AGRONOMY JOURNAL

This official organ of the American Society of Agronomy is now a bi-monthly publication of up-to-date reports of general agronomic research. (It alternates with *Crop Science*, which carries reports of a more technical nature in crop breeding, genetics, and physiology.) Workers in the fields of forages and pastures, crop improvement, cultural practices, soil fertility, and allied areas of investigation will find articles of lasting interest in *Agronomy Journal*. Publication is open to members of the American Society of Agronomy.

To collect Airborne Spores use the Hirst Spore Trap

by

**CASELLA
LONDON**

Continuous samples of airborne spores can be taken in the open in almost every type of weather with the Hirst Spore Trap. Developed by Dr J. M. Hirst of the Plant Pathology Department, Rothamsted, the instrument will catch spores over a wide range of sizes, and provide data on rapid changes in the composition of air-spora. It is of particular interest to agricultural research workers for investigating plant diseases spread by airborne spores and to Allergists for tracing spores and pollen in the atmosphere.
