of the

AUSTRALIAN MATHEMATICAL SOCIETY

Volume 41 Number 3 **June 1990**

Entire functions that share finite values with their derivatives
Yang Lian-Zhong 337
Formal complexity of inverse semigroup rings
Adel A. Shehadah 343
On periodic solutions to autonomous retarded functional differential equations
Zhanyuan Hou 347
On Dankwerts' transformation for two variable coupled systems
James M. Hill and Alex McNabb 355
Continuity characterisations of differentiability of locally Lipschitz functions
J.R. Giles and Scott Sciffer 371
Norms in polynomial rings
G. Myerson 381
On topologies in a topos
Javad Tavakoli 387
On constrained stochastic optimal parameter selection problems
C.J. Goh and K.L. Teo 393
On the mean value of the enumeration function for multiplicative partitions
Cao Hui-Zhong and Ku Tung-Hsin 407
Slices, RNP, strong regularity and martingales
Maria Girardi and J.J. Uhl, Jr. 411
On a result of Singh
Hong-Xun Yi 417
The coincidence problem for compositions of set-valued maps
H. Ben-El-Mechaiekh 421
Area and length maxima for univalent functions
Shinji Yamashita 435
The lambda-property for generalised direct sums of normed spaces
Robert H. Lohman and Thaddeus J. Shura 441
Free abelian topological groups on countable CW-complexes
Eli Katz and Sidney A. Morris 451
A new minimax inequality on H-spaces with applications
Xie Ping Ding, Won Kyu Kim and Kok-Keong Tan 457
Applications of a minimax inequality on H-spaces
Xie Ping Ding, Won Kyu Kim and Kok-Keong Tan 475
An application of differential subordinations and some criteria for univalency
Shigeyoshi Owa and Milutin Obradović 487
On uniformly bounded sequences in Orlicz spaces
Erik J. Balder 495
On the drop and weak drop properties for a Banach space
J.R. Giles, Brailey Sims and A.C. Yorke 503
Limits of unbounded sequences of continued fractions
J. Tong 509

INFORMATION FOR AUTHORS.

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field. As even minor revisions are generally not permitted, authors should read carefully all the details listed below and on the inside back cover. For a paper to be acceptable for publication, not only should it contain new and interesting results but also

(i) the exposition should be clear and attractive, and
(ii) the manuscript should be in publishable form, without revision.

Authors should submit *three* clean, high quality copies to

The Editor, Bulletin of the Australian Mathematical Society,
Department of Mathematics, University of Queensland,
St. Lucia, Queensland, 4067, Australia.

Unless requested at the time, material submitted to the BULLETIN will usually not be returned. *Note that each paper submitted must include an abstract and one or more classification numbers following the 1980 Mathematics Subject Classification.* (1985 Revision)

ABSTRACTS OF PH.D. THESES.

The BULLETIN endeavours to publish abstracts of all accepted Australasian Ph.D. theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.
