The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY
WALTER HOWARTH

ASSISTED BY
V. E. NEGUS AND F. W. WATKYN-THOMAS

1. Original Articles are accepted on the condition that they have not been published elsewhere.
2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.
3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter should be added.
4. The order for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.
5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.
6. Editorial Communications should be addressed to "EDITOR, *Journal of Laryngology*, c/o Messrs OLIVER AND BOYD, Tweeddale Court, Edinburgh."
7. The Annual Subscription is Forty Shillings, post free, and is payable in advance.
8. Single copies of back numbers, both of the present and the previous series, are on sale at Four Shillings each.
9. An Annual Subscription can be commenced with any number of the Journal, and the preceding numbers of the current year can be purchased at Four Shillings each.

UNITED STATES OF AMERICA

Orders for this Journal, for single parts or yearly subscriptions, can be sent either through a local bookseller, or to Messrs G. E. STECHERT & CO., 31-33 East 10th Street, New York.

**CHEVALIER JACKSON'S INSTRUMENTS FOR ŒSOPHAGOSCOPY,
LARYNGOSCOPY, AND BRONCHOSCOPY**

New Models as made for Walter G. Howarth, F.R.C.S.

Each Instrument is made in accordance with the details of Chevalier Jackson's most recent models, and each is supplied with a *spare light carrier*, i.e., 2 light carriers and 2 lamps. All the models have been redesigned with a view to rendering them more easily cleansed; all the crevices and corners where the dirt have been taken away.

To ensure better visibility the tips of the forceps are *black*.

The Howarth-Jackson's Instruments are **less expensive than other American or English models**, and a further economy has been effected by rendering the instrument tips interchangeable, thus reducing the number of forceps handles and tips required.

The lamps are 2.5 volt and more durable than the usual models.

Manufactured only by

DOWN BROS., L^{TD}.

SURGICAL INSTRUMENT MAKERS

21 and 23 ST THOMAS'S STREET

LONDON, S. E. 1

(Opposite Guy's Hospital)

Telegrams—“DOWN, LONDON.”

 post-nasal cavities are to be treated.

When prescribing, please specify

“DeVilbiss Spray No. 15”

(of all Chemists and Surgical Instrument makers)

Complete illustrated Catalogue from

DeVILBISS CO., LTD., WEST DRAYTON, MIDDLESEX

DEAFNESS!

The Choice of Medical Men

for their own deafness or to recommend to patients is the "Ardente" method, because it is so entirely different, uncopyable, and carries a written lifelong guarantee and service by its originator—Mr R. H. Dent—not any mere selling agent or company.

It is the most complete method—the commonsense way and the only individual method. Made in a wide range of types—one is suited to the individual needs of the patient, and only when tested and found suitable is the right type completed and supplied. Interest is taken and adjustments made in accordance with any changed condition of hearing of the user.

"Ardente" is the Choice of

Prof. SIR AMBROSE FLEMING, Kt., M.A., B.Sc., F.R.S., and many leading medical men—professional etiquette makes it necessary for us to withhold their names. "ARDENTE" is shown and appreciated at every B.M.A. meeting, and every improvement is made in direct collaboration after test and consultation with eminent medical men and scientists. No distinguished name used is that of a staff-member—all are of deaf people themselves lending their names and experience for the benefit of fellow-sufferers without personal gain or profit.

All are men of knowledge and world-wide experience, able to judge and have the BEST.

"Ardente" is the choice of every important medical journal and "TRUTH," and for use at Hospitals and supplied through charities, Government Departments (also used by government officials).

Behind "ARDENTE" is a personality—his interest is yours, his success built by the recommendation of his users who chose "Ardente" on its merits—

"Ardente" can be tested Free at any of our Service Bureaux—the most complete in the whole deaf world—or at Doctors' surgeries or patients' homes any day, any time—week-ends and evenings if preferred. Please send for particulars—we will be happy to arrange a free demonstration to you if Deaf yourself or interested on behalf of patients.

"ARDENTE" STETHOSCOPE

Mr R. H. Dent makes a Stethoscope specially for members of the medical profession suffering from deafness. Many are in use, and excellent results are reported on the latest, as evidenced by the interest shown at the last B.M.A. Meeting.

Mr Dent is the inventor of "Ardente."

Mr Dent is the pioneer of individual ear-fitting.

Mr Dent is the originator of the "Free Home Test."

THE TREATMENT OF CHRONIC DEAFNESS by the Electrophone Method of Zünd-Burguet

By GEORGE C. CATHCART, M.A., M.D.

*Consulting Surgeon to the Throat, Nose and Ear Hospital, Golden Square ;
Late Member of the Special Aural Board, Ministry of Pensions*

Contents include:—The Problem of Deafness—The Causation of Deafness—The Prevention of Deafness—The Treatment of Deafness—The History of Re-educative Methods—The Technique of the Electrophone Method—The Value of the Electrophone Method—The Results of the Electrophone Method.

2nd Edition. pp. 124. 7 Illustrations. 5s. net.

Revised and largely re-written by the same Author

HUNTER TOD'S DISEASES OF THE EAR

"The book presents, in a brief and easily read form, just the information required by the practitioner."
...—*The Lancet*.

"As a text-book we commend it highly without any adverse criticism whatever. . . ."—*London Hospital Gazette*.

"Here we have a book where epitomising has been successfully accomplished, and where the information though condensed is astonishingly complete. This book therefore may be thoroughly recommended to the senior student and the general practitioner. . . ."—*St George's Hospital Gazette*

"It is a pleasure to read this book. In 300 pages are contained all that is necessary for the student to know and a good deal more. We can confidently recommend this book. . . ."—*King's College Hospital Gazette*.

"This little book forms an admirable text-book for the student. . . . and will make a useful book of reference for the general practitioner. . . ."—*St Bartholomew's Journal*.

"This book is not only good for beginners in otology but also contains many practical points for the busy practitioner. It is well written, concise, and complete. . . ."—*Bulletin of the Johns Hopkins Hospital*.

2nd Edition. pp. 352. 87 Illustrations. 2 Coloured Plates. 10s. 6d. net.

AIDS FOR THE DEAF

HAWKSLEY'S AURICLES

The best non-electric aid for slight and moderate degrees of deafness.

A New Electric Aid

THE "HAWKOPHONE"

Fitted with a **tiny ear-piece**, this newest of instruments has **no equal** for power and clarity of tone.

MODERATE IN PRICE

There is a "Hawkophone" for every degree of deafness.

IMPORTANT NOTICE

We are the originators of an *independent* 10 days' free home trial, without obligation to purchase, of any of our Acoustic Aids. We daily hear most distressing tales from deaf people who have been coerced into purchasing expensive aids without a proper home trial.
