## Year 2000 Health Objectives

Dr. C. Glen Mayhall will represent SHEA at the upcoming invitational conference being convened by the Secretary of Health and Human Services in Washington, D.C., September 6-7, to launch "Healthy People 2000: National Health Promotion and Disease Prevention Objectives."

Dr. Mayhall represented SHEA in October at the initial "Year 2000 Health Objectives Consortium Meeting" that provided a forum for public comment on the draft of the "Objectives" that had been formulated by the U.S. Public Health Service. A summary of Dr. Mayhall's comments was reported in the February *Newsletter*.

## SHEA Annual Meeting

The annual SHEA luncheon meeting will be held in Atlanta, Georgia on Tuesday, October 23, 1990 during the Interscience Conference on Antimicrobial Agents and Chemotherapy (ICAAC). Please plan to attend. Look for

further details with your SHEA ballot and in the September issue of the *Newsletter*.

## SHEA Elections

If you are a member of SHEA and do not receive the ballot for the upcoming SHEA election by August 31, please contact the SHEA Secretary, Dr. William Martone, Centers for Disease Control, Bldg. 1, Mailstop C-10, Room 5065, 1600 Clifton Road, NE, Atlanta, GA 30333.

## Position Paper Committee

Dr. C. Glen Mayhall reports the following activities of the SHEA Position Paper Committee. First, the joint SHEA/APIC task force that is preparing a position paper on the human immunodeficiency virus-(HIV) infected healthcare worker is in the process of finalizing its recommendations. Second, the SHEA task force on medical waste disposal is being reformulated, and guidelines are still in

the works. Finally, a task force has been named to prepare a position paper on surveillance for surgical wound infections under Dr. Robert Sherertz, chair.

## Oral Hygiene Irrigation Device-Related Tuberculosis

Many an "exposure list" has been generated by hospital admission of a patient with unrecognized pulmonary tuberculosis. It appears that we may now have to worry about communicability from soft tissue infections with tuberculosis as well. Hutton, Stead and associates reported in a recent issue of the *Journal of Infectious Diseases* (1990;161:286-295) that nine cases of pulmonary tuberculosis and 59 skin test conversions occurred among personnel exposed to a patient hospitalized with a large tuberculous abscess of the hip and thigh. The authors postulate that high concentrations of *Mycobacterium tuberculosis* in the abscess, aggressive irritation of the abscess cavity with an oral hygiene water irrigation device and the positive air pressure in the patient's room
