THE AMERICAN POLITICAL SCIENCE ASSOCIATION

PERSONNEL SERVICE

The American Political Science Association's Personnel Service operates as a clearinghouse, bringing together political scientists seeking positions and prospective employers. Registration in the service is open to members of the Association and to Political Science Departments. Membership in the Service, which includes a subscription to the monthly Newsletter, is \$6.00 per year. Membership in the Credential Referral Service of the Personnel Service is an additional \$8.00.

NEWSLETTER

A Newsletter, listing openings for political scientists including teaching, administrative and research openings, is mailed monthly to all Personnel Service members. Positions are listed by institution with a brief description of each opening.

CREDENTIAL REFERRAL SERVICE

A file will be maintained at the Association office for all members of the Credential Referral Service. This file will include a résumé, a dissertation abstract and/or a list of publications, and up to three letters of reference for each member. Referrals are made upon the request of a member or of an institution.

EMPLOYERS USING THE SERVICE

The Association's Council has adopted a policy that it is a professional obligation of all political science departments to list publicly all vacancies in the APSA Personnel Service Newsletter for which they are recruiting except those vacancies at the association and full professor levels which departments expect to fill from among people known to them. There is no cost to the institution listing its vacancies with the Service. Forms for listing openings in the Newsletter are available from the Personnel Service.

The International Political Science Association Invitation to Membership

The International Political Science Association welcomes political scientists as members. The Association, founded in 1949, is composed of three categories of members: individuals, institutions and national associations.

Membership in the Association of \$10.00 a year entitles members to receive the Newsletter giving information about IPSA activities and meetings; to purchase material published under IPSA auspices—including the International Bibliography of Political Science, published annually by Stevens in London and sets of papers submitted at IPSA meetings at reduced cost; and to register at IPSA meetings at lower rates.

Individual members who pay a higher membership fee of \$12.00 a year are, in addition, entitled to receive either the International Political Science Abstracts published quarterly by Basil Blackwell at Oxford or the International Social Science Journal, the quarterly organ of the Department of Social Sciences of UNESCO. To join the Association send your name and check to the International Political Science Association, 27 rue Saint-Guillaume, Paris 7e, France.

CHANGING YOUR ADDRESS?

If you are planning a move, please fill in the form below and return it to the American Political Science Association, 1527 New Hampshire Avenue, N.W., Washington, D.C. 20036. The Politics of Military Revolution in Korea

by Se-Jin Kim

Once a hermit kingdom in Asia, Korea has been the scene of cataclysmic political and military events in recent years. In this comprehensive study the author examines one of the greatest of these events—the military revolution of 1961. In doing so he makes an important contribution to the understanding of the role of the military in developing nations. *Se-Jin Kim is professor and chairman of the department of political science at North Carolina Central University.*

The Convention Problem: Issues in Reform of Presidential Nominating Procedures

Judith H. Parris

After the emotional frenzy of the 1964 Republican and 1968 Democratic conventions, many were convinced that something was seriously wrong with the system of nominating presidential candidates. Reformers urged more "fairness" and "democracy." This book assesses the desirability and likelihood of reform, with particular attention to apportioning votes, selecting delegates, decisionmaking, writing platforms, and handling news media coverage of the event. The volume is the third in the Studies in Presidential Selection series.

Financing Presidential Campaigns

Delmer D. Dunn

Rising costs of campaigning for public office, particularly those associated with the use of television, have been the subject of much discussion during the last several years. This book, the second in the Studies in Presidential Selection series, examines reform proposals aimed at controlling campaign financing. Focusing on the costs of campaigning for the presidency, the author investigates the sources of these increasing costs and examines the proposals advanced at the national level of government to control campaign expenditures. The author then offers his own recommendations about what action Congress should take to reform campaign financing.

Voting for President:

The Electoral College and the American Political System

Wallace S. Sayre and Judith H. Parris

The first volume in the Studies in Presidential Selection series, this book presents a comprehensive analysis of the existing electoral system and compares its results with the likely impact of four leading alternatives—the direct vote, the automatic plan, the district plan, and the proportional plan. Would these alternatives ensure the election of Presidents who more accurately represent the people's choice? Could the alternatives pose difficult new problems, while alleviating the known weaknesses of the present system? These are among the questions the authors examine in the light of recent political history, in particular the three-way presidential contest of 1968.

The State of Welfare

Gilbert Y. Steiner

For courses on American politics, urban politics, public policy, legislation, and contemporary problems, this widely adopted book is an inquiry into the politics of stability and change across the spectrum of federal relief programs. Among them are aid to families with dependent children, including careful examination of the proposed family assistance plan; food stamps; public housing; and veterans' pensions. The author examines this assortment of programs and concludes that reform strategies relying on presidential interest and intercessor groups such as the National Welfare Rights Organization and the American Legion are more effective than administrative reorganization, changes in congressional committee jurisdiction, and extended authorizations.

RESOURCES FOR SOCIAL CHANGE: Race in the United States

By James S. Coleman, *The Johns Hopkins University*

A volume in the Wiley Series in Urban Research, edited by Terry N. Clark

Resources for Social Change provides a systematic framework that aids in describing and implementing the process of gaining resources (power) among blacks in the United States. The author discusses theories of social change, how social change occurs, and various strategies of using resources for change.

"My use of the term 'power' here is not in the sense of power over another group but a position in society having as much power over one's own life and over community and national actions as other citizens."—James S. Coleman

A volume in *Comparative Studies in Behavioral Science: A Wiley Series* edited by Robert T. Holt and John E. Turner

"Differences in subjective culture are responsible for a good deal of intergroup conflict. In this book we hope to provide some concepts and new methodologies for its analysis and some insight into its relation to human conflict."—from the Preface

THE LOGIC OF COMPARATIVE SOCIAL INQUIRY

By Adam Przeworski, *Washington University, St. Louis* and Henry Teune, *University of Pennsylvania*

A volume in *Comparative Studies in Behavioral Science: A Wiley Series* edited by Robert T. Holt and John E. Turner

"The book gives to the reader both a discussion of some of the theoretical problems involved in comparative social inquiry, as well as a number of methodological proposals about how to conduct such inquiry. The book thus not only tells one "how to do it," but meritoriously takes pains to explain why one ought to do it in the proposed way. And the care with which this explanation is undertaken indicates that provincialism in American sociology will no longer be inviolate."—*Social Science*

PLANNING ON UNCERTAINTY Decision Making in Business and Government Administration

By Ruth P. Mack, *Institute of Public Administration*

Planning on Uncertainty provides a comprehensive view of administration involvement in the ongoing process of decision making. *How, where, and when* information is lacking during deliberative procedures is examined through decision problems ranging from simple inventory control to broad policy questions. The book provides a checklist of over fifty specific ways to keep the cost of uncertainty to a minimum.

WORLD COMMUNICATION: THREAT OR PROMISE? A Socio-technical Approach

By Colin Cherry, *Imperial College, University of London*

World Communication: Threat or Promise? examines the very nature of human communication through a global, social view of the communication process. In his treatment, the author attacks many popular beliefs about world communication such as "propaganda," language "take-over," the "evils" of T.V., and the "decline" of reading.

"The expression: 'this shrinking world' is a commonplace today but it is another deceptive one. The world is shrinking only in the sense that travel is much faster or that events in, say, Vietnam, are reported all over the world or seen on T.V. News Bulletins. . . ."

"On the contrary, in the sense of personal existence and experience, the world has vastly expanded. . . ."

Information Technology in a Democracy

Alan F. Westin, editor

Privacy invasion in a Technological Age?

Government agencies generate extensive data with computers and communications networks, analyze these data, and apply the output in a systematic manner to questions of public policy. What effect is this having on our social and political life? Some fifty distinguished contributors, ranging from enthusiastic proponents to harsh critics, capture here the great debate raging about the end-use of public technological systems.

*A MAJOR REVISION
OF ROBERT A. DAHL'S BASIC
AMERICAN GOVERNMENT TEXT
—NOW AVAILABLE IN PAPERBACK*

**DEMOCRACY IN THE UNITED STATES:
Promise and Performance
Second Edition**

Robert A. Dahl, Yale University

Democracy in the United States describes, explains, and evaluates the American political system in terms of its promise and performance. In Parts I and II, Professor Dahl asks the question, "What government is best?" The alternatives of Equality and Consent, Majority Rule Democracy, Rule by Elites, and Polyarchy are discussed and their various contributions to American democracy evaluated.

A greatly expanded section, Part III, is concerned with the design and actual performance of the major institutions of government. In direct response to users of the first edition, this section devotes one chapter to the design of each major governmental institution and another chapter to its performance. Institutions include the Presidency, the Congress, the Supreme Court, State and Local Government, and Political Parties.

Part IV of the second edition provides a framework for understanding conflict and conciliation in the American system and examines this process in historical perspective. Part V deals with political action, illustrating methods which an active citizen can use to influence the government and also analyzing prospects for success. The final chapter of the text evaluates the performance of the political system, as a whole, using the criteria of political equality and consent advanced in the opening portion of the second edition.

**MODERN WESTERN POLITICAL THOUGHT
From Machiavelli to Marx**

Dante Germino, University of Virginia

A critical analysis of leading writers and themes in modern Western political thought, from the sixteenth to the twentieth centuries. The text explores the intellectual roots of contemporary political ideas. The author challenges many widely held preconceptions about such modern political philosophers as Machiavelli, Hobbes, Locke, Rousseau, Hegel, and Marx.

Political Hysteria in America

THE DEMOCRATIC CAPACITY FOR REPRESSION

MURRAY B. LEVIN. America's traditional democratic consensus, says Professor Levin, has been maintained by effective manipulation and the exploitation of fear. Why, for example, did America embrace the hoax of a "Red Scare" after World War I? Professor Levin's answer touches on the power of secrets, the fear of alien conspiracies, and the disturbing insecurity which characterizes American liberal democracy. He concludes that under certain circumstances, another outburst of repression is a distinct possibility in contemporary America.

The Revolt Against the Masses

AND OTHER ESSAYS ON POLITICS AND PUBLIC POLICY

AARON WILDAVSKY. Dean Wildavsky has been one of the most creative thinkers in the new field of public policy analysis. But he is also much more—a democratic critic of the radical rhetoric of our age, which he sees as an essentially elitist "revolt against the masses." In this exciting book, consisting of 26 of his most important articles, public policy analysis and political criticism merge to provide an original perspective on the American political system. "Highly recommended."—*Library Journal*

Supreme Courts in State Politics

AN INVESTIGATION OF THE JUDICIAL ROLE

HENRY ROBERT GLICK. "Concentrating his analysis on the state supreme courts in Pennsylvania, New Jersey, Louisiana, and Massachusetts, Glick discusses not only the judicial process in these states but also examines the relationship between that process and the different political settings in each state. He also explores the judicial role perceptions of the various supreme court justices and then analyzes the relation between these perceptions and the judicial 'output' of the courts. Glick is unusually well qualified to undertake this analysis."—*Choice*

Sovereignty at Bay

THE MULTINATIONAL SPREAD OF U.S. ENTERPRISES

RAYMOND VERNON. Is the power of the large multinational U.S. enterprises "excessive"? Are they, in fact, really multinational or a means of controlling the economies of other nations? The product of more than six years of research at Harvard, this magisterial work answers these and other questions—to present the first really adequate picture of these revolutionary new institutions. "The most complete body of data on multinational firms ever assembled."—*Fortune*

The Logic of the Law

GORDON TULLOCK. The time has come, says the author of this original and innovative work, to reexamine the intellectual foundations of the law. Professor Tullock shows what happens when, abandoning the traditional view of civil and criminal law as an extension of moral philosophy, we apply some of the concepts and procedures of modern welfare economics to our legal system.

ONE NATION:

An American Government Text with Readings

*Robert L. Keighton, Curry College
Martin Sutton, Bucks County Community College*

This brief, modern text presents an excellent introduction to American government for both majors and non-majors, with emphasis on the nature of government as a process of political interaction. The authors stress issues and ideas, and combine a factual foundation with discussion of basic problems. Each chapter contains reading selections that show political science in application. Instructor's Manual available.

**AMERICAN POLITICS:
Policies, Power, and Change**

*Kenneth M. Dolbeare, University of Washington
Murray J. Edelman, University of Wisconsin*

This comprehensive interpretation of American politics examines the values, institutions, and processes through which power distribution and policies become viable. Special attention is given to poverty and racism, military-industrial relationships, economic growth and stability, and U.S. relations with the Third World. The text's primary aim is to encourage students to become more independent, critical evaluators of American politics, and more competent actors in the political world. Instructor's Manual available.

BLACK POLITICS

A Theoretical and Structural Analysis

By Hanes Walton, Jr., Savannah State College

This well-documented study covers the entire spectrum of black political experience in America. Comprehensive coverage is given to such topics as: the black electorate—registration and voting; the impact of black voting—local, state, congressional and presidential; blacks and the major parties, blacks and third parties; black pressure groups; blacks and the federal government; blacks and urban politics; blacks and political machines; and black elected officials at all levels of government.

The author's approach is both historical and analytical. Organized topically, *Black Politics* contains an enormous amount of factual information on the political activities of blacks in the United States, North and South, from colonial times to the present. The author also provides fresh theoretical insights into black political life. Illuminating charts, tables and graphs are included, as is a thorough bibliography.

The Truman Doctrine and the Origins of McCarthyism

A major study that traces the roots of anti-communism in American politics to its use during the Truman Administration as a device for mobilizing Congressional and popular support for unpopular foreign policies.

■ "This is one of the most important works on the Cold War I have read in a very long time. It is of the

utmost significance and deserves the widest attention."—Walter LaFeber, Professor of History, Cornell

■ "His thesis that the fanaticism and hysteria [of McCarthyism] were the direct result of the Truman Administration's premeditated and deliberate campaign to exaggerate the communist issue is well documented, important and very revealing."

A FRAMEWORK FOR ANALYSIS
2ND EDITION**
Kalevi J. Holsti
University of British Columbia

A complete revision and reorganization of the proven and most widely used international relations text available.

How do states conduct their relations? Why do they conduct their relations in specific ways? This new edition presents an integrated framework for analyzing the behavior of states, with emphasis on the systematic and domestic sources of external political goals. Rather than discuss current events, the book suggests relationships and provides a theoretical foundation for relating and interpreting the various situations in international affairs.

COMPARATIVE POLITICAL CORRUPTION

JAMES C. SCOTT

University of Wisconsin, Madison

Presents an analytical, cross-national study at different places and periods in history of the impact of various kinds of corruption on the workings of all levels of political systems. Treats corruption as an informal, often clandestine political arena. Shows how different patterns of corrupt influence affect the allocation of power and resources, economic growth, regime legitimacy, the possibilities for structural reform, and the mobilizing capacities of a government.

A TREATISE ON CONSTITUTIONAL CONVENTIONS (1887)

A comprehensive analysis of the constitutional convention as a fundamental institution of American government. Jameson examines every American constitutional convention held from the Revolution through Reconstruction. He analyzes the criteria for establishing the legitimacy of constitutional conventions, the powers of conventions, the submission of constitutions to the people for ratification, and the amendment of constitutions. What's happening to America

AMERICAN GOVERNMENT: The Clash of Issues, 4th Edition, 1972

Edited by James A. Burkhart, Stephens College; Samuel Krislov, University of Minnesota;
and Raymond L. Lee, Indiana University of Pennsylvania

Extensively revised and updated, this new Fourth Edition thoroughly examines contro-
versial American domestic political issues and foreign policies. Issues range from political
philosophies and foreign relations to economics, the urban crisis, welfare problems, and
the search for a viable and just American society. Authoritative articles reflect the con-
flicting opinions of such national leaders and prominent spokesmen as Spiro Agnew,
William F. Buckley, Jr., J. W. Fulbright, John K. Galbraith, George F. Kennan, Martin
Luther King, Jr., Herbert Marcuse, Eugene McCarthy, George McGovern, Kate Millett,
Richard M. Nixon, Charles A. Reich, James Reston, and Theodore H. White.
January 1972 approx. 448 pp. paper (02695-5)

GOVERNMENT BY THE PEOPLE, 8th Edition, 1972

James MacGregor Burns, Williams College, and Jack Walter Peltason, University of
Illinois, Urbana

This new 1972 Edition summarizes the current racial, ethnic, and economic attacks on
American social and political institutions. A critical, balanced, and reasoned analysis
of "government by the people", this new edition concentrates on the question of whether
American politics is controlled by a relatively small, cohesive, and powerful elite or by
most of the people acting through loose, pluristic institutions. Three versions are avail-
able: the National Edition, the National-State-Local Edition, and the new Basic Edition,
a shortened core text covering the first twenty chapters of the National Edition.

National Edition: March 1972 approx. 672 pp. (36099-0)

National-State-Local Edition: March 1972 approx. 832 pp. (36098-2)

Basic Edition: January 1972 approx. 512 pp. (36097-4)

DORSEY

COMPARATIVE POLITICS: Notes and Readings, 4th Edition

Edited by Roy C. Macridis, *Brandeis University*, and Bernard E. Brown, *City University of New York, Brooklyn*

Restructured edition with an eye to the growing demand for a comprehensive course in political analysis which maintains the basic concepts that serve as building blocks to comparative study of political behavior and institutions. Paperback.

**CONTEMPORARY POLITICAL IDEOLOGIES:
A Comparative Analysis, Revised Edition**

Lynn Tower Sargent, *University of Missouri, St. Louis*

Presents the essential features of contemporary belief systems—nationalism, communism, democracy, fascism, national socialism, and anarchism—and provides an accurate and unbiased presentation of the ideas that underlie these ideologies. A distinguishing feature is the author's comparison of the ideologies for better understanding. Paperback.

**THE DYNAMICS OF INTERNATIONAL ORGANIZATION,
Revised Edition**

Philip E. Jacob, *University of Hawaii*, Alexine L. Atherton, *Lincoln University*, Arthur Wallenstein, *University of Pennsylvania*

International organizations are examined as an integral part of the experience of nations in trying to work and live together. The book assesses reasons for failure, pinpoints conditions of achievement, and out of this pragmatic appraisal of political experimentation finds guidelines for international political development that will better the chances for human survival and well-being.

**RECENT AMERICAN FOREIGN POLICY:
Conflicting Interpretations, Revised Edition**

Edited by Lawrence S. Kaplan, *Kent State University*

This history of American foreign policy since World War II has been revised to include new issues which have confronted the nation since 1967. As the focus shifts from continent to continent, the author presents a sense of the drama implicit in the confrontation of men and ideas, an awareness of the variety of interpretation that the historical record affords, and an understanding of the changes and challenges facing the U.S. today. Paperback.

LeBLANC · ALLENSWORTH

The Politics of States and Urban Communities

By HUGH L. LeBLANC and D. TRUDEAU ALLENSWORTH, George Washington University / A realistic treatment of the American political process that brings the study of state and local politics into the mainstream of contemporary political science. Emphasizing comparative analyses, the text is based on the most up-to-date source materials. Important political issues in present urban society are analyzed. April, 1971. 470 pp.; \$11.00.

CONN

Conflict and Decision Making:

An Introduction to Political Science

By PAUL H. CONN, Michigan State University / Applies a model (political conflict and its resolution) through which all political phenomena can be analyzed, thereby providing a consistent organizational framework for the introductory course, while conveying to the student a sense of the fascinatingly complex and dynamic nature of political systems. The text examines the ways conflicts arise, the resources necessary to engage in conflict, the dynamics of conflict, and how legal and institutional structures respond to conflict situations. Modern examples, current problems, and issues relevant to the politically concerned student are stressed, with historical examples and classical concepts carefully woven into the text. March, 1971. Paper. 317 pp.; \$4.95. Instructor's Manual.

CHRISTENSON

Challenge and Decision:

Political Issues of Our Time, THIRD EDITION

By REO M. CHRISTENSON, Miami University, Ohio / Responsive to student demands for relevance in the classroom, this text offers a balanced and lucid treatment of such topics as public employee strikes, the welfare system, housing, ghetto education, unemployment programs, student rebellion, the mood and condition of black America, and crime. Foreword by Senator Edward Muskie / "An outstanding summary of salient political issues. . . . Christenson displays impartiality and selectivity, presenting both sides of each issue."—Choice (on an earlier edition). 1970. Paper. 301 pp.; \$3.95.

LEGG · MORRISON

Politics and the International System:

An Introduction

By KEITH R. LEGG and JAMES F. MORRISON, University of Florida / This is an "anti-text." A short, theoretical introduction to international politics, it is designed to be used in correlation with readings that are suggested in the wide-ranging chapter bibliographies (largely of paperbacks). Comparative in approach, the book relates the study of politics at many different levels and emphasizes the general concept of "systems" and the application of conflict theory to the study of international politics. Using specific situations to clarify and define relationships, the authors develop a framework for a viable theory of international politics. January, 1971. Paper. 369 pp.; \$3.95.

CRABB

American Foreign Policy in the Nuclear Age,

THIRD EDITION

By CECIL V. CRABB, JR., Louisiana State University at Baton Rouge / Unique in its organization, in its broad, objective, and analytical treatment, and in its range of documentation, the Third Edition of this well-known text provides the most up-to-date material on the principles, substance, and processes of American foreign policy. Presenting historical background and significant trends and prospects, this extensively revised and more compact text incorporates recent data and research, discusses major events and their effects on American foreign policy (the Arab-Israeli dispute and, especially, the Vietnam War), and assesses new movements in global affairs (disarmament and the United Nations). January, 1972. Paper. Tentative: 600 pp.; \$8.95.

FRANCIS

Formal Models of American Politics:

An Introduction

By WAYNE L. FRANCIS, University of Washington / Teaches the student how to analyze politics through the use of mathematical symbols and numbers by translating narration to formal models. Statistics, scaling procedures, index construction, set notation, reasoning, and equation writing in modeling are integrated throughout. Separate chapters introduce the notion of model, consider the origins of models in the development of scales or metrics and indices of behavior, investigate the notion of cause, and provide examples of formal models. Ideas are presented through examples of voter attitudes, legislative role types, welfare effort, apportionment, school desegregation, the Constitution of the U.S., Dahl's polyarchy, et al. Three new introductory textbooks from

CANFIELD PRESS

NATION OF CHANGE: THE AMERICAN DEMOCRATIC SYSTEM

By John P. Carney

Approximately 450 pages. Paper.

\$5.95. November 1971.

This introductory American government text, primarily for nonmajors, emphasizes functional descriptions of government institutions and explores major problems, issues, and behavior. The book reflects a concern that students must keep pace with volatile changes in the United States and the world, and that the structure and function of government directly affect political and social problems. Extensive enough to be used as a core text, but brief enough to allow the instructor use of supplementary paperbacks to explore areas in depth. Instructor's Manual.

PARTICIPATORY DEMOCRACY

By Terrence Cook and Patrick Morgan

486 pages. Paper. \$4.95. May 1971.

A collection of readings exploring the idea of participatory democracy in theory and practice, as an alternative or complement to mass representative democracy. An original essay by the authors defines participatory democracy followed by an analysis of it by traditional, modern, and radical political theorists. The decision-making process under participatory democracy is explored, and institutions such as police, armed forces, and judicial systems, whose purpose is to implement and enforce decisions, are presented.

CONTEMPORARY SOCIETY: AN INTRODUCTION TO SOCIAL SCIENCE

By John A. Perry and Murray Seidler

Approximately 640 pages. Paper.

\$5.95 tentative. March 1972.

This core text/reader for the introduction to the social science course offers a comparative cultural approach which should serve to broaden the intellectual and social horizons of the student. Basic concepts, insights, and data from the various social science disciplines are presented to enable the student to see the interrelationships which exist among these disciplines. It attempts to give the reader a better understanding of himself and the social environment in which he lives. Glossary, supplementary readings, and questions for the students are included in each chapter. Instructor's Manual.

IMPORTANT NEW BOOKS

COERCION: Nomos XIV

edited by J. Roland Pennock,
Swarthmore College, and John W.
Chapman, University of Pittsburgh

Today, at a point in history marked by dramatic challenges to the existing military, political, and social order, coercion emerges as a focal point of international concern. Amid the clamor, the traditional theories of coercion demand reassessment. Just what is coercion? What are its subtle forms? Is it always bad or simply ethically neutral? How is it used as a bargaining tactic? The fifteen papers presented here examine the definition of coercion, its moral aspects, its avoidability, and its historical and contemporary role in international relations. Scholars and students in the areas of law, philosophy, and political science will find this volume—the fourteenth in the distinguished *Nomos* series—a timely addition to their libraries. *Approx. 352 pp. \$7.95.*

COLLECTIVE VIOLENCE

edited by James F. Short, Washington
State University, and Marvin E.
Wolfgang, University of Pennsylvania

Here is a provocative collection of 27 papers (14 are entirely original contributions) on the forms, sources, and meanings of riots and rebellion. The book includes essays on theory, comparative analyses based on anthropological and historical data, studies of the role of police and other social control agents, and summarizing discussions of U.S. public policy. This latest volume in the *Law in Action* series will be of significant interest for professionals in the social and political sciences as well as a valuable supplementary text. *Approx. 416 pp. Cloth \$12.50 Paper \$4.95.*

THE HUMAN BASIS OF THE POLITY: A Psychological Study of Political Men

Jeanne Knutson

"A Brilliant application of Abraham Maslow's theory of the hierarchy of human motives to organizing the literature concerning personality and politics, and a provocative empirical study testing implications of the theory thus applied. As such, the book is a substantial contribution to the growing literature on personality and politics, and should influence subsequent thought and research in the field."—M. Brewster Smith, University of California at Santa Cruz.

This truly remarkable book is the first *thorough* review of the personality literature related to political behavior, the first thorough theoretical discussion of the uses of personality and motivation concepts in the study of social and political behavior, and the first empirical demonstration of holistic personality theory used in the study of political systems as well as in survey research. *Approx. 434 pp. \$12.95.*

PATTERNS OF DISCOVERY IN THE SOCIAL SCIENCES

Paul R. Diesing, State University of
New York at Buffalo

Social scientists are often vexed because their work does not satisfy the criteria of "scientific" methodology developed by philosophers of science and logicians who use the natural sciences as their model. This book is the first detailed and systematic report on the full range of methods of discovery in the social sciences as they are actually practiced. Neither a how-to-do-it handbook nor a lofty philosophical treatise, this is a truly interdisciplinary study of the basic modes of procedure in scientific inquiry. The book will be of interest to all social scientists, graduate students in any of the social science disciplines, and philosophers of science. It can also be used as a text or supplement in courses in sociological methods and philosophy of science. *Approx. 416 pp. \$11.75.*

CAUSAL MODELS IN THE SOCIAL SCIENCES

edited by H. M. Blalock, Jr., University of North Carolina

Causal models—formal theories stating the relationships between precisely specified variables—have become an increasingly important tool of the social scientist. This book draws upon the best recent writing in a variety of fields to provide the first comprehensive picture of contemporary work on this subject. This collection of 27 articles—8 of them previously unpublished—stands alone as a source book on the causal modeling approach to theory construction and data analysis. The papers cover the general problems of causal models, their essential nature and their several types, the

Approx. 512 pp. Cloth \$15.00. Paper \$9.75.

techniques of developing such models, and the problems encountered in testing them and in using them for predictive purposes. In bringing together contributions from a variety of disciplines that have a bearing on a common set of theoretical and analytical strategies, the relevance of work in one field to another is demonstrated. This book is intended primarily for professionals and graduate students in sociology, economics, and political science, but will be of interest to psychologists and biologists who emphasize quantitative and mathematical research techniques.

ALSO, THREE NEW ATHERTON CONTROVERSIES:

CAPITAL PUNISHMENT

edited by James A. McCafferty,
Division of Procedural Studies and
Statistics in the Administrative Office
of the United States Courts

Here are not only empirical data and analyses of the nature of capital punishment, but perspectives on the larger issues of our approach to lawbreakers and their rehabilitation. An extremely useful bibliography plus a final chapter delineating the legal issues facing the courts are included. *272 pp. Cloth \$7.95 Paper \$2.95.*

THE URBAN FUTURE

edited by Ely Chinoy, Smith College

This book provides explanations and analyses of urban problems and offers possible solutions—proposals of planners, politicians, cynics, and even visionaries for remaking our cities and for controlling and directing anticipated growth deterioration. *176 pp. Cloth \$7.95 Paper \$2.95.*

MARX'S SOCIALISM

edited by Shlomo Avineri, the Hebrew
University of Jerusalem

The writers in this book consider the earlier writings of Marx in relation to the later, "mature" Marx. They confront—in the format of a controversy—the basic question about the continuity of Marx's thought, especially with regard to such themes as humanism, alienation, and the socialist future. *Approx. 220 pp. Cloth \$7.95 Paper \$2.95.*

The Cultural Revolution in China

Thomas W. Robinson, Richard Baum, William F. Dorrill,
Melvin Gurtov, and Harry Harding, Jr.

This book offers five rich case studies of central features of the Great Proletarian Cultural Revolution, one of the most significant events in the history of 20th century China. These China scholars assess the political and ideological background of the Cultural Revolution, provide detailed accounts of some aspects of its political history, and discuss its effect on Chinese foreign policy.

A Study of Incomes Policies in Western Europe

Lloyd Ulman and Robert J. Flanagan

Incomes policies are designed to restrain the growth of wages, prices, and at times profit margins by the publication of a guide for the noninflationary development of incomes. Many forms have been tried in Europe, none too successfully. The authors examine here some of these policies in the belief that their work will aid economic policy makers both here and abroad.

The Political Experience Readings in Political Science

Edited by Michael A. Weinstein, *Purdue University*

In order to make the study of political science meaningful for the beginning student, this text presents readings that demonstrate the relevance of political science to actual experience and conditions in the real world. An introductory essay describes the four main phases of the political process—policy, decision, administration, judgment—and the political experiences associated with them—advocacy, participation, cooperation, criticism. The eight sections that follow deal successively with the quality of the human condition in the twentieth century, the nature of politics, approaches to studying politics, policy alternatives, decision-making, administration, evaluation, and prospects for political action. The readings in each section come from a wide range of sources, representing a broad spectrum of opinion. All have been selected according to their ability to clarify significant, contemporary political situations.

Reform and Responsiveness Readings in American Politics

Edited by Dennis Ippolito and Thomas G. Walker, *Emory University*

For courses in American government, this distinctive reader explores the ways in which government responds to citizens' demands for change. It examines government's potential for reform by analyzing the relationships among three categories of institutions through which the public is linked to governmental behavior and policy: participatory institutions (elections, direct action), intermediate institutions (pressure groups, political parties), and primary institutions (the Presidency, the Congress, the judiciary, the bureaucracy). The readings, which illustrate how these institutions function, have been chosen to reveal the weaknesses as well as the strengths of American politics. The text includes an introduction analyzing the question of responsiveness and presenting the linkage model, short introductions to each section of readings, and a concluding essay on the necessity of and prospects for reform.

The National Politics of Congressional Policy-Making Conflict Along Six Dimensions

Aage R. Clausen, *University of Wisconsin*

An analysis of the policy decisions of United States Congressmen from 1953 to 1970, focusing on six policy domains of recurrent interest during this period: social welfare, economic policy, farm policy, foreign policy, civil liberties, and civil rights. In seeking to determine the policy position of any legislator, it considers the relative impact of the political forces that influence him: constituency, party, ideology, the current administration, as well as personal beliefs. It shows that these forces affect voting in different degrees at different times and that knowledge of how their influence varies can greatly enhance our understanding of legislative behavior and help us predict future policy formulations. Its aim is to provide the student of American politics with a broad perspective on Congressional policy-making that is at the same time sufficiently structured to be comprehensible. Because the book is designed for students rather than specialists, description of the more difficult statistical methodology has been excluded.

Just exactly what is going on in Washington?

These days, nobody seems to know. Government has grown so big and complicated even the best-informed people find they can't keep up with it. And the really important action seems to take place so far behind the scenes you never hear about it.

But if you have a stake in government action, you can't afford to be in the dark. That's why we started National Journal. It's a weekly Washington intelligence service with a new idea:

What you need is a different kind of information from the kind you're getting now. Hot news, surface reporting, after-the-fact analysis—you can read it all and still not know what's going on.

You need to know how policy is really being made—and why. Who's behind it. Who's against it. What are its chances. What it will lead to. You need to know this before legislation is introduced, before decisions are made.

This is the only kind of information that can help you plan intelligently, act effectively, avoid unpleasant surprises. It's information you can't get from newspapers or magazines or trade publications until much too late.

National Journal helps you anticipate the government. We have 50 Washington specialists who are experts in the areas they cover. They dig deep, spending up to two months investigating one subject. Their assignment: to keep you well ahead of the government. To penetrate the statements and speeches and find out how decisions are really being made. To track the development of policy from its earliest stages—by talking to the people who actually make policy.

We keep you informed on action behind the scenes. Your interests are affected by Washington people you rarely hear of—agency directors, Congressional committee staff members, special-interest groups and lobbyists. National Journal knows these people and tells you who they are, how much power they have, what action they're taking, where they can apply pressure, how effective it will be. This is information you must have to understand what's going on in Washington. It's information you can't get anywhere else.

We keep you alert to what might hit you from your blind side. Suppose your interest is pollution control. You're probably up-to-date on the EPA. But do you know what's brewing in the congressional subcommittees, obscure environ-

ment organizations, seemingly unrelated administrative agencies and commissions? You'll find out in National Journal—not just from our in-depth analyses but also from our Briefing section. It systematically updates the analyses to alert you to significant action in your area—wherever the action may be happening.

We give you an instant information retrieval system. Just about everything in National Journal is cumulatively indexed. Attractive binders hold your National Journals and your indexes. So, at any time, you can find information in seconds.

We give you a valuable bonus. At no additional cost if you subscribe to National Journal now, you will receive a useful \$5.00 softcover book called *The Pressure Groups*. It's a collection of National Journal's insightful reports on some of the nation's most powerful lobbies and interest groups—including the Ralph Nader empire, General Motors, the environment movement, *Common Cause*, the food, aerospace and pharmaceutical manufacturers and others. Through these profiles you'll learn something about the way things really work in Washington.

We offer you an inexpensive introduction. This introductory offer brings you National Journal at a substantial discount, with *The Pressure Groups* as a bonus.

COMPARATIVE POLITICS A Distributive Approach

By ALEXANDER J. GROTH, University of California, Davis

Using a thoroughly modern approach, this text analyzes the production and dispensation of various "goods" or outputs by democratic and authoritarian political systems, and examines the significance of these outputs to the systems as a whole. Its up-to-date approach to questions of vital importance to citizens has an immediacy that will encourage students of introductory comparative politics to become deeply involved in the subject. 1971, 289 pages, paper, \$4.95

THE CONSENT OF THE GOVERNED Third Edition

By JOHN C. LIVINGSTON and ROBERT G. THOMPSON, both, Sacramento State College

Designed for students of American government and theories of democracy, this book argues that there is a serious crisis in American politics—a crisis stemming from a gap between traditional democratic ideals and American pluralistic political practice. The author's approach gives students the knowledge necessary for individual evaluation of this crisis. Each chapter of the Third Edition has been thoroughly reevaluated and revised. 1971, 562 pages, \$8.95

THE PERVERTED PRIORITIES OF AMERICAN POLITICS

By DUANE LOCKARD, Princeton University

Duane Lockard has been practicing, teaching, or writing about politics for 20 years. During that time he has become convinced that the inequities and injustices that are evident in this country today are not superficial disorders. They are, he now believes, deeply rooted in the major institutions of American government. In this controversial new book he demonstrates how federalism has provided justifications for racist policies; how the inadequacies of Congress have given rise to inequitable tax laws; and how the complexities and paradoxes of the presidency have permitted escalation of the Vietnam war. 1971, 337 pages, paper, \$4.95

FIVE LATIN AMERICAN NATIONS A Comparative Political Study

By PETER RANIS, York College of The City University of New York

This text, designed for courses in government and politics of Latin America, studies political change since independence in Mexico, Brazil, Argentina, Chile, and Peru. It examines contemporary levels of political development; the role of political culture, systems, and forces; and the sociological and economic obstacles to modernization. The book can also be used in comparative politics courses or courses in the problems of political maturation in developing countries. 1971, 337 pages, paper, \$3.95

LAWS AND MEN The Challenge of American Politics

By the late DANIEL M. BERMAN and LOUIS S. LOEB, American University

Beginning where politics begins—with people—*Laws and Men* develops an understanding of how individuals relate to politics and of how they are motivated. Descriptive, analytical, and interpretive, the book includes basic information about parties, interest groups, the policy-making institutions and processes—but goes beyond description to take a critical look at American politics. The text, designed for courses in American government, answers the plea for human relevance in the study of political behavior and institutions. 1970, 432 pages, \$7.95

AMERICAN CONSTITUTIONAL LAW

Third Edition

By the late ROCCO J. TRESOLINI, formerly of Lehigh University,
and MARTIN SHAPIRO, University of California, Irvine

This Third Edition has been brought up to date by Professor Shapiro, one of today's major interpreters of the Supreme Court. With the addition of twenty-one new cases, this text keeps pace with the rapid changes in constitutional law that occurred under the Warren Court; the emphasis in this volume has been shifted somewhat toward civil rights and the political role of the Supreme Court. Including background and explanatory material, this text serves as a comprehensive case book for beginning students of constitutional law. A Teacher's Manual is available gratis.

THE NEW AGE OF AMERICAN FOREIGN POLICY

By FREDERICK H. HARTMANN, Naval War College

Written for junior- or senior-year courses in American foreign policy, this book argues that the United States has consistently failed to discriminate between necessary and unnecessary involvements. The framework of the book enables the student to study the foreign policy that actually had been followed and also to consider alternative strategies which could have led to different politics and commitments. The emphasis throughout is on policy formation in a general sense, not merely on decision-making functions. Professor Hartmann incorporates an extensive bibliography, tables, and six maps, including Mao Tse-tung's official map of Chinese territorial claims.

COMPARATIVE POLITICAL SYSTEMS Managing Conflict

By Morton Gorden, Development Sciences, Inc.

Designed for courses in comparative government and politics, this text will also be valuable in a wide array of courses concerned with the study of conflict and conflict management. The author identifies the major variables involved in the management of conflict in a polity; taken together, these variables constitute a general model of a process natural to all governments. Through this model (and the developmental and distributive models) the student is led to understand the analytical scheme used to make comparisons about political behavior. Political systems of the United States, Japan, India, France, Britain, China, and the Soviet Union receive emphasis.

“ECONOMIC & POLITICAL PEACE”

by Shirley Telford

This book is a practical plan for peace that is primarily a new interpretation of Karl Marx's book "Capital." Shirley Telford is also the author of another book, "Confessions of a Girl Economist" (1963), which she believes could have influenced the recent economic reforms in Eastern Europe, including some in Russia. This scholarly work, which enlarges on and completes what was condensed in the first one, could conceivably predict possible changes for the future. Eduard Heimmann, a distinguished economist, once said that it "would pull the rug from under the dictatorial meaning attributed to [Marx] by friend and foe." Now a second edition is enlarged to explain the business administration of Marx's cooperative production.

Why They Call It Politics

A GUIDE TO AMERICA'S GOVERNMENT

Robert Sherrill

Drawing upon his extensive experience as a political writer, Robert Sherrill here provides for the beginning student an informed, incisive introduction to the ethos of contemporary American government. Mr. Sherrill considers the major issues and problems of American political life; he presents his own views clearly and firmly, backing them up consistently with numerous examples, quotations, and anecdotes.

Because Mr. Sherrill is concerned primarily with the *manner* of government—the political process as it actually operates—he offers the student stimulating opinions and perspectives that are not available in standard political science textbooks. He is highly critical of the conduct of American politics, especially of the mediocrity of many of the bureaucrats and politicians that the system tolerates. His tone is indignant, but not moralizing. Rather, he attempts to give the student a sense of the corruptibility of people and institutions; the reasons for the concentration of land and wealth in the hands of a few; and a sense of the power these few wield in operating within the system, and thereby largely controlling it.

Written in an informal, journalistic style, designed in an inexpensive paperbound format, this is a book that will involve your students as well as inform them. In providing a realistic, disenchanting view of American government today, *Why They Call It Politics* will encourage your students to analyze our political problems, to recognize the need for change, and to help devise practical, constructive ways for achieving it.

major foreign powers

Sixth Edition

GWENDOLEN M. CARTER, Northwestern University
JOHN H. HERZ, The City College of The City University of New York

Like previous editions of this important textbook, the Sixth Edition of *Major Foreign Powers* is intended to give students a thorough, factual introduction to the institutions and politics of Great Britain, France, Germany, and the Soviet Union. The authors take a truly comparative approach to their study of the four countries, using their knowledge of the practices and institutions of one country to illuminate those of another; and, in treating each country, they focus especially on the ideas, the aims, and the traditions that have had a dominating political influence.

In preparing this Sixth Edition, the authors have extensively rewritten the text and brought it up to date to reflect important events of the last four years. Among the new topics included are

—for Great Britain, the return to power of the Conservative Party, the decline in the importance of the Commonwealth, and the negotiations for British entry into the Common Market;

—for France, the impact of the student uprisings and of labor unrest, and the changes in political life since the time of de Gaulle;

—for Germany, the development of Brandt's *Ostpolitik*, the growth of the neo-Nazi movement, and the continued economic strength of the country;

—for the Soviet Union, the formulation of the Brezhnev doctrine, the Soviet intervention in the Czechoslovak uprising, Soviet interest in the Middle East, and Sino-Soviet relations.

The Introduction and Conclusion to the book—thoroughly rewritten for this edition—provide the student with a broad framework for understanding government and politics in the twentieth century; and the extensive bibliography, a highly valued supplement to the text itself, has been brought completely up to date.

GOVERNMENT AND POLITICS IN A DEVELOPING NATION

ROBERT L. HARDGRAVE, JR., University of Texas at Austin

This stimulating textbook introduces the student to the problems of political development through the study of a single nation, India. Professor Hardgrave uses India to illustrate a major crisis of developing nations—the limited capacity of their institutions to respond to expanding participation and rapidly increasing demands. Through a balanced treatment of structure and process,

of institutions and behavior in Indian politics, he provides a sense of the cultural and historical milieu in which political development takes place. The student thereby has a framework for exploring problems of political development common to a major portion of the world.

democracy under pressure

AN INTRODUCTION TO THE AMERICAN POLITICAL SYSTEM

MILTON C. CUMMINGS, JR., The Johns Hopkins University
DAVID WISE, Coauthor of *The Invisible Government*

"At a time when the values and processes of the political system are being challenged, we believe it appropriate and necessary to raise fundamental questions sharply and clearly."
—from the authors' Preface

Just published in Spring 1971, this highly acclaimed textbook is a concise, lucid introduction to American government and politics, written specifically for students and teachers in the 1970's. It offers a thorough examination of the structure and processes of the American political system, focusing not only on the considerable achievements of the system but on its shortcomings as well.

In both content and style, *Democracy Under Pressure* relates to—and builds on—the interests and concerns of today's students.

- Although the authors present American governmental institutions in their historical context, they consistently relate them to important contemporary issues—among them, the environment, Vietnam, Black Power, the military-industrial complex, minority rights, student dissent, electoral reform, and the urban crisis.
- The authors emphasize the individual responsi-

bility of each citizen for the quality of American society and American government and provide numerous examples of participation in the political process by students and other citizens.

- The text itself—a collaborative effort between an eminent political scientist and an outstanding political writer—is written in a clear, highly readable style, with no sacrifice of either content or scholarship.

- The book is profusely illustrated with charts, tables, photographs, and cartoons; numerous boxed quotations from contemporary sources complement the text; and a second color is used functionally throughout.

A *Test Booklet*, prepared by John D. Kay and Fred Hofmann, Santa Barbara City College, accompanies the textbook. The Manual provides multiple-choice, short-answer, and essay questions for each chapter, as well as suggested lecture and discussion topics. 718 pages. \$8.95

**URBAN REVOLT IN SOUTH AFRICA, 1960–1964
A CASE STUDY**

by **Edward Feit**

Focusing on the rank and file rather than the leaders, the author details urban revolutionary action by Africans after the banning of African political organizations in 1960. He explains how the attempt at insurgency was organized; why its initial success was limited; and why, in the end, it failed. Based on the verbatim records of the trial of the insurgents, his examination of this case of urban revolt exposes some of the bureaucratic and ideological "myths" that have grown around revolutionary movements.

THE RIGHT WING INDIVIDUALIST TRADITION IN AMERICA

A NEW REPRINT COLLECTION OF 38 BOOKS

Advisory Editors: Murray N. Rothbard, Polytechnic Institute of Brooklyn, and Editor of the *Libertarian Forum*; and Jerome Tuccille, author of *Radical Libertarianism* and *It Usually Begins With Ayn Rand*.

This collection attempts to restore a proper balance to the right wing individualist tradition in America, which has its roots in an older variety of American individualism pre-dating the Revolution of 1776. Works have been selected which reflect the thinking of writers and intellectuals in three broad schools: the conservative school founded in strict constructionism surrounding the United States Constitution; the libertarian school which places greater emphasis on the freedom of the individual and adheres to a limited-government philosophy; and the anarchist school, which might also be called radical libertarianism. A distinction has been made between American right wing individualist anarchists (who advocate a laissez-faire economic system), and left wing (collectivist or communist) anarchists in the European tradition who have been excluded from the collection. Also excluded from the collection are the right wing nationalist or "patriotic" groups such as the Ku Klux Klan or the John Birch Society which are totalitarian rather than individualist.

Students and scholars with particular interests in economics, history, foreign policy, political science and social philosophy will find a wealth of material here which has been largely unavailable in recent years.

CLASS INEQUALITY AND POLITICAL ORDER

Social Stratification in Capitalist and Communist Societies

Frank Parkin

This comparative analysis of stratification in present-day capitalist and Communist societies focuses on the political and social mechanisms that serve to perpetuate class inequality. A central concern of the author's is whether stratification is peculiar to capitalist societies or exists in the European Communist states as well.

The Dilemma in U.S.-China Relations

Jerome Alan Cohen, Edward Friedman, Harold C. Hinton, and Allen S. Whiting

In this perceptive book, four China specialists re-examine the U.S. national interest in regard to Taipei and Peking, the wide-ranging implications of our defense alliance with Taiwan, and various U.S. policy options in relation to both Chinese states.

A HUNDRED YEARS OF INTERNATIONAL RELATIONS

F. S. Northedge and M. J. Grieve

This is a comprehensive study of the development of the international political system since 1870. Using the modern development of the state system as their framework, the authors select these key themes of the last hundred years: the primacy of Europe in the late nineteenth century and the factors that led to its decline, the origins and consequences of the two world wars and of the cold war, the emergence of the two superpowers, the entry into the system of the new nations of Asia and Africa, and the impact of nuclear weapons and international organizations on the state system.

Congress and Campaign Financing

Robert P. Peabody, Jeff Berry, William G. Frasure, and Jerry Goldman

This practical book guides students of American government step by step through each phase of the legislative process. Using as their model the Political Broadcast Act of 1970, the authors demonstrate how a bill is conceived, the ways it can be subjected to the pressures of interest groups, how it is handled in committee, and what happens when it comes up for Senate and House action. The narrative is supplemented by key documents such as the text of the bill, interviews with lobbyists, extracts from the floor debate, and news articles. The bill chosen for this case study is of singular importance to students of American politics, for it homes in on several vital issues pertaining to how modern elections are fought, financed, and won.

GAMES NATIONS PLAY

Analyzing International Politics

John Spanier

This major new text sets forth a three-part analytical framework that teaches the student how to *think* about international politics in a way that will allow him to evaluate critically the events, issues, and policies of the modern era. By providing three discrete levels of analysis – and illustrating how they interrelate – *Games Nations Play* also offers the instructor far greater range, depth, and flexibility than can be found in other texts. The three analytical levels – the state system with its balance-of-power emphasis, the national system with its domestic priorities, and the decision-making system with its dependence on the policy-maker's perception of reality – guide the student through the complexities of the international system and offer a sophisticated basis for prediction, criticism, and interpretation.

Exploring the role ideas play in American foreign policy—the set of general notions that have shaped the programs and actions of the United States in international affairs—and seeking out new ideas that might direct our role in the future was the object of the Sixth Orvil E. Dryfoos Conference on Public Affairs held at Dartmouth College in 1970. This report does much toward analyzing the effect and power that ideas have in determining our country's foreign policy as well as presenting a clear and relevant analysis of vital aspects of our current foreign policy.

The Irony of Democracy

2nd edition
An Uncommon Introduction to American Politics
Thomas R. Dye, The Florida State University
L. Harmon Zeigler, University of Oregon

Hailed by many as "the most exciting new American politics text in 20 years". An immediate best-seller (over 100,000 copies shipped to college bookstore accounts in the first year after publication). The text offers a penetrating, often iconoclastic, reinterpretation of American politics from the viewpoint of *elite theory*. It is designed as a "core" or supplementary text for basic American politics courses and has been widely heralded for its straight-forward, well-documented presentation, and for its student appeal.

The revised edition refines and extends the authors' provocative thesis that "government by the people" of the United States exists only where *elites* choose to govern wisely. The "ironies" evident in the political events of the past two years (e.g. with the publication of the Pentagon Papers) are fully covered.

In addition, the authors have added *prescriptive* concluding essays in a final section (What to do about the Establishment) in a further attempt to spur discussion about the future of American democracy.

February 1972. 370 pages, flexible binding, 6½ x 9¼. A thoroughly revised instructor's manual, prepared by Robert Leonard, Florida State University, and including hundreds of graded test items, is available on adoption.

Also by Dye and Zeigler, a new reader to accompany THE IRONY OF DEMOCRACY, 2nd edition.

THE FEW AND THE MANY: Uncommon Readings in American Politics

ANALYZING AMERICAN POLITICS: A New Perspective

W. A. Rosenbaum and John W. Spanier, University of Florida, and William C. Burris, Guilford College
This text is a significant departure, substantively and organizationally, from most texts on American government. Sophisticated and succinct, it presents an analysis of the political system, the government, legitimacy, political socialization, and political culture of the United States. It is a text with a comparative framework, emphasizing the understanding of American politics through cross-cultural analysis. 1971. 496 pages. 6½ x 9¼. Flexible binding.

THE PEOPLE, MAYBE: Seeking Democracy in America

Karl A. Lamb, University of California at Santa Cruz
This new genre of book confronts students with basic unsolved questions rather than with institutional minutiae, covering standard topics of American government in relation to current issues. Exciting narrative "images" precede each chapter, plunging the reader into current events and contrasting them with Jeffersonian ideals. The treatment of contemporary problems is well grounded in history. 1971. 477 pages. 6½ x 9¼. Flexible binding.

POWER AND POLITICS IN AMERICA

Leonard Freedman, University of California at Los Angeles
This lively introductory text presents a working model of democratic government, then assesses it from three conflicting positions — the liberal critique, an attack from the left, and a counterattack from the right. The four postures are tested throughout the text in relation to institutions and processes of government and politics, and the output of government and politics — public policy. 1971. 400 pages. 6½ x 9¼. Flexible binding.

POLITICS 1972

Francis M. Carney, University of California at Riverside, and H. Frank Way, University of California at Riverside.
POLITICS 1972, like the highly successful POLITICS 1968, POLITICS 1964, and POLITICS 1960, presents the major economic, social and international issues confronting both the nation and the voter in a presidential election year. Throughout, the book stresses the divergence of points-of-view on important political questions. December 1971. 325 pages. 6 x 9. Paperbound. Instructor's Manual.
