

GENERAL NOTES

THE Editors are anxious to improve the clinical aspect of the Journal and would welcome more reports of interesting cases. These clinical records need not be at all elaborate and it would be unnecessary to go minutely into the ætiology or the literature of the subject. Senior Registrars have unique opportunities for seeing a large variety of cases, many with unusual features. It is in many ways regrettable that these should go unrecorded. It is hoped that all those in charge of clinics will help us in this matter and see that such cases are not overlooked. It is important that all illustrations should have captions and also that the author's name should be written on the back.

ROYAL COLLEGE OF SURGEONS OF ENGLAND OTOLARYNGOLOGY LECTURES 1958-59

THE following lectures, arranged jointly by the Royal College of Surgeons of England and the Institute of Laryngology and Otology, will be delivered in the Lecture Hall of the College, at 5.30 p.m.

1958
