

Directions to Contributors - Concise Version

The *British Journal of Nutrition* publishes original papers, review articles, technical notes and short communications in English in all branches of nutrition. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. For further information on how the technical content of your paper should be presented please see the **Directions to Contributors** as reproduced in the first issue of a recent volume of *The British Journal of Nutrition* (January or July), or contact the Editorial Office on +44 (0)171 371 6225 (telephone) or +44 (0)171 602 1756 (fax).

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors.

Contributors of accepted articles will be asked to assign their copyright, on certain conditions, to The Nutrition Society to help protect their material.

Page format. The *British Journal of Nutrition* is printed in single-column format (column width of 135mm) with a text area of 135 x 203 mm.

Text. Papers should be typed, on one side of the paper only, with double line spacing and ample margins (at least 1.5 cm) on each side and with no underlining or bold in text except for scientific names. Draft-quality print from a word-processor is not acceptable. Standard abbreviations (e.g. Fig. and Figs) and SI units must be used. **When a paper has been accepted, word-processed text stored on floppy disk is encouraged, providing the software is IBM/DOS compatible, but floppy disks must be accompanied by a hard copy. This will enable papers to be handled rapidly, and with fewer typesetting errors.**

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words. A short title of up to 45 characters should be provided as a running head.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) on the title page of the typescripts.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must fit conveniently into single-column or landscape (if absolutely necessary) format. Table captions should be typed on a separate sheet.

Illustrations. Copies only of artwork should be submitted. The original illustrations should accompany the paper after acceptance and revision. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they are a real contribution to the text. Figure captions should be typed on a separate sheet and numbered corresponding to the relevant Figures.

References. References must be based on the name and year (Harvard) system; **give full journal titles** and conform to the following styles:

Bingham, S. A. & Cummings J. H. (1985). Urine nitrogen as an independent validity measure of dietary intake: a study of nitrogen balance in individuals consuming their normal diet. *American Journal of Clinical Nutrition* 42, 1276-1289.

Haraldsdottir, J. (1989). Dietary history. In *Manual on Methodology for Food Consumption Studies*, pp. 88-92 [M. E. Cameron and W. A. van Staveren, editors]. Oxford: Oxford University Press.

Underwood, E.J. (1977). *Trace Elements in Human and Animal Nutrition*, 5th ed. New York: Academic Press.

Citation of authors in the text should appear in the form: Polaszek (1990) or (Polaszek, 1990). More than one author should be cited in chronological order as: (Holloway *et al.* 1987; Walker & Huddleston, 1988).

Proofs. Two sets of page proofs will be provided to authors for checking; one set should be returned as promptly as possible to Dr I.E. Sambrook, Executive Editor, The British Journal of Nutrition, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Manuscripts. Four complete copies of the manuscript and artwork should be submitted to:

Dr Keith N Frayn
Chairman of the Editorial Board
The British Journal of Nutrition
The Nutrition Society
10 Cambridge Court
210 Shepherds Bush Road
London W6 7NJ
UK

Vol. 78 No. 2 August 1997

Contents

Guest Editorial

- Incorporation of *n*-3 polyunsaturated fatty acids into processed foods.
M. J. Gibney 193–195

Invited Commentary

- How important is breakfast?
Peter J. Rogers 197–198

Review Article

- Breakfast: a review of associations with measures of dietary intake, physiology and biochemistry.
C. H. S. Ruxton & T. R. Kirk 199–213

Short Communication

- The effect of ingestion of inulin on blood lipids and gastrointestinal symptoms in healthy females.
Annette Pedersen, Brittmari Sandström & Johan M. M. Van Amelsvoort 215–222

Human and Clinical Nutrition

- Use of manufactured foods enriched with fish oils as a means of increasing long-chain *n*-3 polyunsaturated fatty acid intake.
J. A. Lovegrove, C. N. Brooks, M. C. Murphy, B. J. Gould & C. M. Williams 223–236

Animal Nutrition

- Influence of foliage from African multipurpose trees on activity of rumen protozoa and bacteria.
C. J. Newbold, S. M. El Hassan, J. Wang, M. E. Ortega & R. J. Wallace 237–249
- Weaning marginally affects glucose transporter (GLUT4) expression in calf muscles and adipose tissues.
Jean-Françoise Hocquette, Carole Castiglia-Delavaud, Benoît Graulet, Pascal Ferré, Brigitte Picard & Michel Vernorel 251–271
- Protein utilization during energy undernutrition in sheep sustained by intragastric infusion. Effect of body fatness on the protein metabolism of energy-restricted sheep.
S. A. Chowdhury, E. R. Ørskov, F. D. DeB. Hovell, J. R. Scaife & G. Mollison 273–282
- Broiler chicken body weights, feed intakes, plasma lipid and small-intestinal bile acid concentrations in response to feeding of chitosan and pectin.
A. Razdan, D. Pettersson & J. Pettersson 283–291

General Nutrition

- Effect of orally administered glutathione on glutathione levels in some organs of rats: role of specific transporters.
Fabio Favilli, Patrizia Marraccini, Teresa Iantomasi & Maria T. Vincenzini 293–300
- Postprandial lipaemia is exacerbated in fat-cholesterol-fed rabbits: relationship to atheroma deposition.
Christine Juhel, Christophe Dubois, Michele Senft, Emile Levy, Huguette Lafont & Denis Lairon 301–311
- Compared effects of three oligosaccharides on metabolism of intestinal microflora in rats inoculated with a human faecal flora.
Zakia Djouzi & Claude Andrieux 313–324
- Pancreatic and extra-pancreatic effects of the traditional anti-diabetic plant, *Medicago sativa* (lucerne).
Alison M. Gray & Peter R. Flatt 325–334
- Effect of food products on endogenous generation of *N*-nitrosamines in rats.
V. K. Atanasova-Goranova, P. I. Dimova & G. T. Pevicharova 335–345
