prabhakaran and S Mohan 1606

Moderately elevated preconception fasting plasma total homocysteine is a risk factor for psychological problems in childhood
J Roigé-Castellví, M Murphy, J Fernández-Ballart and J Canals 1615

Variation in the food environment of small and non-traditional stores across racial segregation and corporate status
MR Winkler, KM Lenk, CE Caspi, DJ Erickson, L Harnack and MN Laska 1624

Association of abnormal serum electrolyte levels with hypertension in a population with high salt intake
D Wu, Y Chen, H Guan and Y Sun 1635

Community nutrition

Neighbour home gardening predicts dietary diversity among rural Tanzanian women
MM Blakstad, AL Bellows, D Mosha, CR Canavan, K Mlalama, J Kinabo, ME Kruk, H Masanja and WW Fawzi 1646

A comparative analysis of the restaurant consumer food environment in Rochester (NY, USA) and London (ON, Canada): assessing children's menus by neighbourhood socio-economic characteristics
CM DuBreck, RC Sadler, G Arku, J Seabrook and J Gilliland 1654

Sociodemographic predictors of exclusive breast-feeding among low-income women attending a Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) programme
JA Rethy, S Gallo, AC Doig, J Brady and D Goodfriend 1667

Interventions

The short- and long-term impact of an incentive intervention on healthier eating: a quasi-experiment in primary- and secondary-school cafeterias in Brazil
CM Ferreira, R Goldszmidt and EB Andrade 1675

Public policies

How effective is food industry self-substantiation of food–health relationships underpinning health claims on food labels in Australia?
L Wellard-Cole, WL Watson, C Hughes and K Chapman 1686

Objective assessment of compliance with a state-wide school food-service policy via menu audits
G Myers, M Sauzier, A Ferguson and S Pettigrew 1696

Community nutrition

A systematic review of food pantry-based interventions in the USA
R An, J Wang, J Liu, J Shen, E Loehmer and J McCaffrey 1704

Interventions

Ingredient bundles and recipe tastings in food pantries: a pilot study to increase the selection of healthy foods
EC Stein, K Cooksey-Stowers, ML McCabe, MA White and MB Schwartz 1717

Corrigendum

Ingredient bundles and recipe tastings in food pantries: a pilot study to increase the selection of healthy foods – CORRIGENDUM
EC Stein, K Cooksey-Stowers, ML McCabe, MA White and MB Schwartz 1723
