# JOURNAL OF MATERIALS RESEARCH

**JOURNAL OF MATERIALS RESEARCH** is published twelve times a year by the Materials Research Society (MRS) and is devoted to reports of original research and, on occasion, review articles. Its scope encompasses all aspects of materials research, including the preparation, processing, characterization, properties, and theoretical description of materials with new or unusual structure and properties.

**JMR Abstracts** is also published monthly by MRS and is received by all members of the Society. It provides a listing of preliminary titles and abstracts tentatively scheduled to appear in the corresponding issue of *Journal of Materials Research* and precedes publication of *Journal of Materials Research* by several weeks.

**Manuscripts** for publication should be submitted in quadruplicate to one of the following JMR offices:

- Dr. Walter L. Brown, Editor in Chief, *Journal of Materials Research*, c/o Materials Research Society, 9800 McKnight Road, Pittsburgh, PA 15237; telephone (412) 367-9111; fax (412) 367-4373.
- Professor Shigeyuki Sōmiya, Associate Editor, *Journal of Materials Research*, c/o The Nishi Tokyo University, 3-7-19 Seijo, Setagaya, Tokyo 157, Japan; telephone 81-3-3417-2866; fax 81-3-3415-6619.
- Dr. Werner Lutze, Associate Editor, *Journal of Materials Research*, c/o Kernforschungszentrum Karlsruhe, Postfach 3640, D-7500 Karlsruhe, Germany; telephone 49-7247-824457; fax 49-7247-823927.

Information for contributors may be found in the January issue. Submission of a manuscript is a representation that the manuscript has not been published previously nor is currently submitted for publication elsewhere. Upon receipt of a manuscript, the Editor or Associate Editor will send to the author a *Transfer of Copyright Agreement form*. This must be completed by the author prior to publication of an accepted paper in *Journal of Materials Research*. This written transfer of copyright is necessary under the 1978 U.S. copyright law in order for the MRS to continue disseminating research results as widely as possible.

**Abstracts** should be indexed according to three metrics. A *materials index* provides classification according to the specific material(s) considered in the manuscript. A *topical keyword listing* affords a suitable topical classification of the manuscript. The optional *Physics and Astronomy Classification Scheme (PACS)* index categories yield machine searchable labels compatible with the physics literature. A description of all three classification metrics may be obtained from the Journal's Editorial Office or Associate Editors.

**Publication charge:** To support the cost of wide dissemination of research results through publication of journal pages and production of a data base of articles, the author's institution is requested to pay a page charge of \$95 per page (with a one-page minimum). The charge (if honored) entitles the author to 100 free reprints. For Errata, the minimum page charge is \$15 with no free reprints.

**Manuscripts** must be in English, typewritten, double-spaced on one side of the page, on 8½ × 11 in. durable, opaque, white paper. An original and three (3) copies must be submitted. Authors are expected to follow the conventional writing, notation, and illustration style prescribed in the American Institute of Physics *Style Manual*, which is available prepaid from the AIP, 335 East 45th Street, New York, NY 10017. Authors should also study the form and style of printed material in this journal. SI units should be used.

**Proofs of Articles** will be sent to the author for review and should be returned promptly as instructed. Reference must be made to title, author, and scheduled date of issue. A few alterations in proof are unavoidable, but the cost of making extensive alterations or of correcting mistakes caused by careless preparation of the manuscript will be charged to the author. Corrected proofs that are not returned punctually may result in a delay in publication of the paper.

**Copyright © 1992, Materials Research Society.** Individual readers of this journal, and nonprofit libraries acting for them, are freely permitted to make fair use of the materials in it, such as to copy an article for use in teaching or research. (For other copying, see "Copying Fees.")

Permission is granted to quote from this journal in scientific works with the customary acknowledgment of the source. To reprint a figure, table, or other excerpt requires, in addition, the written consent of one of the original authors and notification of MRS. Reproduction or systematic or multiple reproduction of any material in this journal (including abstracts) is permitted only under license from MRS; in addition, MRS may require that permission also be obtained from one of the authors. Address inquiries and notices to the Editorial Office, *Journal of Materials Research*, Materials Research Society, 9800 McKnight Road, Pittsburgh, PA 15237; telephone (412) 367-9111; fax (412) 367-4373.

## Journal of Materials Research Subscription Prices (1992)

	U.S.A. and Poss.	Foreign	Add for Optional Air Freight
MRS Regular and Student Members	\$ 35.00	35.00	50.00
Members of AIP and Affiliate Societies	\$ 60.00	80.00	50.00
Nonmembers	\$350.00	375.00	50.00

### Back-number price, single copy:

MRS Members \$20.00; Nonmembers \$60.00

## JMR Abstracts Subscription Prices (1992)

	U.S.A. and Poss.	Foreign (Includes Air Freight)
MRS Regular and Student Members		On membership
Members of AIP and Affiliate Societies	\$20.00	30.00
Nonmembers	\$50.00	60.00
Nonmembers also subscribing to <i>Journal of Materials Research</i>	\$25.00	25.00

### Back-number price, single copy:

MRS members and nonmembers \$5.00

*Journal of Materials Research* (ISSN: 0884-2914) is published twelve times a year by the Materials Research Society, 9800 McKnight Road, Pittsburgh, PA 15237. Second Class postage paid at Pittsburgh, PA and additional mailing offices. POSTMASTER: Send address changes to *Journal of Materials Research*, c/o Materials Research Society, 9800 McKnight Road, Pittsburgh, PA 15237.

**Subscriptions, renewals, address changes, and single-copy orders** should be addressed to Subscription Fulfillment, *Journal of Materials Research*, Materials Research Society, 9800 McKnight Road, Pittsburgh, PA 15237; telephone (412) 367-3003; fax (412) 367-4373. Allow at least six weeks advance notice. For address changes, please send both old and new addresses and, if possible, include a mailing label from the wrapper of a recent issue. Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue's actual date of publication; otherwise, the issue may be purchased at the single-copy price.

**Reprints** of individual articles in *Journal of Materials Research* may be ordered singly at \$15.00 per article copy (postage included) for articles up to 20 pages. Beyond 20 pages, there is a surcharge of \$0.30 per page. Air mail delivery is available. Send orders to Reprints, *Journal of Materials Research*, Materials Research Society, 9800 McKnight Road, Pittsburgh, PA 15237.

**Copying fees:** Additional copies of articles in *Journal of Materials Research* made beyond the free copying permitted under the 1978 U.S. copyright law may be made at \$1.75 per article. (See also the statement under "Copyright" elsewhere in this journal.) This fee can be paid to the Materials Research Society through the *Copyright Clearance Center, Inc.*, 27 Congress Street, Salem, MA 01970.

**Microfilm subscriptions** of complete volumes of *Journal of Materials Research* are available on 16 mm and 35 mm. The Journal also appears in *Sec. 1 of Current Physics Microfilm (CPM)* along with other journals published by the American Institute of Physics and its member societies. A *Microfilm Catalog* is available upon request. *Journal of Materials Research* is indexed quarterly in *Current Physics Index*, a subject and author index (with abstracts) to all journals published by AIP and its member societies. Back volumes of this publication are also available in 16 mm microfilm, 35 mm microfilm, or 105 mm microfiche through *University Microfilms Inc.*, 300 North Zeeb Road, Ann Arbor, MI 48106.

**Individual member subscriptions are for personal use only.**

## COMMUNICATIONS

- 1-4 **The development of high fracture toughness  $\text{YBa}_2\text{Cu}_3\text{O}_{7-x}/\text{Ag}$  composites**

Long S. Yeou, Kenneth W. White

## ARTICLES

- 5-10 **Crystal growth of  $\text{YBa}_2\text{Cu}_4\text{O}_8$  and  $\text{Y}_2\text{Ba}_4\text{Cu}_7\text{O}_{15}$  under high oxygen pressure**

Takayuki Miyatake,  
Tsutomu Takata, Koji Yamaguchi,  
Kenshi Takamuku,  
Naoki Koshizuka, Shoji Tanaka,  
Kazuyuki Shibutani,  
Seiji Hayashi, Rikuo Ogawa,  
Yoshio Kawate

- 11-15 **Magnetization properties of solution-spun Y-Ba-Cu-O filament**

Tomoko Goto, Takaaki Sugishita

- 16-23 **Growth mechanism of  $\text{YBa}_2\text{Cu}_3\text{O}_y$  superconductors prepared by the horizontal Bridgman method**

Teruo Izumi, Yuh Shiohara

- 24-28 **Solid solutions in the  $\text{Ba}_2\text{Y}_{1-x}\text{Cu}_x\text{WO}_{6-y}$  system**

A. Garcia-Ruiz, Bokhimi,  
M. Portilla

- 29-33 **Heteroepitaxial growth of  $\text{DyBa}_2\text{Cu}_3\text{O}_{7-x}/\text{Dy}_2\text{O}_3$  multilayers analyzed by TEM**

Y. J. Zhang, K. M. Beauchamp,  
B. R. Johnson, T. Wang,  
A. M. Goldman, M. L. Mecartney

- 34-37 **Mechanical strength of hot-pressed Bi-Pb-Sr-Ca-Cu-O superconductor**

Norimitsu Murayama,  
Yasuharu Kodama,  
Shuji Sakaguchi, Fumihiro Wakai

- 38-42 **The effect of oxygen partial pressure on the formation of  $(\text{Bi, Pb})_2\text{Sr}_2\text{Ca}_2\text{Cu}_3\text{O}_{10-x}$**

Wen Zhu, Patrick S. Nicholson

- 43-47 **Characterization of Pb- and Ca-doped  $\text{Bi}_{2+x}\text{Sr}_{2-x}\text{CuO}_{6+\delta}$**

D. C. Sinclair, J. T. S. Irvine,  
A. R. West

- 48-52 **Effect of oxygen absorption on superconducting properties of  $\text{BiSrCaCu}_2\text{Al}_{0.5}\text{O}_x$  glass-ceramics**

Kazumi Hirata, Yukio Kubo,  
Yoshihiro Abe

- 53-61 **Coherent orientation relationship among various quasicrystalline and crystalline phases in rapidly solidified  $\text{Al}_{78}\text{Mn}_{20}\text{Ge}_2$  alloy**

N. P. Lalla, R. S. Tiwari,  
O. N. Srivastava

- 62-67 **NMR studies on amorphous, icosahedral, and crystalline phases**

T. Shinohara, A. P. Tsai,  
T. Masumoto

- 68-79 **Effect of stoichiometry on the structural properties and the electronic structure of intermetallics: Anti-phase boundary energies in FeAl and NiAl**

T. Hong, A. J. Freeman

- 80-84 **Infrared spectra of oxide films on SUS430 stainless steel formed at temperatures between 473 and 1073 K**

Katsuya Honda, Tooru Atake,  
Yasutoshi Saito

- 85-88 **Metastable phases formed in Fe-Cu-Si multilayered films by ion irradiation**

B. X. Liu, C. H. Shang, C. H. Liu

- 89-99 **Phase formation and stability in sputter deposited Be-Nb compounds**

J. L. Brimhall, L. A. Charlot,  
S. M. Bruemmer

- 100-104 **Visible luminescence from particles on surfaces: Evidence of de-excitation of Rydberg matter**

C. Åman, J. B. C. Pettersson,  
H. Lindroth, L. Holmlid

(Continued)

- 105–116 **The interfacial structure and composition of diamond films grown on various substrates** C. P. Sung, H. C. Shih
- 117–123 **Temperature and pressure dependence of the conductivity anisotropy of unidirectional short carbon fiber filled polymers** F. Carmona, A. El Amarti
- 124–129 **Thermal effects of scanning speed and constitutional supercooling during zone-melting recrystallization of silicon-on-insulator structures** Sharon M. Yoon, Ioannis N. Miaoulis
- 130–135 **Lattice site for transition and rare-earth impurities in  $\text{LiNbO}_3$  by ion-beam methods** L. Rebouta, J. C. Soares, M. F. da Silva, J. A. Sanz-García, E. Dieguez, F. Agulló-López
- 136–147 **CVD  $\text{Si}_3\text{N}_4$  on single crystal SiC: Part I. Characterization and orientation relationship at the interface** O. Unal, J. J. Petrovic, T. E. Mitchell
- 148–163 **Synthesis and characterization of SiC whiskers** L. Wang, H. Wada, L. F. Allard
- 164–169 **Spectroscopic studies of the structure of amorphous and microcrystalline SiC prepared by the polymer route** S.-J. Ting, C.-J. Chu, J. D. Mackenzie
- 170–177 **On the constrained crystallization of synthetic anorthite ( $\text{CaO} \cdot \text{Al}_2\text{O}_3 \cdot 2\text{SiO}_2$ )** Nitin P. Pature, Helen M. Chan
- 178–184 **Structure, mechanical, and tribological properties of titanium implanted alumina** S. M. M. Ramos, B. Canut, L. Gea, P. Thevenard, M. Bauer, Y. Maheo, Ph. Kapsa, J. L. Loubet
- 185–191 **Anticorrosion coating of the walls of metal pipes by digital growth of aluminum oxide** Koji Sugioka, Jia-Fa Fan, Koichi Toyoda, Hiromichi Waki, Hiroshi Takai
- 192–196 **Effects of heating rate on sintering of alkoxide-derived  $\text{BaTi}_5\text{O}_{11}$  powder** Toshimi Fukui, Chihiro Sakurai, Masahiko Okuyama
- 197–202 **TEM studies of microstructure and composition of low-firing lead-magnesium-niobate ceramics** S. Yegnasubramanian, H. C. Ling
- 203–213 **Finite element simulation of exfoliation experiments** Gerald L. Nutt
- 214–218 **Melting behavior of  $\text{Sn}_x(\text{SiO}_2)_{100-x}$  granular metal films** K. M. Unruh, B. M. Patterson, S. I. Shah
- 219–223 **Effect of processing on the optical scattering of  $\text{AlF}_3$ -based glasses** T. Iqbal, M. R. Shahriari, G. H. Sigel, Jr., A. E. Neeves, W. A. Reed
- 224–228 **Structural and vibrational investigations of thermal properties of tellurite glasses** Raouf El-Mallawany
- 229–234 **Spectroscopic investigation of disorder and crystallite formation in conductive films synthesized from aromatic polyimide** D. Xu, X. L. Xu, S. C. Zou
- COMMENTARIES AND REVIEWS**
- 235–252 **Prospects for device implementation of wide band gap semiconductors** J. H. Edgar

# CONTENTS BY TOPIC

This table of contents is a topical listing of the articles contained in each issue. The topics are arranged in alphabetical order so that papers dealing with the same subjects are grouped together. Each article may be listed under a maximum of three topics. There will be a cumulative topical listing in the last issue of each volume.

<b>Adhesion</b>	Finite element simulation of exfoliation experiments . . . . .	Gerald L. Nutt	203
<b>Alloys, intermetallic</b>	Coherent orientation relationship among various quasicrystalline and crystalline phases in rapidly solidified $Al_{78}Mn_{20}Ge_2$ alloy . . . . .	N. P. Lalla <i>et al.</i>	53
	NMR studies on amorphous, icosahedral, and crystalline phases . . . . .	T. Shinohara <i>et al.</i>	62
	Effect of stoichiometry on the structural properties and the electronic structure of intermetallics: Anti-phase boundary energies in FeAl and NiAl . . . . .	T. Hong <i>et al.</i>	68
	Infrared spectra of oxide films on SUS430 stainless steel formed at temperatures between 473 and 1073 K . . . . .	Katsuya Honda <i>et al.</i>	80
	Metastable phases formed in Fe–Cu–Si multilayered films by ion irradiation . . . . .	B. X. Liu <i>et al.</i>	85
	Phase formation and stability in sputter deposited Be–Nb compounds . . . . .	J. L. Brimhall <i>et al.</i>	89
<b>Ceramics</b>	Solid solutions in the $Ba_2Y_{1-x}Cu_xWO_{6-y}$ system . . . . .	A. García-Ruiz <i>et al.</i>	24
	CVD $Si_3N_4$ on single crystal SiC: Part I. Characterization and orientation relationship at the interface . . . . .	O. Unal <i>et al.</i>	136
	Synthesis and characterization of SiC whiskers . . . . .	L. Wang <i>et al.</i>	148
	Spectroscopic studies of the structure of amorphous and microcrystalline SiC prepared by the polymer route . . . . .	S.-J. Ting <i>et al.</i>	164
	Structure, mechanical, and tribological properties of titanium implanted alumina . . . . .	S. M. M. Ramos <i>et al.</i>	178
	Effects of heating rate on sintering of alkoxide-derived $BaTi_5O_{11}$ powder . . . . .	Toshimi Fukui <i>et al.</i>	192
	TEM studies of microstructure and composition of low-firing lead-magnesium-niobate ceramics . . . . .	S. Yegnasubramanian <i>et al.</i>	197
<b>Chemical substitution</b>	Characterization of Pb- and Ca-doped $Bi_{2+x}Sr_{2-x}CuO_{6+\delta}$ . . . . .	D. C. Sinclair <i>et al.</i>	43
<b>Chemical synthesis</b>	Synthesis and characterization of SiC whiskers . . . . .	L. Wang <i>et al.</i>	148
	Anticorrosion coating of the walls of metal pipes by digital growth of aluminum oxide . . . . .	Koji Sugioka <i>et al.</i>	185
<b>Chemical vapor deposition (CVD)</b>	The interfacial structure and composition of diamond films grown on various substrates . . . . .	C. P. Sung <i>et al.</i>	105
	CVD $Si_3N_4$ on single crystal SiC: Part I. Characterization and orientation relationship at the interface . . . . .	O. Unal <i>et al.</i>	136
	Prospects for device implementation of wide band gap semiconductors . . . . .	J. H. Edgar	235
<b>Coating</b>	Anticorrosion coating of the walls of metal pipes by digital growth of aluminum oxide . . . . .	Koji Sugioka <i>et al.</i>	185
<b>Composites</b>	Temperature and pressure dependence of the conductivity anisotropy of unidirectional short carbon fiber filled polymers . . . . .	F. Carmona <i>et al.</i>	117
	Melting behavior of $Sn_x(SiO_2)_{100-x}$ granular metal films . . . . .	K. M. Unruh <i>et al.</i>	214
<b>Compound semiconductors</b>	Prospects for device implementation of wide band gap semiconductors . . . . .	J. H. Edgar	235
<b>Computer simulation</b>	Finite element simulation of exfoliation experiments . . . . .	Gerald L. Nutt	203
<b>Corrosion</b>	Infrared spectra of oxide films on SUS430 stainless steel formed at temperatures between 473 and 1073 K . . . . .	Katsuya Honda <i>et al.</i>	80
	Anticorrosion coating of the walls of metal pipes by digital growth of aluminum oxide . . . . .	Koji Sugioka <i>et al.</i>	185
<b>Crystal (single)</b>	Crystal growth of $YBa_2Cu_4O_8$ and $Y_2Ba_4Cu_7O_{15}$ under high oxygen pressure . . . . .	Takayuki Miyatake <i>et al.</i>	5
<b>Crystal growth</b>	Growth mechanism of $YBa_2Cu_3O_y$ superconductors prepared by the horizontal Bridgman method . . . . .	Teruo Izumi <i>et al.</i>	16
<b>Crystallographic structure</b>	Solid solutions in the $Ba_2Y_{1-x}Cu_xWO_{6-y}$ system . . . . .	A. García-Ruiz <i>et al.</i>	24
	Characterization of Pb- and Ca-doped $Bi_{2+x}Sr_{2-x}CuO_{6+\delta}$ . . . . .	D. C. Sinclair <i>et al.</i>	43
	Coherent orientation relationship among various quasicrystalline and crystalline phases in rapidly solidified $Al_{78}Mn_{20}Ge_2$ alloy . . . . .	N. P. Lalla <i>et al.</i>	53
	The interfacial structure and composition of diamond films grown on various substrates . . . . .	C. P. Sung <i>et al.</i>	105
	Structure, mechanical, and tribological properties of titanium implanted alumina . . . . .	S. M. M. Ramos <i>et al.</i>	178
