Nations in a Multipolar World

Cecil V. Crabb, Jr. / Just published.

The author examines and analyzes succinctly, yet completely, the basic data needed to understand present-day international relations. Recognizing that the field of international relations is vast and diverse, he utilizes several approaches or principles to make the subject matter meaningful, intelligible, and relevant.

American Foreign Policy in the Making

Eleanor Lansing Dulles / Coming in May.

This new text provides an analysis of the apparatus and history of American foreign policy since the end of World War II and puts into historical perspective the aims of that policy and its degrees of success and failure.

Beyond Ideology:

THE REVIVAL OF POLITICAL THEORY

Dante Germino / Just published.

This new text is a superbly organized and lucid analysis of contemporary political science and modern man's political and social problems. The author presents a trenchant argument against the thesis that political theory is now in a state of decay; he examines the need and prospect for recovering the humanist tradition of political theory and places modern theory in proper historical perspective.

Comparative Government and Politics:

AN INTRODUCTORY ESSAY IN POLITICAL SCIENCE

Michael Curtis / Just published.

Here is the core volume in the series of political studies of individual countries and areas under Dr. Curtis' editorship. It seeks to introduce the student to the subject of comparative politics through both an analytical and institutional approach.

The Government and Politics of Contemporary Italy

Dante Germino and Stefano Passigli / Just published.

This new text provides a sophisticated framework for an understanding of Italian politics. It illuminates both the achievements and the weaknesses of the Italian political system, without demanding that Italy's form of constitutional democracy pattern itself after the British or the American model. Provides a lasting insight into the mechanism *behind* the changing political order.

French Politics and Political Institutions

Roy Pierce / Coming in April.

This brief but thorough analysis of French politics is based on the broad range of recent research done by European and American scholars and covers events through the legislative election of March, 1967.
