## Geneva: study in the heart of Europe in a truly international environment

In addition to various international law courses at undergraduate and postgraduate level in French, the University of Geneva Law School offers in English several summer schools, a Certificate in Transnational Law (CTL) as well as two Masters in advanced studies (MAS) and one Executive Master in cooperation with the Geneva Graduate Institute of International and Development Studies. Students and professionals from around the world come to study in Geneva, the home of numerous international organizations, UN agencies, the ICRC and law firms active in international arbitration.

The CTL provides students with a chance to specialize, early in their career, in international legal affairs within one or two semesters (30 ECTS). Students can tailor their studies according to their particular interests, be it public or private international law.

The MAS in International Humanitarian Law and Human Rights and the Executive Master in International Law in Armed Conflict comprise in-depth courses on all areas of international law relating to armed conflicts.

The Geneva Master in International Dispute Settlement gives students the opportunity to study all aspects of dispute settlement in the international arena, across the divide of public and private.

Summer Schools are offered on International Law, Cultural Heritage Law, Intellectual Property, post-conflict justice and state building, for the first time on International Humanitarian Law, and, jointly with Duke Law School, on transnational law.

## Antarctica in International Law

Edited by Ben Saul and Tim Stephens

Antarctica, one of the world's last great wildernesses, presents special challenges for international law. Fears that Antarctica would become a front in the Cold War catalysed agreement on the 1959 Antarctic Treaty which neither legitimised nor challenged the existing sovereign claims to the continent. The unique Antarctic Treaty System has provided the foundation for peaceful, harmonious and effective governance. There are, however, new anxieties about the frozen continent and the Southern Ocean. This book brings together the main primary international materials concerning the regulation and governance of Antarctica, including multilateral and bilateral treaties, United Nations materials, 'soft laws' and judicial decisions. It covers the spectrum of Antarctic issues from environmental protection to scientific cooperation to tourism. As it shows, Antarctic law has constantly adapted to meet new challenges and is a sophisticated, inclusive, dynamic and responsive regime.

## Institutionalised International Law

Matthias Ruffert and Christian Walter

This textbook, first published in German, explains and analyses not only the structures of international organisations in general, but also focuses on the interplay between the creation of institutional structures and important substantive areas of public international law. In the first and second parts of the book the general aspects of the law of international organisations are surveyed, and in the third part international security, human rights protection, trade, development and environmental protection are analysed in terms of the interplay between substantive and institutional law. This is the first book on international law to bring together institutional and substantive aspects in this comparable manner.

Matthias Ruffert, Friedrich-Schiller-University Jena and Judge at the Highest Administrative Court of Thuringia.

Christian Walter, Ludwig-Maximilians University in Munich.
