Giles of Rome and the Medieval Theory of Conception

M. ANTHONY HEWSON

A detailed discussion of Giles' *De formatione corporis humani in utero*, the treatise written about 1276 and among the first scientifically inspired studies of embryology. Giles deals both with physiological questions and with theoretical and philosophical aspects of conception and animation, supporting Aristotelian against Galenic views. An account of Giles' eventful life and of the wide currency of his work among medieval writers is included.

3 plates £10.00

Modern Methods in the History of Medicine

edited by EDWIN CLARKE

'A welcome addition to the literature of medical history which should be in the hands of all those interested in the subject.' *Journal of the History of Medicine* £7.00
