

ANNOUNCEMENT

Index-Catalogue of Medical and Veterinary Zoology Available On-Line

The Index-Catalogue of Medical and Veterinary Zoology (ICMVZ) indexes the world's literature on parasites of animals and man which includes parasitic protozoa, helminths, and certain parasitic arthropods such as ticks, mites, insects, copepods, isopods, linguatulids, and rhizocephalids. ICMVZ has become a subfile of AGRICOLA (Agricultural On-Line Access), the cataloging and indexing database of the National Agricultural Library. AGRICOLA is File 10 of DIALOG. After accessing File 10, Index-Catalogue records can be searched separately by requesting SF = PAR (meaning Subfile = Parasitology). Records can be searched by author, title, parasite, host, subject headings, words appearing in the subheading (index phrases), geographic terms, and journal title. There is also linkage between parasite and host names within each record. For information on accessing the AGRICOLA database write or call: Lockheed Information Systems, 900 17th Street NW, Washington, D.C. 20006, Telephone: (202) 872-5971.
