ATHENAEUM, April 8, 1908.—“A complete monograph upon diphtheria, written by those who are able to speak with the greatest authority upon the subjects with which they have been entrusted by the editors...The mere enumeration of the writers is a sufficient guarantee of the excellence of the work, and of the authority which it carries; whilst the articles are written in clear and good English, free, for the most part, from the technical terms which make many treatises on bacteriology difficult and unprofitable to read. The articles are well harmonized, and the teaching in regard to difficult and debatable points is marked by moderation and common sense.”
