

Abstracts Presented at the International Neuropsychological Society, British Neuropsychological Society and the Division of Neuropsychology of the British Psychological Society Joint Mid-Year Meeting

July 6-9, 2005

Dublin, Ireland

academic achievement	79	cancer	40, 79
activities of daily living / adaptive functioning	5, 47, 51, 64, 80	carbon monoxide	18
ADHD	43, 71	cardiovascular disease	40
adolescence	50	cerebral blood flow	18
affect processing - normal	23	cerebrovascular accident/stroke	5, 24, 59, 71
affective processing disorders	4, 21, 24	cerebrovascular disease	58
aging - normal	8, 62, 67, 75, 76	chemotherapy	39, 40
alcohol	1, 9, 10, 41	child brain injury	14, 15, 16, 18, 29, 30, 57, 66, 73, 74
amyotrophic lateral sclerosis	52	child development - abnormal/disease	8, 20, 27, 28, 30, 44, 45, 73, 74, 79
anomia	22, 23	child development - normal	11, 27, 45, 74
anosognosia	4, 33, 54, 64	clock drawing	61
anterior communicating artery aneurysm	17	cognitive	4, 78
antisocial behavior	41	cognitive control	2, 18, 46
anxiety	59, 78	cognitive course	65
apathy	14	cognitive functioning	8, 12, 28, 31, 32, 33, 36, 37, 38, 39, 40, 42, 46, 47, 50, 51, 52, 53, 60, 65, 69, 70, 81
apraxia	53	cognitive neuroscience	19, 20, 26, 45, 68
arithmetic ability disorders	45	cognitive processing	19, 40, 49, 50, 52, 57, 68
arousal	20	cognitive rehabilitation	4, 22, 28, 34, 56, 59, 67, 68, 77, 78, 79, 80
assessment	27, 36, 51, 55, 57, 63, 64, 68, 69, 70, 80, 81	cognitive reserve / brain reserve capacity	75
asymmetry	7, 20, 53	cognitive reserve capacity	2, 73, 76
ataxia	22	cognitive screening	61, 64, 71
attention	1, 2, 3, 5, 11, 24, 25, 27, 34, 37, 40, 43, 47, 54, 55, 64, 67, 77	computerized neuropsychological testing	43, 63, 71, 74
autism spectrum disorders	46	concussion	57, 72, 73
awareness	7, 23, 24, 25, 33, 49, 50, 54, 55, 56	confabulation	17
bipolar disorder	19	corpus callosum	5
brain damage	3, 58	corticobasal degeneration	48
brain development	31	creativity	14
brain disorder	42	cross-cultural	69
brain function	23	decision-making	11, 21, 34
brain injury	49, 50, 53, 54, 56, 58, 67, 70, 72, 73, 76, 77, 81	deep brain stimulation	65
brain plasticity	19, 67	dementia - AD	10, 18, 39, 47, 54, 60, 61, 62, 63, 65, 69, 70, 78, 80
brain tumor	4, 14, 30, 38	dementia - other cortical	35, 47, 61, 64, 80, 81
bulimia nervosa	14		

demographic effects on test performance (e.g. age, education, gender, etc.)	.6
depression	24, 33, 34, 35, 36, 50, 59
diabetes	39
dichotic listening	2, 6
driving	65, 71
dyslexia	34, 44
ecological validity	38, 46
EEG	1, 20, 45, 50
effort	40, 42
event-related potentials	7, 19, 20, 23, 53
executive function - abnormal	12, 13, 14, 22, 33, 36, 41, 47, 59, 63, 66, 75
executive function - normal	1, 8, 27, 45, 57, 67
executive skills	28, 34, 58, 76
face processing	7, 19, 20, 69
facial affect	24
fatigue	52
fetal alcohol syndrome	30
fluency	10
focal lesion	9, 15
forensic neuropsychology	36, 37, 38, 70
frontal lobes	9, 11, 12, 14, 17, 35, 76
frontal-subcortical circuitry	13
frontostriatal circuitry	12
frontotemporal dementia	48, 52
genetic neuropsychology	20, 44, 65
head injury - closed	33
hippocampus	9, 18
Hispanics	43
HIV/AIDS	42, 43
hormone effects	42, 61
hormone replacement therapy	38, 77
huntington's disease	24, 48
information processing speed	71, 74
informed consent	63
inhibitory control	5, 12, 41, 76
intelligence	75
language	6, 10, 22, 23, 80
language: aphasia	7, 21, 22, 48, 58, 79
language: development	27
laterality	6, 11
learning	11, 23
learning disabilities	30, 43, 44
low birth weight	31, 32, 74
magnetoencephalography	20
malingerer	37, 38, 70, 72
math ability	45
medical illness	40
memory complaints	35, 50, 51, 58
memory disorders	7, 8, 9, 10, 11, 16, 17, 26, 28, 33, 34, 43, 48, 58, 60, 62, 66, 74, 78, 81
memory training	77
memory: implicit	53, 62
memory: normal	8, 9, 10, 11, 67, 76
memory: prospective	9, 56, 66, 67, 76, 77
mental retardation	70
metacognition	55
metamemory	8
mild cognitive impairment	10, 39, 43, 60, 61, 63, 64, 75, 77
mild traumatic brain injury	29, 35, 72, 73
motivation	17
motor function	2, 3, 4, 19, 36, 37, 44, 53
MR spectroscopy	57, 60
MRI: functional	18, 21, 26, 66, 67
MRI: structural	1, 18, 19, 28, 57, 59, 73
multiple sclerosis	51, 52, 79
naming	22, 65, 80
neglect	3, 4, 5, 54
neural circuitry	29
neurocognition	44
neuroimaging: functional	19
neuroimaging: structural	24, 39
neuropsychological assessment	13, 18, 27, 28, 35, 37, 38, 39, 41, 42, 43, 46, 47, 58, 59, 61, 64, 66, 70, 71, 72
neuropsychological outcome	13, 29, 30, 39, 41, 51, 59, 68
outcome	32, 34, 52, 56, 57, 58, 60, 76, 81
P300	79
parietal lobes	3
parkinson's disease	3, 53, 64, 65, 66
personality	33, 51, 55
PET	6, 17, 26
praxis	53, 64
premorbidfunctioning	74, 81
preterm children	8, 28, 31, 32
proprioception	3
psychometric constructs/properties	69, 71, 81
psychopathology: other	34, 35, 36, 70

psychopathy	41	stroke recovery	.8, 21, 24, 59, 60
psychopharmacology	29	subarachnoid hemorrhage	58
PTSD	29	subcortical	19
		subjective memory	75
quality of life	50, 51, 58, 60, 66	substance abuse	21, 40, 41, 42
reaction time	3, 5	temporal lobe	17
reading: disorders	11, 23, 44	test development	2, 71
reading: normal	23	test reliability	69, 70
retrosplenial cortex	26	test validity	13, 62
		thalamus	28
schizophrenia	12, 36, 37, 71, 80	theory of mind	13
schizotyp	37	traumatic brain injury	7, 12, 13, 16, 18, 24, 32, 33, .36, 37, 42, 46, 49, 55, 56, 57, 66, 68, 72, 74, 78, 79
seizure disorders / epilepsy	26, 50	treatment outcome	24, 25, 77, 79
self-report\	51		
semantic processing	9, 47, 80, 81	vascular dementia	18
sensory integration	3	verbal abilities	63, 69
sleep	77	visuoconstruction	62
sleep disorders	28	visuospatial	3, 5, 23, 27
social cognition / behavior	12, 24, 37, 52		
spina bifida	27, 45, 73, 74	working memory	1, 2, 3, 4, 7, 10, 11, 20, 21, 23, 33, 63, 65
sports-related neuropsychology	57	writing	44, 80
stimulants	79
