TESCAN S9000X

Ultimate resolution and maximum throughput in physical failure analysis of semiconductor devices and material microanalysis

- ✓ **Extremely large cross-section:**
New iFIB+™ Xe plasma FIB with high currents up to 2 μ A and unmatched FoV of 1 mm redefines conventional large-area cross-sectioning and dramatically decreases sample preparation time.
- ✓ **Extended imaging capabilities:**
Next generation Triglav SEM column with improved and optimized in-beam detection system, and extending imaging capabilities, that now include energy-filtering BSE signal collection for ultimate surface sensitivity in sample characterization.
- ✓ **Applications easier than ever:**
New Tescan Essence™ software platform offers a simplified, user-friendly and customizable interface for effortless and maximum control in all applications, regardless the user skill level.
