PRESCRIBE THE EASY EFFECTIVE METHOD

When spraying, the patient can hold his head in a natural position, yet the solution spreads throughout the nasal cavity, assuring thorough treatment. Effective dropper-application, on the other hand, requires a complicated posture technique which patients are apt to neglect in home treatment.

**DeVilbiss
ATOMIZERS**

DROPPER ?

ATOMIZER ?

These illustrations, which are based on X-ray research, clearly demonstrate the advantages of the atomizer as compared with the dropper

A NEW AUDIOMETER

Today, your patient expects an audiometer test. The increasing use of the audiometer is likely to yield more accurate control of deafness and to bring the direction of the supply of hearing aids back to the aurist, where it belongs.

The busy aurist will appreciate the advantages of the AMPLIVOX MAICO Audiometer which is rapid in operation and accurate in calibration and so clearly satisfies the modern demand that it is already the most widely used audiometer in the world.

- Lower price
- All mains operation
- Frequency range, 128 to 11,584 c.p.s.
- Same zero for all frequencies
- Maximum intensity, 100 decibels
- Illuminated and easily read scales

We shall be glad to send you further particulars and to demonstrate the Audiometer to you on request.

A. Edwin Stevens

AN AMPLIVOX FOR THE WAISTCOAT POCKET

- **CRYSTAL MICROPHONE**
- **STANDARD BATTERIES**
- **WEIGHT ONLY 1½ LBS.**
- **AVAILABLE IN THREE DIFFERENT TONES**
- **PRICE ONLY 17 GNS.**

The model V AMPLIVOX is designed for the gentleman who wishes to wear a high quality hearing aid. The amplifier, complete with filament battery can be placed in the waistcoat pocket; the H.T. battery goes easily into the hip pocket or inside coat pocket. It is a very powerful instrument of extreme clarity, and uses standard batteries. For those who want the best results in a hearing aid which they can wear the model V AMPLIVOX is the obvious choice.

The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTED BY

W. M. MOLLISON

1. Original Articles are accepted on the condition that they have not been published elsewhere.
2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.
3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.
4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.
5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.
6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.
7. The Annual Subscription commencing with the January issue is Two Pounds sterling, post free, and is payable in advance.
8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.
9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

United States of America

Orders for this Journal may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & Co., 31-33 East 10th Street, New York, or may be sent direct to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2, England.
