

## Subscription rates

Subscription rates for volume **44** (2007) of *Journal of Applied Probability (JAP)* are as follows (post free and including online access at <http://projecteuclid.org/jap/>): US\$330.00; A\$435.00; £180.00 for libraries and institutions; or US\$110.00; A\$145.00; £60.00 for individuals belonging to a recognised scientific society. The subscription rates for volume **39** (2007) of *Advances in Applied Probability*, the companion publication, are the same; if both journals are ordered directly from the Applied Probability office at the same time, the combined price is discounted by 10%. Please send all enquiries to: Applied Probability Subscriptions, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK (telephone +44 114 222 3922; fax +44 114 272 9782; email [s.c.boyles@sheffield.ac.uk](mailto:s.c.boyles@sheffield.ac.uk)). Cheques, money orders, etc. should be made payable to 'Applied Probability'. Payment is acceptable in US, Australian or UK currency, or by Visa or Mastercard. We can provide back issue prices on application.

## Notes for contributors

Papers published in *Journal of Applied Probability (JAP)* may be either: (i) *research papers* not exceeding 20 printed pages; or (ii) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress. *Letters* relating specifically to papers that have appeared in *JAP* will also be published there. *Review papers, longer research papers, letters to the Editor* and papers in *stochastic geometry and statistical applications* are published in *Advances in Applied Probability*, the companion publication.

It is the policy not to accept for publication papers that cannot appear in print within 15 months of the date of receipt of the final version. In order to meet this deadline, an accepted paper may be published in either journal, according to the space available.

Fifty offprints of each paper will be provided free, with additional offprints available at cost.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Papers should be written in English or French; papers in other languages may be accepted, but will appear (subject to the author's agreement) in English or French translation.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2000 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L<sup>A</sup>T<sub>E</sub>X class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as hard copy or as electronic files (with hard copy back-up). All submissions will be acknowledged on receipt and **must be accompanied by a covering letter stating the author's postal address and affiliation**. Hard copy: Send **all** submissions to the Applied Probability office in Sheffield, and not to individual editors. Two copies of the paper, at least one of which should be double spaced, should be sent to: **Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK**. Electronic submission: Please email a **double-spaced** PostScript™ (.ps) or portable document format (.pdf) file, not exceeding 1 Mb. **The files must be clearly identified by name in a separate covering message**. The address for email submissions is [l.nash@sheffield.ac.uk](mailto:l.nash@sheffield.ac.uk). Authors should also submit one hard copy to the Executive Editor, as above.

## Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021–9002/07

Volume 44 Number 3

*Research Papers*

- 571 FRANK BALL, PHILIP D. O'NEILL AND JAMES PIKE. Stochastic epidemic models in structured populations featuring dynamic vaccination and isolation
- 586 GEROLD ALSMEYER AND MATTHIAS MEINERS. A stochastic maximin fixed-point equation related to game tree evaluation
- 607 KA CHUN CHEUNG. Characterizations of conditional comonotonicity
- 618 TEUNIS J. OTT AND JASON SWANSON. Asymptotic behavior of a generalized TCP congestion avoidance algorithm
- 636 JENNIE HANSEN, CIAN REYNOLDS AND STAN ZACHARY. Stability of processor sharing networks with simultaneous resource requirements
- 652 R. ABRAHAM, J. S. DHERSIN AND B. YCART. Strong convergence for urn models with reducible replacement policy
- 661 ALESSANDRO BALDI ANTOGNINI AND SIMONE GIANNERINI. Generalized Pólya urn designs with null balance
- 670 PH. BARBE, W. P. McCORMICK AND C. ZHANG. Asymptotic expansions for distributions of compound sums of random variables with rapidly varying subexponential distribution
- 685 XIAOXIA HE AND YIJUN HU. Ruin probability for the integrated Gaussian process with force of interest
- 695 SUSAN M. PITTS AND KONSTADINOS POLITIS. The joint density of the surplus before and after ruin in the Sparre Andersen model
- 713 PAVEL V. GAPEEV. Discounted optimal stopping for maxima of some jump-diffusion processes
- 732 BRICE FRANKE. A Lévy process whose jumps are dragged by a spherical dynamical system
- 742 YAOZHONG HU AND BERNT ØKSENDAL. Optimal smooth portfolio selection for an insider
- 753 S. V. NAGAEV AND V. WACHTEL. The critical Galton–Watson process without further power moments
- 770 N. LANCHIER AND C. NEUHAUSER. Voter model and biased voter model in heterogeneous environments
- 788 M. R. KANTOROVITZ, H. S. BOOTH, C. J. BURDEN AND S. R. WILSON. Asymptotic behavior of  $k$ -word matches between two uniformly distributed sequences
- 806 NICOLAS PRIVAULT AND XIAO WEI. Integration by parts for point processes and Monte Carlo estimation

*Short Communications*

- 824 LARS HOLST. Counts of failure strings in certain Bernoulli sequences
- 831 YI-CHING YAO. Explicit Optimal strategy for the Vardi casino with limited playing time
- 838 ALEXANDER D. KOLESNIK. A note on planar random motion at finite speed
