

**CONSENSUS DEVELOPMENT CONFERENCE
ON
USE OF ESTROGENS IN
AND AFTER MENOPAUSE**

**Will take place 27 - 29 November 1990, Soria
Moria Conference Center, Oslo, Norway.**

Program available by mid-August.

**Sponsors: Norwegian Research Council for
Science and the Humanities, Council for
Medical Research in cooperation with the Nor-
wegian Institute for Hospital Research and the
Ministry of Health and Social Affairs.**

Vol. 19, No. 3 – 1989

editor-in-chief:
vicente navarro

SECTION ON INTERNATIONAL COMPARISONS OF HEALTH POLICY

Why Some Countries Have National Health Insurance, Others Have National Health Services, and the United States Has Neither *Vicente Navarro*

The Shift from Home to Institutional Childbirth: A Comparative Study of the United Kingdom and The Netherlands *Alberto Torres and Michael R. Reich*

SECTION ON HEALTH POLICY IN THE UNITED STATES

The Politics of Employment-based Insurance in the United States

Clifford L. Staples

SECTION ON POLITICAL SYSTEMS AND HEALTH

Drug Use and Policy in Poland in the 1980s *Margaret Watson*

SECTION ON WORK ORGANIZATION, DEMOCRATIZATION, AND HEALTH

Introduction: Theoretical Developments in Psychosocial Work

Environment Research *Jeffrey V. Johnson*

Dimensions of Control as Related to Work Organization, Stress, and Health

Gunnar Aronsson

Collective Control: Strategies for Survival in the Workplace *Jeffrey V. Johnson*

SECTION ON UNDERDEVELOPMENT AND HEALTH

Foreign Nations, International Organizations, and Their Impact on Health

Conditions in Nicaragua Since 1979 *William S. Linsenmeyer*

The Social Costs of the International Monetary Fund's Adjustment Programs for Poverty: The Case of Health Care Development in Ghana

Charles A. Anyinam

DEBATE ON THE NEED FOR A NATIONAL HEALTH PROGRAM IN THE UNITED STATES

The Feasibility of a National Health Program *Milton I. Roemer*

The Need for a National Health Program: Thoughts on Examining the Jackson National Health Program *C. Arden Miller*

DEBATE ON CLASS, RACE, AND ETHNICITY

Latino/"Hispanic"—Who Needs a Name? The Case Against a Standardized Terminology *Martha E. Gimenez*

Contributors

The articles that appear in the *Journal* analyze what is going on in our industry, why it is going on in the way it is, and with what effect. It also analyzes forces that shape the nature of health, disease, medicine and public health.

International Journal of Technology Assessment in Health Care

Instructions for Contributors

The editors welcome submissions of articles which deal with the wide range of topics related to technology assessment in health care—policy, practice, diffusion, economics, ethics, law, and social and cultural perspectives. Authors should send *three* copies of their manuscript and reserve one copy for their use in checking proofs. Articles must be in English. Spelling, capitalization, and punctuation must be consistent within each article and conform with the 13th Edition of *The Chicago Manual of Style* (University of Chicago Press). Articles and correspondence should be sent to: **Stanley J. Reiser**, The University of Texas Health Science Center at Houston, P.O. Box 20708, Houston, Texas 77225, U.S.A.; or **Egon Jonsson**, The Karolinska Institute and the Swedish Council on Technology Assessment in Health Care, P.O. Box 16158, 103 24 Stockholm, Sweden.

Permissions. Submission of an article implies that it has not been published elsewhere. Authors are responsible for obtaining written permission to publish material for which they do not own the copyright. Contributors will be asked to assign their copyrights, on certain conditions, to Cambridge University Press.

Preparation of Manuscript. The entire manuscript, including all notes and references, must be typed, *double-spaced* on 8½ × 11 inch or A4 paper, leaving wide margins for copyediting. Manuscript pages should be numbered consecutively (including the cover sheet). Manuscripts should be arranged as follows: (1) cover sheet, (2) title page, (3) abstract, (4) acknowledgments, (5) text, (6) notes, (7) references, (8) appendix, (9) tables with titles, (10) figures with captions. The cover sheet should list the article title (in capital letters), a name and complete mailing address to which proofs should be sent, the name and telephone number of the lead author, and a short title (50 characters or less) for the running head. The title page should list the article title (in capital letters) and all authors' names and affiliations, as they should appear for publication. The abstract cannot exceed 50 words. Any notes to the title or authors and any acknowledgments should be noted on a separate sheet and placed after the abstract.

References and notes. Bibliographic citations in the text are indicated by in-line numbers in parentheses; the numbers in the text correspond to numbers that directly precede each reference.

Text

“ . . . Jones and Smith (1) maintained that . . . ”

If more than one reference is cited at a specific place in the text, semicolons should separate each reference number; if page numbers are included, commas should separate each reference number from its page number(s).

Multiple citations without page numbers

. . . this system has been dealt with at length in the literature (1;3;12;14).

Multiple citation with page numbers

. . . This system has been dealt with at length (1,1-10;3,5;12,25-57;14,102-146).

Reference (Book)

1. Jones, A. B., & Smith, J. K. *Computer diagnosis and results*. New York: Penta Publishers, 1978.

Reference (Journal)

1. Jones, A. B., & Smith, J. K. The relationship between health needs, the hospital and the patient. *Journal of Chronic Diseases*, 1985, 32, 310-12.

Reference (Article in edited work)

1. Jones, A. B., & Smith, J. K. The diagnostic process. In R. Brown & T. Wilson (eds.), *New technology and its medical consequences*, vol. 1. New York: Apple Publishers, 1972, 101-34.

The reference list must be in *alphabetical* order. Titles of journals should not be abbreviated.

When more than a simple source citation is called for, endnotes may be used. Notes should be numbered consecutively throughout the text and typed together on a separate page preceding the reference section. Source citations within notes follow the same parameters of style as citations in text.

Tables and figures. Tables and figures should be numbered consecutively and appear as one unit after the reference section. All tables must be titled; all figures must be captioned. All tables and figures must have at least one text reference, using the following form: “For a different view of this matter, see Table 1 and Figure 3.” Table footnotes appear directly after the table body; table source notes follow the footnotes. Figures should be drawn by a professional artist or computer-generated on a Laser printer. The publisher *cannot* redraw any figure unless the author pays for the cost of such work. All figures should remain legible at a 50% reduction in size.

Copyediting and proofreading. The publishers reserve the right to copyedit and proofread all articles accepted for publication, but the lead author will be asked to review the copyediting if changes have been substantial. Page proof of a Special Section or General article will be sent to the lead author for correction of typographical errors only.

Offprints. The lead author of a Special Section or General article will receive 25 offprints of his/her article free of charge; additional numbers may be purchased if ordered at proof stage.
