Key words: Depression, Elderly, Depressive symptom disparity, Chinese, Decomposition analysis, Corrigendum

The above article (Yuan *et al.*, 2023) published with the following errors.

On the third page of the article, left-hand column, the second sentence in the section “Depressive symptoms” currently reads “Responses are rated on a 4-point scale from 0 (less than one day) to 4 (5–7 days).” The corrected sentence should read “Responses are rated on a 4-point scale from 0 (rarely or none of the time) to 3 (all of the time).”

On the third page of the article, right-hand column, the second sentence in the section “Demographic characteristics” currently reads “BMI was calculated by dividing weight (kg) by the square of height (m) and was divided into four categories: <18.5, 18.5–23.9, 24.0–27.9, and >28.0.” The corrected sentence should read “BMI was calculated by dividing weight (kg) by the square of height (m) and was divided into four categories: <18.5, 18.5–23.9, 24.0–27.9, and >28.0.”

In Figure 2, the labeling for the odds ratio (95%CI) for urban sleep time is incorrect. The corrected figure appears in next page.

The authors apologize for these errors.
