Expert Reviews in Molecular Medicine

Published in association with the Centre for Applied Research
in Educational Technologies (CARET)

Editor

Andrea Bowden, Centre for Applied Research in Educational Technologies, Cambridge,
UK

Carolyn Elliss, Centre for Applied Research in Educational Technologies, Cambridge, UK

Expert Reviews in Molecular Medicine is an exciting online journal featuring high-quality reviews of the latest developments in this fast-growing field. Coverage includes gene therapy, immunotherapeutics, drug design, vaccines, genetic testing, pathogenesis, epidemiology, genomics, diagnostics and techniques. Reviews are published continually on the website. The journal's innovative functionality allows viewers to access not only the review articles, but also fully abstracted references, figures, photographs, tables, animations and molecular models. *Expert Reviews in Molecular Medicine* will be of interest to biomedical researchers, clinicians and students, as well as researchers in the pharmaceutical and biotechnology industries.

CAMBRIDGE
UNIVERSITY PRESS

Instructions for Contributors

Zygote is an international journal dedicated to the rapid publication of original research in early embryology. It covers interdisciplinary studies on gametogenesis through fertilization to gastrulation in animals and humans. The scope has been expanded to include clinical papers, molecular and developmental genetics. While the editors will favour work describing fundamental processes in the cellular and molecular mechanisms of animal development, and, in particular, the identification of unifying principles in biology, new technologies, review articles, debates and letters will become a prominent feature.

Subjects covered include gametogenesis, sperm–oocyte interaction, gamete and embryo physiology, cell polarity, cell–cell interactions, nuclear transfer, haploidization, molecular and developmental genetics, in-vitro fertilization, stem cell and cryoconservation technologies.

To submit a manuscript, please email a complete copy, including figures and illustrations to:

- Brian Dale, Editor-in-Chief, *Zygote*, Centre for Reproductive Biology, Italy.
Email: brian.dale@virgilio.it or to
- Jacques Cohen, North American Editor, *Zygote*, Tyho-Galileo Research Laboratories, 3 Regent Street, Suite 301, Livingston, NJ 07039, USA
Email: jc@embryos.net or to
- Professor Norio Suzuki, Asian Pacific Editor, *Zygote*, Department of Biological Science, Hokkaido University, Japan.
Email: medaka-s@kdp.biglobe.ne.jp

Submission of a paper will be taken to imply that it is unpublished and it is not being considered for publication elsewhere. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper.

There is no formal restriction on length; however, original articles and reviews of less than 15000 words are likely to appear sooner than longer ones. Short communications should not exceed 1500 words and News and Views Commentaries 500 words.

Preparation of manuscripts

Manuscripts should be organised as follows: Title page (with full names and addresses of all authors, a running headline of up to 35 characters, and a contact address with telephone number and email address), an Abstract

of not more than 250 words followed by 5 Keywords, Introduction, Materials and Methods, Results, Discussion (combined Results and Discussion may be used for short papers), Acknowledgements, References, Endnotes, Tables and Figure Legends.

Manuscripts should be prepared using SI units

Figures

Figures should be numbered consecutively as they appear in the text. Any indication of features of special interest should also be included. Figures must be supplied electronically. They must be saved at final publication size and supplied in the following file formats: halftone figures (black & white, and colour) as TIF files at 300 dpi; black & white line figures as TIF or EPS files at 800 – 1200 dpi. When relevant, photographs should be submitted with proposed reduction or magnification indicated, when relevant, by a scale line on or beside, the illustration. The places for insertion into the text should be indicated in the text as 'Fig. 1' etc. Legends for all illustrations should be typed together, separately from the main text. A charge of £500 per figure will be made for colour photograph reproduction and printing.

Tables

Tables with concise headings should be placed at the end of the paper. Each table must have a text reference, in the form 'Table 1' etc.

References

References should be cited in the text as Conklin (1905) showed or as shown (Conklin, 1905). For papers with three or more authors use et al. A full list of references in alphabetical order should be given at the end of the text: surname of author and initials; year of publication (in parentheses); title of paper; journal or book name (the former being abbreviated in accordance with the World List of Scientific Periodicals); volume number; first and last page of the reference. For books and conference proceedings, place of publication and publisher (and editor(s) if appropriate) should be included.

Proofs

Proofs will be sent to the author for checking. Typographical or factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints

A PDF offprint of each article will be supplied free to each first named author. Paper offprints may be purchased from the publisher if ordered at proof stage.

ZYGOTE

The Biology of Gametes and Early Embryos

CONTENTS

ORIGINAL ARTICLES

Post-thaw culture in presence of insulin-like growth factor I improves the quality of cattle cryopreserved embryos

Makarevich, A. V., Kubovičová, E., Hegedušová, Z., Pivko, J. & Louda, F. 97

Ultrastructural changes of sheep cumulus–oocyte complexes following different methods of vitrification

Ebrahimi, B., Valojerdi, M. R., Eftekhari-Yazdi, P. & Baharvand, H. 103

Effects of different cryopreservation methods on post-thaw culture conditions of *in vitro* produced bovine embryos

Nicacio, A. C., Simões, R., de Paula-Lopes, F. F., de Barros, F. R. O., Peres, M. A., D'Avila Assumpção, M. E. O. & Visintin, J. A. 117

Post-hatching development of bovine embryos *in vitro*: the effects of tunnel preparation and gender

Machado, G. M., Caixeta, E. S., Lucci, C. M., Rumpf, R., Franco, M. M. & Dode, M. A. N. 123

Effect of oocyte-secreted factors on porcine *in vitro* maturation, cumulus expansion and developmental competence of parthenotes

Gomez, Ma. N. L., Kang, J. T., Koo, O. J., Kim, S. J., Kwon, D. K., Park, S. J., Atikuzzaman, M., Hong, S. G., Jang, G. & Lee, B. C. 135

Expression of ZO-1 and occludin at mRNA and protein level during preimplantation development of the pig parthenogenetic diploids

Xu, S., Lee, J. & Miyake, M. 147

Participation of the 39-kDa glycoprotein (gp39) of the vitelline envelope of *Bufo arenarum* eggs in sperm–egg interaction

Barrera, D., Llanos, R. J. & Miceli, D. C. 159

Autologous embryo–cumulus cells co-culture and blastocyst transfer in repeated implantation failures: a collaborative prospective randomized study

Benkhalifa, M., Demirel, A., Sari, T., Balashova, E., Tsouroukaki, M., Giakoumakis, Y. & Gurgan, T. 173

Secretion profiles from *in vitro* cultured follicles, isolated from fresh prepubertal and adult mouse ovaries or frozen–thawed prepubertal mouse ovaries

Dorphan, B., Prades-Borio, M., Anastacio, A., Rojat, P., Coussieu, C. & Poirot, C. 181

Okadaic acid-sensitive phosphatase is related to MII/G1 transition in mouse oocytes

Moride, N., Kuwahara, A., Sutoh, A., Tanaka, Y., Mukai, Y., Yamashita, M., Matsuzaki, T., Yasui, T. & Irahara, M. 193

Effect of melatonin treatment on the developmental potential of parthenogenetic and somatic cell nuclear-transferred porcine oocytes *in vitro*

Nakan, M., Kato, Y. & Tsunoda, Y. 199
