Aims and Scope

The disciplines of economics and philosophy each possess their own special analytical methods, the combination of which is powerful and fruitful. *Economics and Philosophy* seeks to promote the mutual enrichment of the two disciplines by publishing high-quality original research in all contemporary areas linking them, as well as relevant book reviews. *Economics and Philosophy* only publishes articles that engage with issues that are of interest to both economists and philosophers.

Topics include, but are not limited to, the foundations of rational or behavioural decision theory and game theory, the nature of rationality in general, issues at the intersection of economics with moral, political, and social philosophy, experimental research on economics and philosophy, and the philosophy and methodology of economics. Articles that employ mathematics must be written in such a way that they are accessible to readers with limited formal training. *Economics and Philosophy* does not publish historical or text-interpretive work unless it makes a contribution to current debates about economics and philosophy.

Journal Information

Further information about *Economics and Philosophy*, including instructions for preparing and submitting an article may be found by visiting <http://journals.cambridge.org/eap>. The journal only publishes articles in English. Unsolicited book reviews and critical notices are not considered. Publishers may send information about books for possible review to the Book Review Editor at econphilreviews@gmail.com.
