

BIOLOGICAL CONSERVATION

An International Journal

EDITOR

Dr Eric Duffey

Monks Wood Experimental Station, Institute of
Terrestrial Ecology, Abbots Ripton, England

EDITORIAL BOARD

Professor F. Bourlière, Faculté de Médecine, 45 rue des Saints-Pères, Paris 6e, France.

Dr G. Budowski, Tropical Research and Training Center, Turrialba, Costa Rica.

Professor A. Carr, University of Florida, Gainesville, USA.

Dr J. C. de M. Carvalho, Museu Nacional, Rio de Janeiro, Brazil.

Dr Avv Fabio Cassola, WWF Vice-President (Italian Appeal), Rome, Italy.

Dr M. E. Coe, University of Oxford, England.

Professor J. B. Cragg, University of Calgary, Alberta, Canada.

Professor H. Cruz, University of Peradeniya, Sri Lanka.

Professor W. H. Drury, College of the Atlantic, Bar Harbor, Maine, USA.

Professor W. Erz, Bundesforschungsanstalt für Naturschutz und Landschaftsökologie, Bonn, West Germany.

Dr John. A. Gibb, Department of Scientific and Industrial Research, Lower Hutt, New Zealand.

Dr F. B. Goldsmith, University College, London, England.

Professor Lennart Hansson, Swedish University of Agricultural Sciences, Uppsala, Sweden.

Dr L. Hoffmann, Station Biologique de la Tour du Valat, Arles, France.

Dr Osamu Ikenouye, Marine Parks Center of Japan, Tokyo, Japan.

Professor D. J. Kuenen, Leiden, The Netherlands.

Professor K. Mellanby, Monks Wood Experimental Station, Abbots Ripton, England.

Professor Th. Monod, Laboratoire d'Ichtyologie Générale et Appliquée, Paris, France.

Dr B. Nievergelt, Zoologisches Institut der Universität, Zurich, Switzerland.

Professor J. D. Ovington, Australian National Parks and Wildlife Service, Canberra City, Australia.

Dr J. F. V. Phillips, University of Natal, Pietermaritzburg, South Africa.

Sir Peter Scott, The New Grounds, Slimbridge, Gloucester, England.

Mr L. S. Shaposhnikov, Ministry of Agriculture of the USSR, Moscow Region, USSR.

Dr L. M. Talbot, International Union for Conservation of Nature and Natural Resources, Gland, Switzerland.

Professor Manuel G. de Viedma, Universidad Politécnica de Madrid, Spain.

Professor A. de Vos, Auckland, New Zealand.

Professor Dr V. Westhoff, Catholic University, Nijmegen, The Netherlands.

Biological Conservation has as its main purpose the widest dissemination of original papers dealing with the preservation of wildlife and the conservation or wise use of biological and allied natural resources. It is concerned with plants and animals and their habitats in a changing and increasingly man-dominated biosphere—in fresh and salt waters as well as on land and in the atmosphere. While its main basis is ecological the journal aims at fostering other relevant aspects of biological conservation and hopes thereby to encourage more research and publication of work which contributes to our knowledge and understanding of wildlife communities and their value to mankind. *Biological Conservation* publishes analytical studies which make contributions to our understanding of conservation as well as reports of discoveries or important original information.

The journal's coverage of the discipline of conservation ecology is relevant to universities and research institutes while the emphasis on the practical application of the research results is important to all land managers, from those dealing with landscape design problems to those whose concern is nature reserve management.

Subscription Information (ISSN: 0006-3207)

Four issues per volume, three volumes a year (volume approx. 384 pages). Subscription price for 1983 (Volumes 25, 26 and 27); UK, £125.00; Overseas, £144.00. All prices include postage and packing. Subscriptions for delivery to USA, Canada, Japan and Australia are air-speeded at no extra charge.
