
Books received

- Molecular Evolution of Life*. Edited by Herrick Baltscheffsky, Hans Jornvall and Rudolf Rigler. Cambridge University Press. 1986. 375 pages. £40.00; US \$69.50. H/c ISBN 0 521 33642 2.
- Clay Minerals and the Origin of Life*. Edited by A. G. Cairns-Smith and H. Hartman. Cambridge University Press. 1986. 193 pages. £19.50 (\$34.50). H/c ISBN 0 521 32408 4.
- Oncogenes and Growth Control*. Edited by Patricia Kahn and Thomas Graf. Springer-Verlag. 1986. 369 pages. DM 148. H/c ISBN 3 540 16839 7.
- Methodology in Medical Genetics*. By Alan E. H. Emery. Churchill Livingstone. 1986. 197 pages. £24. ISBN 0 443 03509 1.
- Lampbrush Chromosomes*. By H. G. Callan. Springer-Verlag. 1986. 254 pages. H/c DM 228. ISBN 3 540 16430 8.
- Differentiation of Protoplasts and of Transformed Plant Cells*. Edited by J. Reinert and H. Binding. Springer-Verlag. 1986. 180 pages. H/c DM 98. ISBN 3 540 16539 8.
- Germline – Soma Differentiation*. Edited by W. Hennig. Springer-Verlag. 1986. 220 pages. H/c DM 98. ISBN 3 540 16635 1.
- Bacterial Chromatin*. Edited by C. O. Gualerzi and C. L. Pon. Springer-Verlag. 1986. 250 pages. H/c DM 153. ISBN 3 540 16607 6.
- Satellite DNA*. By T. Beridze. Springer-Verlag. 1986. 150 pages. H/c DM 148. ISBN 3 540 15876 6.
