Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 18 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 23, 2020 (18 issues):
Internet/print package: £1391/\$2669 Americas only/€2230 EU only
Internet only: £1007/\$1911 Americas only/€1601 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and which are not, and will not be obliged to give reasons to prospective

advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to Cambridge University Press
1 Liberty Plaza
Floor 20, New York

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Monitoring and surveillance

A cross-sectional research of iodine status of pregnant women in Chongqing, south-west China
Ning Yao, Chunbei Zhou, Jun Xie and Shuang Zhou 769

Assessment and methodology

Ex post adjustment for measurement error in stunting calculations: an illustration from Egypt
Jose Luis Figueroa and Sikandra Kurdi 776

Identification and frequency of consumption of wild edible plants over a year in central Tunisia: a mixed-methods approach
Marie Claude Dop, Fayçal Kefi, Olfa Karous, Eric O Verger, Asma Bahrini, Zeineb Ghrabi, Jalila El Ati, Gina Kennedy, Céline Termote and the MEDINA Study Group 782

Nutrition communication

Strategies to address anaemia among pregnant and lactating women in India: a formative research study
Pamela A Williams, Jon Poehlman, Katelin Moran, Mariam Siddiqui, Ishu Kataria, Anna Merlyn Rego, Purnima Mehrotra and Neela Saldanha 795

Behavioural nutrition

Comparing food desert residents with non-food desert residents on grocery shopping behaviours, diet and BMI: results from a propensity score analysis
Rebecca C Woodruff, Regine Haardörfer, Ilana G Raskind, April Hermstad and Michelle C Kegler 806

Nutritional epidemiology

Diet quality and hearing loss among middle-older aged adults in the USA: findings from National Health and Nutrition Examination Survey
Qiushi Huang, Yichen Jin, Nicholas S Reed, Yan Ma, Melinda C Power and Sameera A Talegawkar 812

Diet quality of Japanese adults with respect to age, sex, and income level in the National Health and Nutrition Survey, Japan
Kayo Kurotani, Kazuko Ishikawa-Takata and Hidemi Takimoto 821

Dietary patterns are associated with premenstrual syndrome: evidence from a case-control study
Bahareh MoradiFili, Reza Ghiasvand, Makan Pourmasoumi, Awat Feizi, Farnaz Shahdadian and Zahra Shahshahan 833

Socio-economic and cultural disparities in diet among adolescents and young adults: a systematic review
Lucille Desbouys, Caroline Méjean, Stefaan De Henauw and Katia Castetbon 843

Lack of in-home piped water and reported consumption of sugar-sweetened beverages among adults in rural Alaska
Emily Mosites, Sara Seeman, Andrea Fenaughty, Karol Fink, Laura Eichelberger, Peter Holck, Timothy K Thomas, Michael G Bruce and Thomas W Hennessy 861

Total, added and free sugar intakes, dietary sources and determinants of consumption in Portugal: the National Food, Nutrition and Physical Activity Survey (IAN-AF 2015–2016)
Ana Rita Marinho, Milton Severo, Daniela Correia, Liliane Lobato, Sofia Vilela, Andreia Oliveira, Elisabete Ramos, Duarte Torres and Carla Lopes on behalf of the IAN-AF Consortium 869

Better diet quality scores are associated with a lower risk of hypertension and non-fatal CVD in middle-aged Australian women over 15 years of follow-up
Jacklyn K Jackson, Lesley K MacDonald-Wicks, Mark A McEvoy, Peta M Forde, Carl Holder, Christopher Oldmeadow, Julie E Byles and Amanda J Patterson 882

Socio-economic and racial prenatal diet quality disparities in a national US sample
Haley W Parker, Alison Tovar, Karen McCurdy and Maya Vadiveloo 894

Community nutrition

Dietary habits, metabolic health and vitamin D status in Greenlandic children
Julie Courraud, Jonas Salling Quist, Eva Kontopodi, Martin Blomberg Jensen, Poul Jannik Bjerrum, Jørn Wulff Helge and Kaspar Sørensen 904

Linking women-led community kitchens to school food programmes: lessons learned from the Healthy Kitchens, Healthy Children intervention in

Palestinian refugees in Lebanon
Hala Ghattas, Jowel Choufani, Zeina Jamaluddine, Amelia Reese Masterson and Nadine R Sahyoun 914

Interventions

A free-produce stand on campus: impact on fruit and vegetable intake in Dutch university students
Nicole van den Bogerd, Herman Peppelenbos, Roos Leufkens, Jacob C Seidell, Jolanda Maas and S Coosje Dijkstra 924

Public policies

The effect of egg consumption on cardiometabolic health outcomes: an umbrella review
Eunice Mah, C-Y Oliver Chen and DeAnn J Liska 935

Sustainability

The utilisation of wild foods in Mediterranean Tunisia: commentary on the identification and frequency of consumption of wild edible plants over a year in central Tunisia: a mixed-methods approach (Dop et al., n.d.)
Jessica Fanzo 956

Erratum

Intakes of energy, macronutrients and micronutrients of a population in severe food insecurity risk in Brazil – ERRATUM
Stefanie Eugênia dos Anjos Coelho Kubo, Teresa Helena Macedo da Costa and Muriel Bauermann Gubert 959
