Problems of Planning: East and West

by

RUDOLF BIČANIĆ

Zagreb University

(Publications of the Institute of Social Studies, Series Maior, 15)

1967. 123 pages. Dglds. 18,-/US \$ 5.15/25 F

This book is a collection of lectures on planning given at the Institute of Social Studies in The Hague between 1963 and 1966. The first part deals with the forms and methods of planning action according to the environment in which planning takes place, the actors involved, the aims pursued and the instruments used. The original lectures have been brought up to date by the inclusion of new materials. The study is mainly based on analysis of the official documents of some twenty-five countries, and to a lesser extent on their interpretation by planning theorists.

The second part deals with the monocentric and polycentric approaches to planning. This is a theoretical introduction to the morphology of planning, and there is particular discussion of the polycentric type planning as opposed to the monocentric. The author considers that problems connected with polycentric planning are the most important and challenging that planners face today. The third part of the book is an essay which resulted from a discussion on the role of computers, and whether they have a centralizing or a liberalizing function.

CONTENTS: I. Problems of Planning, East and West (The Environment, Aims of Planning, Actors in Planning, Instruments of Planning); II. On Monocentric and Polycentric Approaches to Planning (The Planning Mechanism, Morphology of Planning, The Polycentric Planning Mechanism); III. Computers – Centralizers or Liberalizers (The Role of Computers as Instruments in Polycentric Planning, The Decision Making Process and the Computer Information System in Polycentric Planning, Technical Requirements, Information Utility as Public Service).
