Pneumococcal Endophthalmitis after Corneal Transplantation: Control by Modification of Harvesting Techniques

Peggy J. Moore, RN, MPH, CIC; Calvin C. Linnemann, Jr., MD;
James J. Sanitato, MD; Beth Binnion, BS

Transmission and Control of Methicillin-Resistant *Staphylococcus aureus* in a Skilled Nursing Facility

J. Conley Thomas, MPH, PhD; Janis Bridge, MPH;
Stephen Waterman, MD, MPH; Jacqueline Vogt, RN, BSN; Liga Kilman,
BS; Gary Hancock, BS

Coagulase-Negative Staphylococcal Infections in Vascular Surgery: Epidemiology and Pathogenesis

Charles E. Edmiston, Jr., PhD; David D. Schmitt, MD;
Gary R. Seabrook, MD

Brief Report: Blood Contamination of Medical Records

Gary P. Wormser, MD; Rosemary Medure-Collins, BSN, RN;
Lynda Mack, BS, RN

Brief Report: Primary and Recurrent Herpes Simplex Infection in a Pediatric Nurse Resulting from a Human Bite

Laurence Fuortes, MD; Enrico Melson, MD

CEU/CME Quarterly Quiz in This Issue

The Official Journal of The Society of Hospital Epidemiologists of America

Now, FOR THE **HIGH RISK** OF **CV** CATHETER RELATED INFECTION, THERE'S THE HIGHER REWARD OF INFECTION CONTROL.

Maintaining the delicate balance of the patient at high risk of infection is the concern of all in critical care medicine. For the immuno-compromised or high-risk patients, infection can be life-threatening. And for everyone involved, infection is very expensive.

Now Becton Dickinson Critical Care Monitoring answers your concerns about catheter related infection with

the first short term CV catheter featuring built-in infection control. Only Safe-Dwel™ catheters from Becton Dickinson come complete with VitaCuff® the antimicrobial collagen cuff clinically proven to dramatically reduce catheter related infections. That means significant care and cost advantages.

The next time the risk of infection is high, choose the higher rewards of effective infection control. Choose Safe-Dwel CV catheters with VitaCuff from Becton Dickinson.

*VitaCuff is a registered trademark of Vitaphore Corp
