NAGOYA
MATHEMATICAL JOURNAL

VOL. 115

September 1989

PUBLISHED BY
DEPARTMENT OF MATHEMATICS, SCHOOL OF SCIENCE
NAGOYA UNIVERSITY

Correspondences concerning subscription, and back issues
of the journal should be addressed to

KINOKUNIYA COMPANY LTD.
17-7 Shinjuku 3-chome, Shinjuku-ku
Tokyo 160-91 JAPAN

The annual subscription price for 1989 is about \$ 230.00.

NAGOYA UNIVERSITY

Nagoya Mathematical Journal is, in principle, the official organ of the Department of Mathematics, Nagoya University, designed solely for the publication of research papers. However, some invited papers and other original papers in mathematics from all over the world are also regularly published in Nagoya Mathematical Journal. Currently, 4 volumes are published each year.

All manuscripts should be typewritten in English, French, or German with sufficient space between lines, and special letters such as bold-face, German, Greek, and script should be clearly marked. All single letters used in formulas will appear in italic, and mathematical symbols will appear in the standard style usual for mathematical literature. Therefore, it is not required to mark such letters and symbols. Instructions which conflict with the general printing rules of the journal will not be accepted. For example, each paragraph title should appear in bold-face. Good reproductions of a typewritten manuscript are acceptable.

As soon as we receive a manuscript, a receipt will be sent to the author. When a manuscript has been sent to a referee, the author will receive another notice. These receipts and notices, however, do not mean anything regarding the acceptability of the paper for publication. If the editorial committee has decided to accept a paper, the author will receive a notice containing the number of the volume in which the paper will appear.

Each author, as well as each co-author, will have 100 reprints, while only one set of proof will be prepared per paper for proof-reading by the author(s). Therefore, a joint paper must carry instructions as to whom the proof should be sent.

The actual business of the Nagoya Mathematical Journal is performed by the managing editor with the cooperation of editors residing in Nagoya.

The manuscript and general correspondence should be addressed to: Managing editor, Nagoya Mathematical Journal, Department of Mathematics, School of Science, Nagoya University, Chikusa-ku, Nagoya, 464, Japan.

CONTENTS

Itô, M. and Nishio, M.: Poincaré type conditions of the regularity for the parabolic operator of order α	1
Kitaoka, Y.: Some remarks on representations of positive definite quadratic forms	23
Takeuchi, M.: Two-number of symmetric R -spaces	43
Jefferies, B.: Integration with respect to the product of a measure and a closable set function	47
Okassa, E.: Relèvements des structures symplectiques et pseudo-riemanniennes à des variétés de points proches	63
Nagase, N.: On the existence of optimal control for controlled stochastic partial differential equations	73
Yamato, K.: Algebraic Riemann manifolds	87
Fujita, T.: Remarks on quasi-polarized varieties	105
Tyc, A.: On F -integrable actions of the restricted Lie algebra of a formal group F in characteristic $p > 0$	125
Kubo, I. and Yokoi, Y.: A remark on the space of testing random variables in the white noise calculus	139
Nakagoshi, N.: On the unramified extensions of the prime cyclotomic number field and its quadratic extensions	151
Chong, C. T.: Maximal sets and fragments of Peano arithmetic ...	165
Leu, M.-G.: On a problem of Ono and quadratic non-residues	185
Ishizaki, K.: On some generalizations of theorems of Toda and Weissenborn to differential polynomials	199
