# AUTHOR INDEX FOR VOLUME 89

ABAWAJY, J., KELAREV, A. V., MILLER, M. and RYAN, J.; Incidence semirings of graphs and visible bases 451
ACCIARRI, C., SHUMYATSKY, P. and THILLAISUNDARAM, A.; Conciseness of coprime commutators in finite groups 252
AKBARI, S. and HEYDARI, F.; The regular graph of a noncommutative ring 132
AYAD, M., BELGHABA, K. and KIHEL, O.; On permutation binomials over finite fields 112
BALLESTER-BOLINCHES, A. and EZQUERRO, L. M.; On conjugacy of supplements of normal subgroups of finite groups 293
BALLESTER-BOLINCHES, A., BEIDLEMAN, J. C. and ESTEBAN-ROMERO, R.; Primitive subgroups and PST-groups 373
BANIČ, I. and SOVIČ, T.; Inverse limits in the category of compact Hausdorff spaces and upper semicontinuous functions 49
BARNES, D. W.; Character clusters for Lie algebra modules over a field of nonzero characteristic 234
BARRETO, A. P. and FONTENELE, F.; Some remarks on the Pigola–Rigoli–Setti version of the Omori–Yau maximum principle 337
BEIDLEMAN, J. C.; see BALLESTER-BOLINCHES, A. 373
BELGHABA, K.; see AYAD, M. 112
BHARANEDHAR, V. and PONNUSAMY, S.; Remarks on the univalence criterion of Pascu and Pascu 210
BONANNO, G., HEIDARKHANI, S. and O'REGAN, D.; Nontrivial solutions for Sturm–Liouville systems via a local minimum theorem for functionals 8
BOURGEOIS, G.; Property L and commuting exponentials in dimension at most three 70
BRZDĘK, J.; A hyperstability result for the Cauchy equation 33
CHAOPRAKNOI, S., PHONGPATTANACHAROEN, T. and RAWIWAN, P.; The natural partial order on some transformation semigroups 279
CHEN, Y.-G. and TANG, C.-E.; Improved upper bounds for odd multiperfect numbers 353
COSSEY, J.; Special maximal subgroups of $p$-groups 415
CRAVEN, T. C. and SMITH, T. L.; Symmetric algebras over rings and fields 466
CRIVEI, S.; Neat and coneat submodules of modules over commutative rings 343
DE FALCO, M., DE GIOVANNI, F., MUSELLA, C. and TRABELSI, N.; Groups whose proper subgroups of infinite rank have finite conjugacy classes 41
DE GIOVANNI, F., MARTUSCIELLO, M. and RAINONE, C.; Locally finite groups whose subgroups have finite normal oscillation 479
DE GIOVANNI, F.; see DE FALCO, M. 41
DENG, M. J.; A note on the Diophantine equation $(na)^x + (nb)^y = (nc)^z$ 316
DITTMER, S. J., KHURANA, D. and NIELSEN, P. P.; On a question of Hartwig and Luh 271
ELGINDY, K.; Gegenbauer collocation integration methods: advances in computational optimal control theory 168

## INFORMATION FOR AUTHORS

The *Bulletin of the Australian Mathematical Society* aims at quick publication of original research in all branches of mathematics. To ensure speedy publication, only articles which are sufficiently well presented, able to be published without revision, and which are judged by the Editor (often in consultation with an Associate Editor) to be competitive are refereed. This policy is in the interests of authors, as a quick rejection is better than a slow rejection. The *Bulletin* receives more than five times the material that can be published, therefore there are many commendable papers not accepted. Editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after peer review.

Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere. For a paper to be acceptable for publication, not only should it contain new and interesting results, but also

(i) the exposition should be clear and attractive, and
(ii) the manuscript should be in publishable form, without revision.

Further information regarding these requirements may be found through our website www.austms.org.au/Bulletin. Authors are asked to avoid, as far as possible, the use of mathematical symbols in the title.

Articles should be prepared in LaTeX using $\mathcal{A}_{\mathcal{M}}\mathcal{S}$-LaTeX packages and submitted as a PDF file via our journal management system, at www.austms.org.au/Publications/Submissions/BAustMS. This permits authors to track their papers through the editorial process. Recent versions of TeX are able to produce PDF files directly. A LaTeX class file for the *Bulletin* can be downloaded from the website. Authors who need assistance may email the secretary of the *Bulletin* at editor@bulletin.austms.org.au.

Authors are advised to keep copies of all files of the submitted article; the *Bulletin* will not accept responsibility for any loss.

## EDITORIAL POLICY

**1. References.** Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are in preparation or submitted. Where the work cited is not readily accessible (for example, a preprint) a copy of the article should be included with your submission.

**2. Abstracts.**

1. Each paper must include an abstract of not more than 150 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

**3. Subject Classification and Key Words.** Authors should include a few key words and phrases and one or more classification numbers, following the American Mathematical Society 2010 Mathematics Subject Classification for all codes. Details of this scheme can be found on the web at www.ams.org/msc.

**4. Abstracts of PhD Theses.** The *Bulletin* endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within six months of the degree being approved.

## Table of Contents

**Improved upper bounds for odd multiperfect numbers**
*Chen, Y.-G. & Tang, C.-E.* **353**

**Congruences modulo powers of 2 for Fu's 5 dots bracelet partitions**
*Xia, E. X. W. & Yao, O. X. M.* **360**

**Primitive subgroups and PST-groups**
*Ballester-Bolinches, A., Beidleman, J. C. & Esteban-Romero, R.* **373**

**Wiener index of trees of given order and diameter at most 6**
*Mukwembi, S. & Vetrík, T.* **379**

**Directional maximal operators and radial weights on the plane**
*Saito, H. & Tanaka, H.* **397**

**Special maximal subgroups of *p*-groups**
*Cossey, J.* **415**

**Constructing permutation polynomials over finite fields**
*Qin, X. & Hong, S.* **420**

**Counting symmetric bracelets**
*Zelenyuk, Y. & Zelenyuk, Y.* **431**

**Variations on a theorem of Davenport concerning abundant numbers**
*Jennings, E., Pollack, P. & Thompson, L.* **437**

**Incidence semirings of graphs and visible bases**
*Abawajy, J., Kelarev, A. V., Miller, M. & Ryan, J.* **451**

**Unique representation bi-basis for the integers**
*Xiong, R. & Tang, M.* **460**

**Symmetric algebras over rings and fields**
*Craven, T. C. & Smith, T. L.* **466**

**Arithmetic properties of 1-shell totally symmetric plane partitions**
*Hirschhorn, M. D. & Sellers, J. A.* **473**

**Locally finite groups whose subgroups have finite normal oscillation**
*de Giovanni, F., Martusciello, M. & Rainone, C.* **479**

**Backward 3-step extensions of recursively generated weighted shifts: a range of quadratic hyponormality**
*Exner, G. R., Jung, I. B., Lee, M. R. & Park, S. H.* **488**

**On a question of J. M. Rassias**
*Fechner, W.* **494**

**A note on the Polignac numbers**
*Pan, H.* **500**

**Finite higher commutators in associative rings**
*Lanski, C.* **503**

**A note on spaces with a strong rank 1-diagonal**
*Xuan, W.-F. & Shi, W.-X.* **510**

**Some new characterisations of finite *p*-supersoluble groups**
*Li, C., Yang, N. & Tang, N.* **514**

## Corrigendum/Erratum

**Correction to 'Conjugacy class size conditions which imply solvability'**
*Kong, Q. & Liu, Q.* **522**

**Correction to 'On the positivity of Riemann–Stieltjes integrals'**
*Lukkarinen, J. & Pakkanen, M. S.* **524**

**Author Index for Volume 89** **525**

**Cambridge Journals Online**
