

# Aquatic and Other Ecological Systems

**J. Overbeck**, Max-Planck-Institute for Limnology, Plön; **R.J. Chrost**, University of Warsaw (Eds.)

## Aquatic Microbial Ecology

*Biochemical and Molecular Approaches*

1990. X, 190 pp. 40 figs. 12 tabs. (Brock/Springer Series in Contemporary Bioscience)  
Hardcover DM 98,- ISBN 3-540-97222-6

**U. Sommer**, Max-Planck-Institute for Limnology, Plön (Ed.)

## Plankton Ecology

*Succession in Plankton Communities*

1989. X, 369 pp. 104 figs. 12 tabs. (Brock/Springer Series in Contemporary Bioscience)  
Hardcover DM 198,- ISBN 3-540-51373-6

**B.J. Javor**, University of California, San Diego, CA

## Hypersaline Environments

*Microbiology and Biogeochemistry*

1989. VIII, 328 pp. 40 figs. 55 tabs. (Brock/Springer Series in Contemporary Bioscience)  
Hardcover DM 138,- ISBN 3-540-50666-7

**M.M. Tilzer**, University of Konstanz;  
**C. Serruya**, Haifa (Eds.)

## Large Lakes

*Ecological Structure and Function*

1990. XVIII, 691 pp. 224 figs. 57 tabs. (Brock/Springer Series in Contemporary Bioscience)  
Hardcover DM 298,- ISBN 3-540-52103-8

**J.W. Moore**, Alberta Environmental Centre, Vegreville, Alta.

## Inorganic Contaminants of Surface Water

*Research and Monitoring Priorities*

1990. Approx. 395 pp. 13 figs. (Springer Series on Environmental Management) Hardcover DM 138,-  
ISBN 3-540-97281-1

*In preparation*

**A.V. Yablokov**, Moscow;

**S.A. Ostroumov**, University of Moscow

## Conservation of Living Nature and Resources

*Problems, Trends and Perspectives*

1991. Approx. 280 pp. 37 figs. 33 tabs. Hardcover  
ISBN 3-540-52096-1

Jadwiga Grabda **Marine Fish Parasitology** An Outline

With this book a comprehensive work on marine fish parasitology is finally available to marine scientists and research workers, the sea-going staff concerned with fish processing and students of fisheries and ichthyology. It makes an important and necessary contribution to the field since it summarizes in one fact-filled volume information that was previously largely scattered in the literature. The material covered ranges from identification of the fish parasites, their biology and life cycles to com-

mon invasion pathways and relationships within food chains. Emphasis is also placed on the economic effect of these parasites on the fish industry, as well as on the prevention of human infections.

1990. X, 296 pages with 145 figures.  
Hardcover. £ 53.00.  
ISBN 3-527-26898-7

## WORLD FISHERIES CONGRESS

14-19 April 1991 Athens, Greece

### Major Themes:

Condition of Major Aquatic Habitats  
Fisheries Resource Utilization & Policy  
Protection of Biotic Diversity  
International Development Projects  
Assessment Methodologies & Fisheries Management  
Role of Aquaculture in World Fisheries  
Other Fisheries Science Topics

### Registration Information available from:

World Fisheries Congress  
5410 Grosvenor Lane, Suite 110  
Bethesda, Maryland 20814, U.S.A.

Tel: (301) 897-8616  
Fax: 301 897 8096

Co-sponsored by 47 natural resource organizations worldwide.

*Cover:* The photograph on the outside of the cover was taken by David Nicholson at Pedney Beach, Cornwall.

*Inside covers:* Drawings of fish by Geoffrey W. Potts.

*Inside front cover:* John Dory, *Zeus faber* L. Maximum length 40 cm.

*Inside back cover:* Tompot blenny, *Parablennius gattorugine* L. Maximum length 20 cm.
