## RECENT PAPERS

Vol. XXII.

No. XIX. **On Integers which satisfy the Equation**

$$t^3 \pm x^3 \pm y^3 \pm z^3 = 0.$$

By H. W. RICHMOND, M.A., King's College. Pp. 15. Price 2/6.

„ XX and XXI. **On Cyclical Octosection.** By W. BURNSIDE, M.A., F.R.S., Hon. Fellow of Pembroke College, Cambridge.

**Congruences with respect to Composite Moduli.** By Major P. A. MACMAHON, R.A., F.R.S. Pp. 20. Price 3/-.

„ XXII. **On the Stability of the Steady Motion of Viscous Liquid contained between two Rotating Co-axial Circular Cylinders.** By K. TAMARI and W. J. HARRISON, M.A., Fellow of Clare College, Cambridge. Pp. 13. Price 2/6.

„ XXIII. **On a General Infinitesimal Geometry, in reference to the Theory of Relativity.** By WILHELM WIRTINGER (Vienna). Pp. 10. Price 2/6.

„ XXIV. **On the Fifth Book of Euclid's Elements (Fifth Paper).** By M. J. M. HILL, Sc.D., LL.D., F.R.S., Astor Professor of Mathematics in the University of London. Pp. 14. Price 2/6.

„ XXV. **The Influence of Electrically Conducting Material within the Earth on Various Phenomena of Terrestrial Magnetism.** By S. CHAPMAN, M.A., Trinity College, and T. T. WHITEHEAD. Pp. 20. Price 3/6.

„ XXVI. **The Escape of Molecules from an Atmosphere, with special reference to the Boundary of a Gaseous Star.** By E. A. MILNE, M.A., Trinity College, Cambridge. Pp. 35. Price 5/-.

„ XXVII. **Some Problems of Diophantine Approximation: The Analytical Properties of Certain Dirichlet's Series Associated with the Distribution of Numbers to Modulus Unity.** By G. H. HARDY, M.A., Savilian Professor, University of Oxford, and J. E. LITTLEWOOD, M.A., Trinity College, Cambridge. Pp. 16. Price 3/6.

„ XXVIII. **Free Paths in a Non-uniform Rarefied Gas with an Application to the Escape of Molecules from Isothermal Atmospheres.** By J. E. JONES, 1851 Exhibition Senior Research Student, Trinity College, Cambridge. Pp. 22. With Title-page and Index to Vol. XXII. Price 5/6.

Vol. XXIII.

No. I. **On Approximate Continuity.** By M. H. A. NEWMAN, B.A., St John's College, Cambridge. Pp. 18. Price 3/6.

„ II. **A Mathematical Theory of Natural and Artificial Selection.** By J. B. S. HALDANE, M.A., Trinity College, Cambridge. Pp. 23. Price 4/-.

„ III. **On the Form of the Solution of the Equations of Dynamics.** By T. M. CHERRY, B.A., Trinity College, Isaac Newton Student. Pp. 28. Price 4/-.

## CONTENTS.

	PAGE
<i>On Graeffe's method for complex roots of algebraic equations.</i> By Mr S. BRODETSKY, Trinity College, and G. SMEAL . . . . .	83
<i>On the problem of four particles.</i> By Mr J. BRILL, St John's College . . . . .	88
<i>Canonical forms of the quaternary cubic associated with arbitrary quadrics.</i> By Mr H. W. TURNBULL, Trinity College . . . . .	92
<i>On protecting and sensitising colloidal sols.</i> By Mr ERIC K. RIDEAL . . . . .	101
<i>The equation of state of a gas.</i> By J. E. JONES, 1851 Exhibition Senior Research Student, Trinity College, Cambridge. (Communicated by Mr R. H. FOWLER) . . . . .	105
<i>On the differential invariants of the Laguerre group.</i> By TADAHIKO KUBOTA. (Communicated by Professor H. F. BAKER) . . . . .	113
<i>On the penetration of waves and their rays into a medium of gradually varying properties.</i> By J. A. WILCKEN, B.Sc. (Copenhagen), Ph.D. (La Plata); late of Christ's College. (Communicated by Professor Sir JOSEPH LARMOR) . . . . .	124
<i>Dissociation under a temperature gradient.</i> By P. A. M. DIRAC, St John's College, Cambridge. (Communicated by Mr R. H. FOWLER) . . . . .	132
<i>The electromagnetic equations as basis of Einstein's quadratic form.</i> By Mr R. HARGREAVES, St John's College. (With One Text-figure) . . . . .	138
<i>On the polygons inscribed in one conic and circumscribed to another.</i> By Dr W. BURNSIDE, Pembroke College, Cambridge . . . . .	163
<i>The problems of random flight and conduction of heat.</i> By Dr W. BURNSIDE, Pembroke College, Cambridge . . . . .	167
<i>The integral expansions of arbitrary functions connected with integral equations.</i> By J. HYSLOP, St John's College. (Communicated by Professor E. W. HOBSON) . . . . .	169
<i>On the angle of incidence in soaring flight.</i> By Dr E. H. HANKIN, St John's College, and J. D. NORTH. (With One Text-figure) . . . . .	186
<i>On five lines, in space of four dimensions, which lie upon a quadric threefold and the normal quartic curves of which they are chords.</i> By F. BATH, King's College. (Communicated by Mr H. W. RICHMOND, King's College) . . . . .	189
