British Journal of Nutrition
Volume 108, 2012 ISSN: 0007-1145

**Publishing, Production, Marketing, and
Subscription Sales Office:**

Cambridge University Press
The Edinburgh Building
Shaftesbury Road
Cambridge CB2 8RU, UK

For Customers in North America:

Cambridge University Press
Journals Fulfillment Department
100 Brook Hill Drive
West Nyack
New York 10994-2133
USA

Publisher: Katy Christomanou

Special sales and supplements:

This Journal accepts relevant advertisements and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplements on behalf of academic and corporate collaborators. Please contact Sarah Maddox at the Cambridge address for further details. E-mail: special_sales@cambridge.org

Subscription information:

British Journal of Nutrition is an international journal published by Cambridge University Press on behalf of The Nutrition Society. The twelve issues starting January 2012 comprise Volume 107, the twelve issues starting July 2012 comprise Volume 108.

Annual subscription rates:

Volumes 107/108 (24 issues):
Internet/print package £1113/\$2169/€1782
Internet only: £877/\$1710/€1401
Print only: £1060/\$2067/€1723

Any **supplements** to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back volumes are available. Please contact Cambridge University Press for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six

months of publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections to *British Journal of Nutrition*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

Directions to Contributors are available from the Society at the address below or can be found on the Society's website at <http://www.nutritionociety.org> (an abbreviated Notes for Authors can be found inside the back cover).

Offprints: The author (or main author) of an accepted paper will receive a copy of the PDF file and a voucher copy of the issue in which their paper has been published. There will be an option to purchase paper offprints, these should be ordered at proof stage. No page charges are levied by this journal.

Copyright: As of 1 July 2000 the copyright of all articles submitted to *British Journal of Nutrition* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, Hammersmith, London W6 7NJ, UK.

Disclaimer: The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from or is based upon sources believed by us to be reliable, but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk. Neither the Society nor Cambridge University Press accepts responsibility for any trade advertisement included in this publication.

This journal is printed on acid-free paper from renewable sources. Printed in the UK by Bell & Bain Ltd., Glasgow.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

British Journal of Nutrition is covered in Current Contents®/Agriculture, Biology & Environmental Sciences, SciSearch®, Research Alert®, Current Contents®/Life Sciences, Index Medicus® (MEDLINE®), AGRICOLA®, CAB Abstracts™, Global Health, BIOSIS® Database, EMBASE/Excerpta Medica and Elsevier BIOBASE/Current Awareness in Biological Sciences, CINAHL, and Chemical Abstracts Service.

Preface	
Dietary protein for human health. <i>P. J. Moughan</i>	S1–S2

Section One: Protein and amino acid requirements, amino acid scoring patterns and the assessment of dietary protein and amino acid adequacy in developing countries

Identifying recommended dietary allowances for protein and amino acids: a critique of the 2007 WHO/FAO/UNU report. <i>D. J. Millward</i>	S3–S21
Recent advances in determining protein and amino acid requirements in humans. <i>R. Elango, R. O. Ball & P. B. Pencharz</i>	S22–S30
Amino acid scoring patterns for protein quality assessment. <i>D. J. Millward</i>	S31–S43
Amino acid requirements in children and the elderly population. <i>R. R. Pillai & A. V. Kurpad</i>	S44–S49
Protein intakes in India. <i>S. Swaminathan, M. Vaz & A. V. Kurpad</i>	S50–S58
Available lysine and digestible amino acid contents of proteinaceous foods of India. <i>S. M. Rutherford, K. Bains & P. J. Moughan</i>	S59–S68
Dietary protein quality and malnutrition in Africa. <i>H. C. Schönfeldt & N. G. Hall</i>	S69–S76
Assessment of protein adequacy in developing countries: quality matters. <i>S. Ghosh, D. Suri & R. Uauy</i>	S77–S87

Section Two: Specific metabolic roles of amino acids, and the paradigm of optimal, as opposed to minimal dietary protein and amino acid requirements for performance, long-term health and optimal organ function.

The role of dietary protein in optimizing muscle mass, function and health outcomes in older individuals. <i>R. R. Wolfe</i>	S88–S93
New perspectives in the control of body protein metabolism. <i>M. A. McNurlan</i>	S94–S104
Dietary protein – its role in satiety, energetics, weight loss and health. <i>M. S. Westerterp-Plantenga, S. G. Lemmens & K. R. Westerterp</i>	S105–S112
The metabolism of “surplus” amino acids. <i>D. A. Bender</i>	S113–S121
Effects of a high protein diet on body weight and comorbidities associated with obesity. <i>P. Clifton</i>	S122–S129
The role of high-protein diets in body weight management and health. <i>L. Te Morenga & J. Mann</i>	S130–S138
Role of specific dietary amino acids in clinical conditions. <i>R. Jonker, M. P. K. J. Engelen & N. E. P. Deutz</i>	S139–S148
Food proteins as a source of bioactive peptides with diverse functions. <i>K. J. Rutherford-Markwick</i>	S149–S157
Dietary protein requirements and adaptive advantages in athletes. <i>S. M. Phillips</i>	S158–S167

Section Three: Dietary protein quality assessment: Amino acid analysis, determination of amino acid digestibility and availability for humans and implications to the Protein Digestibility Corrected Amino Acid Score (PDCAAS).

Background on international activities on protein quality assessment of foods. <i>G. S. Gilani</i>	S168–S182
Protein quality evaluation twenty years after the introduction of the protein digestibility corrected amino acid score method. <i>J. Boye, R. Wijesinha-Bettoni & B. Burlingame</i>	S183–S211
The regulation of protein content and quality in national and international food standards. <i>J. L. Lewis</i>	S212–S221
Criteria and markers for protein quality assessment – a review. <i>D. Tome</i>	S222–S229
Standardised methods for amino acid analysis of food. <i>D. E. Otter</i>	S230–S237
Determination of protein and amino acid digestibility in foods including implications of gut microbial amino acid synthesis. <i>M. Fuller</i>	S238–S246
Ileal and faecal protein digestibility measurement in humans and other non-ruminants – a comparative species view. <i>W. H. Hendriks, J. van Baal & G. Bosch</i>	S247–S257
Gut luminal endogenous protein: Implications for the determination of ileal amino acid digestibility in humans. <i>P. J. Moughan & S. M. Rutherford</i>	S258–S263
Evidence for validity of ileal digestibility coefficients in monogastrics. <i>D. Columbus & C. F. M. de Lange</i>	S264–S272
Animal models for determining amino acid digestibility in humans – a review. <i>A. Deglaire & P. J. Moughan</i>	S273–S281
<i>In vitro</i> determination of dietary protein and amino acid digestibility for humans. <i>C. A. Butts, J. A. Monro & P. J. Moughan</i>	S282–S287
Aspects of physical and chemical alterations to proteins during food processing – some implications for nutrition. <i>J. A. Gerrard, M. Lasse, J. Cottam, J. P. Healy, S. E. Fayle, I. Rasiah, P. K. Brown, S. Md. BinYasir, K. H. Sutton & N. G. Larsen</i>	S288–S297
Available versus digestible dietary amino acids. <i>S. M. Rutherford & P. J. Moughan</i>	S298–S305
Available versus digestible amino acids – new stable isotope methods. <i>R. Elango, C. Levesque, R. O. Ball & P. B. Pencharz</i>	S306–S314
Impact of Antinutritional Factors in Food Proteins on the Digestibility of Protein and the Bioavailability of Amino Acids and on Protein Quality. <i>G. Sarwar Gilani, C. Wu Xiao & K. A. Cockell</i>	S315–S332
Advantages and limitations of the protein digestibility-corrected amino acid score (PDCAAS) as a method for evaluating protein quality in human diets. <i>G. Schaafsma</i>	S333–S336
