

CAMBRIDGE

New and Forthcoming Titles in Plasma Physics

Forthcoming...

Physics of Radio-Frequency Plasmas

PASCAL CHABERT AND NICHOLAS BRAITHWAITE

Contents

1. Introduction; 2. Plasma dynamics and equilibrium;
3. Bounded plasmas; 4. Radiofrequency sheaths;
5. Single frequency capacitively-coupled plasmas;
6. Multi-frequency capacitively-coupled plasmas;
7. Inductively-coupled plasmas; 8. Helicon plasmas;
9. Real plasmas; 10. Electrical measurements; Index.

\$85.00: Hb: 978-0-521-76300-4: 350 pp.

Principles of Plasma Physics for Engineers and Scientists

UMRAN S. INAN AND MAREK GOŁKOWSKI

“This new book provides an excellent summary of the basic processes occurring in plasmas together with a comprehensive introduction to the mathematical formulation of fluid (MHD) and kinetic theory. It provides an excellent introduction to the subject suitable for senior undergraduate students or entry-level graduate students.”

—Richard M. Thorne, University of California at Los Angeles

\$99.00: Hb: 978-0-521-19372-6: 288 pp.

Modern Plasma Physics

Volume 1: Physical Kinetics of Turbulent Plasmas

PATRICK H. DIAMOND, SANAE-I. ITOH, AND KIMITAKA ITOH

Contents

1. Introduction; 2. Conceptual foundations; 3. Quasi-linear theory; 4. Nonlinear wave-particle interaction; 5. Kinetics of nonlinear wave-wave interaction; 6. Closure theory; 7. Disparate scale interactions; 8. Cascades, structures and transport in phase space turbulence; 9. MHD turbulence; Appendixes; References; Index.

\$130.00: Hb: 978-0-521-86920-1: 434 pp.

Prices subject to change.

Advanced Magnetohydrodynamics

With Applications to Laboratory and Astrophysical Plasmas

J. P. GOEDBLOED, RONY KEPPENS, AND STEFAAN POEDTS

\$190.00: Hb: 978-0-521-87957-6: 656 pp.

\$94.99: Pb: 978-0-521-70524-0

The Plasma Universe

CURT SUPLEE

“*The Plasma Universe* is a lively, compact, beautifully illustrated and eminently readable exposition of the amazing scope of modern plasma physics. The common phenomena underlying plasma TV's sunspots and the violent death of stars are lucidly explained at level suitable for a broad audience. I particularly liked the one-page profiles of the scientists who shaped the subject, starting with Irving Langmuir, that are sprinkled throughout the text: they provide welcome historical context and human interest.”

—Curtis Callen, Professor of Physics, Princeton University, and President-Elect, American Physical Society

\$20.99: Pb: 978-0-521-51927-4: 88 pp.

EDITED BY CAROLUS J. SCHRIJVER
AND GEORGE L. SISCOE

Heliophysics: Plasma Physics of the Local Cosmos

\$63.00: Hb: 978-0-521-11061-7: 446 pp.

Heliophysics: Space Storms and Radiation: Causes and Effects

\$75.00: Hb: 978-0-521-76051-5: 460 pp.

Heliophysics: Evolving Solar Activity and the Climates of Space and Earth

\$75.00: Hb: 978-0-521-11294-9: 510 pp.

Heliophysics 3 Volume Set

\$200.00: 3 Hb books: 978-1-107-00040-7: 1,438 pp.

Instructions for Authors

Editorial policy The journal welcomes submissions in any of the areas of plasma physics. Its scope includes experimental and theoretical work on basic plasma physics, the plasma physics of magnetic and inertial fusion, laser–plasma interactions, industrial plasmas, plasma devices and plasmas in space and astrophysics. This list is, of course, merely illustrative of the wide range of topics on which papers are invited, and is not intended to exclude any aspect of plasma physics that is not explicitly mentioned.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers. Manuscripts must be written in English. *Journal of Plasma Physics* employs a rigorous peer-review process whereby all submitted manuscripts are sent to recognized experts in their subjects for evaluation. The Editors' decision on the suitability of a manuscript for publication is final.

Submission of manuscripts Papers may be submitted to the Editor or any of the Associate Editors, preferably by email in pdf format. When a paper is accepted, the authors will be asked to supply source files in LaTeX or Word. Instructions for the preparation of these files and LaTeX style files are given in the Instructions for Contributors link at journals.cambridge.org/pla.

Incremental publishing and DOIs In order to make articles which have been accepted for publication in *Journal of Plasma Physics* available as quickly as possible, they are now published incrementally online (at Cambridge Journals Online; journals.cambridge.org) The online version is available as soon as author corrections have been completed and before the article appears in a printed issue. A reference is added to the first page of the article in the journal catchline. This is the DOI – Digital Object Identifier. This is a global publishers' standard. A unique DOI number is created for each published item. It can be used for citation purposes instead of volume, issue and page numbers. It therefore suits the early citation of articles which are published on the web before they have appeared in a printed issue. See journals.cambridge.org/pla.

Proof reading Only typographical or factual errors may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints Corresponding authors will receive a PDF of their article upon publication. Print offprints may be purchased from the publisher if ordered at first proof stage.

Copying This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/2010 \$16.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF PLASMA PHYSICS

VOLUME 77 • PART 1 • FEBRUARY 2011

Main Articles

- Fusion yield: Guderley model and Tsallis statistics
H. J. Haubold and D. Kumar 1
- Further research of the collisional instability. An extensive study of growth and a notable influence of the boundaries
C. L. Xaplanteris 15
- The Harris sheet in a dusty plasma
Samuel A. Lazerson 31
- Polarization effect of a chirped Gaussian laser pulse on the electron bunch acceleration
F. Sohbatzadeh and H. Aki 39
- Alfvén simple waves
G. M. Webb, G. P. Zank, R. H. Burrows and R. E. Ratkiewicz 51
- The dust ion acoustic waves propagation in collisional dusty plasmas with dust charge fluctuations: Effect of ion loss and ionization
S. K. El-Labany, M. Shalaby, E. F. El-Shamy and M. A. Khaled 95
- Macroscopic electromagnetic stress tensor for ionized media
Robert W. Johnson 107
- Plasma effects in electromagnetic field interaction with biological tissue
R. P. Sharma, Karuna Batra and Peter S. Excell 117
- Dust ion-acoustic solitary waves in a magnetized dusty electronegative plasma
M. G. M. Anowar, K. S. Ashrafi and A. A. Mamun 133
