Aeolian silt contribution to soils on mountain slopes (Mt. Ślęza, southwest Poland) – ERRATUM

Jaroslav Waroszewski, Tobias Sprafke, Cezary Kabala, Elżbieta Musztyfaga, Beata Łabaz, Przemysław Woźniczka

DOI: <https://doi.org/10.1017/qua.2017.76>, Published by Cambridge University Press, 23 October 2017.

In Waroszewski *et al.* (2017), Figures 2, 3, and 4 appeared out of order and with the incorrect corresponding captions. The article has been corrected to rectify these errors. The corrections are as follows:

The figure originally appearing on page 6 and labeled as Figure 2 with the caption, “Detailed morphology of studied soil profiles including recognition of different parent materials and soil stratification” should have appeared on page 8 as Figure 3 with the caption, “Plot of Hf vs. Zr, comparing silt loam substrates with underlying materials. Standard for Upper Continental Crust was taken from Taylor and McLennan (1985).”

The figure originally appearing on page 8 and labeled as Figure 3 with the caption, “Depth plots of selected basic (grain size distribution, Ph, and LOI) and geochemical (Hf, Zr, and TiO₂) properties in studied soil profiles” should have appeared on page 10 as Figure 4 with the caption, “Detailed morphology of studied soil profiles including recognition of different parent materials and soil stratification.”

The figure originally appearing on page 10 and labeled as Figure 4 with the caption, “Plot of Hf vs. Zr, comparing silt loam substrates with underlying materials. Standard for Upper Continental Crust was taken from Taylor and McLennan (1985)” should have appeared on page 6 as Figure 2 with the caption, “Depth plots of selected basic (grain size distribution, Ph, and LOI) and geochemical (Hf, Zr, and TiO₂) properties in studied soil profiles.”

Additionally, in-text citations to several figures have been corrected. On page 5, paragraph 1, the reference to Fig. 3 has been updated to Fig. 2; on page 5, paragraph 3, the reference to Fig. 2 and 3 has been updated to Fig. 4; on page 8, paragraph 4, the reference to Fig. 3 has been updated to Fig. 2; and on page 9, paragraph 6, the reference to Fig. 4 has been updated to Fig. 3 and the reference to Fig. 2 has been updated to Fig. 4. The publisher apologizes for these errors.
