'TABLOID' Effervescent Artificial Mineral Water Salts contain in small bulk the essential constituents of the natural waters whose names they bear. In conjunction with a suitable dietary, they provide the means of adopting the treatment carried out at Continental spas without the necessity of going abroad.

In addition to the therapeutic advantages which these 'Tabloid' Salts offer, their compactness and portability must be considered as important factors in securing regular and continuous treatment. One in a stated quantity of water forms a pleasant effervescing draught, which represents an equal volume of Carlsbad, Vichy, Kissingen or Seltzer water. The group is further extended by the inclusion of 'Tabloid' Effer-
