

SUBSCRIPTION RATES

Subscription rates (post free) for Volume **32** (2000) of *Advances in Applied Probability* are as follows:

US\$238.50; \$A376.35; £145.50 for libraries and institutions;
US \$79.50; \$A125.45; £48.50 for individuals belonging to a recognised scientific society.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, The University, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency or by VISA or Mastercard (phone: +44 114 222 3922; fax: +44 114 272 9782).

NOTES FOR CONTRIBUTORS

Contributors in *Advances* may be of six kinds:

(1) *review papers*; (2) *longer research papers* in applied probability, which may include expository material; (3) *expository papers* on branches of mathematics of interests to probabilists; (4) *papers outlining areas in the biological, physical, social and technological sciences* in which probability models can usefully be developed; (5) *papers in applied probability* presented at conferences which do not publish their proceedings; (6) *letters to the editor* on any appropriate topic in applied probability. In addition, the SGSA section includes contributions relating to stochastic geometry and statistical applications. Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to be published in that journal.

Shorter research papers and *short communications* are published in the *Journal of Applied Probability*. The editors may publish accepted papers in either journal, however, according to the space available, in order to meet publication deadlines.

Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purposes of computerised information retrieval; (3) primary and secondary classifications according to the 1991 Mathematics Subject Classification, to be found in the 1990 Annual Index of *Mathematical Reviews*.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office. An updated version of the guide, with LATEX style files, can be obtained in electronic form on <http://www.shef.ac.uk/~apt> or on PC-compatible disk from the Applied Probability Office.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,
The University, Sheffield S3 7RH, UK.**

COPYRIGHT

The copyright of all published papers shall be vested in the Trust. When a paper is accepted for publication, the Trust requests the author(s) to sign a form assigning copyright to the Trust. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Centre (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus 0.20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0001-8678/00 \$00.70 + 020.

Stochastic Geometry and Statistical Applications

- 315 NOEL CRESSIE AND ANDREW B. LAWSON. Hierarchical probability models and Bayesian analysis of mine locations
- 331 PETER J. DIGGLE, JORGE MATEU AND HELEN E. CLOUGH. A comparison between parametric and non-parametric approaches to the analysis of replicated spatial point patterns
- 344 ASGER HOBOLTH AND EVA B. VEDEL JENSEN. Modelling stochastic changes in curve shape, with an application to cancer diagnostics
- 363 MARIE-ANGE REMICHE. Asymptotic independence of counts in isotropic planar point processes of phase type

General Applied Probability

- 376 SØREN ASMUSSEN AND OFFER KELLA. A multi-dimensional martingale for Markov additive processes and its applications
- 394 J.-F. YAO AND J.-G. ATTALI. On stability of nonlinear AR processes with Markov switching
- 408 F. CHAMPAGNAT AND J. IDIER. On the correlation structure of unilateral AR processes on the plane
- 426 KARL SIGMAN AND READE RYAN. Continuous-time monotone stochastic recursions and duality
- 446 CHRISTIANE COCOZZA-THIVENT AND MICHEL ROUSSIGNOL. A general framework for some asymptotic reliability formulas
- 468 MARCEL F. NEUTS, RAFAEL PÉREZ-OCÓN AND INMACULADA TORRES-CASTRO. Repairable models with operating and repair times governed by phase type distributions
- 480 G. YIN. Convergence of a global stochastic optimization algorithm with partial step size restarting
- 499 JENS LEDET JENSEN AND ANNE-METTE KRABBE PEDERSEN. Probabilistic models of DNA sequence evolution with context dependent rates of substitution
- 518 DAVID ASSAF, YULIY BARYSHNIKOV AND WOLFGANG STADJE. Optimal strategies in a risk selection investment model
- 540 PAUL GLASSERMAN AND HUI WANG. Discretization of deflated bond prices
- 564 A. A. PUHALSKII AND M. I. REIMAN. The multiclass $GI/PH/N$ queue in the Halfin-Whitt regime
