

# AUTISM '82

In October 1972 the first three-day International Conference on Autism was held in Christchurch – "The Autistic Child in Society – a blueprint for services".

Since then much has been achieved but there still remains a great deal to be done. Autism remains a baffling yet fascinating condition; we do not fully understand its causes but we have learned a great deal about its effects!

A Conference is to be held from 5th to 7th November 1982 at Pontin's, Wick Ferry, Christchurch, Dorset. Well-known specialists from various disciplines will speak on diagnosis, assessment, education, language development, family support and future prospects. There will be a section devoted to the International scene.

Accommodation £40 plus Conference Fee of £25.

Day Attendance £10 per day.

*Application and enquiries* (s.a.e. please):–

The Conference Organiser,  
Portfield School,  
14 Stour Road, Christchurch, Dorset, BH23 1PS.

**Symposium on Psychiatric Prevention,  
organized by the Center for Mental Health,  
Athens, December 1979**

In 18 contributions, this volume evaluates a diverse range of biological and social approaches currently applied in efforts to prevent psychiatric disorders. Both historical reviews and original reports are included.

Several papers focus on the prevention or maintenance therapy of specific clinical conditions. These include psychiatric disturbances following gynecologic operations, the post-traumatic syndrome, recurrent schizophrenia, and tardive dyskinesia. Also discussed are common side-effects with neuroleptics, sleep deprivation psychoprophylaxis, and use of tricyclic antidepressants in relapsing depressive illness. Other papers consider more general problems, such as suicide prevention, occupational rehabilitation, genetic counseling, and the importance of parents' reactions to their mentally retarded children. Of particular interest are three reports on lithium treatment, where original research is presented to evaluate the applications, efficacy, and side-effects of this therapy.

Many of the authors will be recognized as pioneer researchers in the field of preventive psychiatry.

## Instructions to Authors

1. **Submission.** Articles, written in English and not submitted for publication elsewhere, may be sent to any one of the following editors: *Dr Ray Hodgson, Addiction Research Unit, Institute of Psychiatry, Denmark Hill, London SE5 8AF, U.K.*; *Dr William Yule, Psychology Department, Institute of Psychiatry, De Crespigny Park, London SE5 8AF, U.K.*; *Dr G. Terence Wilson, Graduate School of Applied and Professional Psychology, Rutgers University, Busch Campus, P.O. Box 819, Piscataway, New Jersey 08854, U.S.A.*

Manuscripts will be sent out for review exactly as submitted. Authors who want a blind review should mark two copies of their article "review copy" omitting from these copies details of authorship.

2. **Manuscript preparation.** Articles must be typed double-spaced throughout on standard sized paper (preferably A4) allowing good margins all round. Three copies must be submitted, and the author should retain a further copy. Original figures must be supplied at the time of submission.

*Abbreviations* where used must be standard. The *Système Internationale (SI)* should be used for all units: where metric units are used the SI equivalent must also be given. Probability values and power statistics should be given with statistic values and degrees of freedom [e.g.  $F(1,34) = 123.07, P < 0.001$ ], but such information should preferably be included in tables rather than the main text.

*Spelling* must be consistent within an article, either using British usage (*The Shorter Oxford English Dictionary*), or American usage (*Webster's New Collegiate Dictionary*). However, spelling in the list of references must be literal to each original publication.

Details of style not specified here may be determined by reference to the *Publication Manual of the American Psychological Association* or the *Style Manual for Biological Journals*.

Articles should conform to the following scheme:

(a) *Title page.* The title should phrase concisely the major issues. Author(s) to be given with departmental affiliations and addresses, grouped appropriately. A running head of no more than 40 characters should be indicated.

(b) *Summary.* This should summarize the article in no more than 200 words.

(c) *Text.* This should begin with an introduction, succinctly introducing the point of the paper to those interested in the general area of the journal. References within the text should be given in the form Jones and Smith (1973). Three or more authors should be given as Williams *et al.* (1973). Authors of the same surname should be distinguished by their initials. The approximate positions of tables and figures should be indicated in the text. Footnotes should be avoided where possible.

(d) *Reference note(s).* A list of all cited unpublished or limited circulation material, numbered in order of appearance in the text, giving as much information as possible about extant manuscripts.

(e) *References.* All citations in the text should be listed in strict alphabetical order according to surnames. Multiple references to the same author should be listed chronologically, using a, b, etc., for entries within the same year. Formats for journal articles, books and chapters should follow these examples:

BECKER, M. R. and GREEN, L. W. (1975). A family approach to compliance with medical treatment: A selective review of the literature. *International Journal of Health Education* 18, 173–182.

THORP, R. G. and WETZEL, R. J. (1969). *Behaviour Modification in the Natural Environment*. New York: Academic Press.

ROSKIES, E. and LAZARUS, R. S. (1980). Coping theory and the teaching of coping skills. In *Behavioural Medicine: Changing Health Lifestyles*. P. O. Davidson and S. M. Davidson (Eds), New York: Brunner/Mazel.

(f) *Footnotes.* The first, and preferably only, footnote will appear at the foot of the first page of each article, and subsequently may acknowledge previous unpublished presentation (e.g. dissertation, meeting paper), financial support, scholarly or technical assistance, or a change in affiliation. Its concluding (or only) paragraph must be the name and full mailing address of the author to whom reprint requests or other inquires should be sent.

(g) *Tables.* Tables should be numbered and given explanatory titles.

(h) *Figure captions.* Numbered captions should be typed on a separate page.

(i) *Figures.* Original drawings or prints must be submitted for each line or half-tone illustration. Figures should be clearly labelled.

3. **Proofs, Reprints and Copyright.** Proofs of accepted articles will be sent to authors for the correction of printers' errors; author's alterations may be charged. Authors submitting a manuscript do so on the understanding that if it is accepted for publication exclusive copyright in the paper shall be assigned to the Society. In consideration of the assignment of copyright, 25 copies of each paper will be supplied. Further reprints may be ordered at extra cost; the copyright assignment form and the reprint order form will be sent with the proofs. The publishers will not put any limitation on the personal freedom of the author to use material contained in the paper in other works.
