

AIMS AND SCOPE

International Journal of Astrobiology publishes original papers and review articles on Astrobiology Science. News of interest to the astrobiology community and book reviews will also feature. Contact one of the editors if you have questions regarding suitability of a subject area, news submission or book review.

The fields covered include:

- * Cosmic prebiotic chemistry
- * Planetary evolution
- * Search for planetary systems and habitable zones
- * Origins, evolution and distribution of life
- * Extremophile biology and experimental simulation of extraterrestrial environments
- * Life detection in our solar system and beyond
- * Technologies and space missions for astrobiology, and planetary protection
- * Human expansion, ecosystems beyond Earth and terraforming
- * Ecosystems beyond Earth
- * Intelligent life and societal aspects of astrobiology

There are no page charges or length restrictions. All articles are submitted to peer-review.

SUBMISSION OF MANUSCRIPTS

Contributions for consideration for publication should be submitted via our online website at http://mc.manuscriptcentral.com/submit_ija

During the submission process authors will be asked to select an appropriate Editor for their paper. Areas of interest for the Editors are as follows:

Dr. Simon Mitton – General Papers, Philosophy, Astronomy

Dr. Rocco Mancinelli – Extremophiles, Microbiology, Nitrogen Cycling

Dr. Frances Westall – Origin of Life in a Geological Context, Search for Life on Mars, Biosignatures of Early Earth Sediments.

The *initial* submission should preferably be in Word or PDF format. If your paper is accepted you will need to submit a Word document with illustrations as separate eps or tif files. LateX files can also be accepted for the final version; however a PDF must also be supplied for printing.

For papers with high resolution figures or micrographs please *also* submit a hard copy version – in colour if appropriate. Black and White halftones and colour illustrations have to be scanned at a high resolution (minimum 300dpi). For very large files contact our production department for further instruction.

Please consult our full Instructions for Contributors at journals.cambridge.org/ija

International Journal of Astrobiology

Volume 9 Issue 1 January 2010

CONTENTS

Research papers

- 1 **Jupiter – friend or foe? III: the Oort cloud comets**
J. Horner, B. W. Jones & J. Chambers
- 11 **The Cyborg Astrobiologist: testing a novelty detection algorithm on two mobile exploration systems at Rivas Vaciamadrid in Spain and at the Mars Desert Research Station in Utah**
P. C. McGuire, C. Gross, L. Wendt, A. Bonnici, V. Souza-Egipsy, J. Ormö, E. Díaz-Martínez, B. H. Foing, R. Bose, S. Walter, M. Oesker, J. Ontrup, R. Haschke & H. Ritter
- 29 **Evidence for biodegradation products in the interstellar medium**
Kani Rauf & Chandra Wickramasinghe
- 35 **Microstructure and elemental composition of the Tagish Lake meteorite and its astrobiological implications**
Kani Rauf, Anthony Hann & Chandra Wickramasinghe
- 45 **The three types of liquid water in the surface of present Mars**
D. Möhlmann
- 51 **Growth of microorganisms in Martian-like shallow subsurface conditions: laboratory modelling**
A. K. Pavlov, V. N. Shelegedin, M. A. Vdovina & A. A. Pavlov
- 59 **Cultivation and molecular monitoring of halophilic microorganisms inhabiting an extreme environment presented by a salt-attacked monument**
Jörg Ettenauer, Katja Sterflinger & Guadalupe Piñar
