Epidemiology and Infection

Editor-in-Chief

Norman Noah, London School of Hygiene and Tropical Medicine, UK

Epidemiology and Infection publishes original reports and reviews on all aspects of infection in humans and animals. Particular emphasis is given to the epidemiology, prevention and control of infectious diseases. The field covered is broad and includes the zoonoses, tropical infections, food hygiene, vaccine studies, statistics and the clinical, social and public health aspects of infectious disease. Papers covering microbiology and immunology, which have an epidemiological relevance, are part of this broad field. Papers come from medical and veterinary scientists worldwide. It has become the key periodical in which to find the latest reports on recently discovered infections and new technology. For those concerned with policy and planning for the control of infections, the papers on mathematical modelling of epidemics caused by historical, current and emergent infections, will be of particular value.

Journal of Biosocial Science

Editor

C. G. N. Mascie-Taylor, University of Cambridge, UK

Journal of Biosocial Science is a leading journal in the field of biosocial science, the common ground between biology and sociology. It is an essential reference guide for all biological and social scientists working in such areas as reproduction and its control, gerontology, ecology, genetics, applied psychology, sociology, education, criminology, demography, health and epidemiology. Publishing original research papers, short reports, reviews, lectures and book reviews, the journal also includes a Debate section which encourages comments on specific articles, with subsequent response from the original author.

NETWORK SCIENCE

Volume 3

Number 3

CONTENTS

Editorial

THOMAS W. VALENTE 297

Articles

- Modeling workplace contact networks: The effects of organizational structure, architecture, and reporting errors on epidemic predictions
GAIL E. POTTER, TIMO SMIESZEK AND KERSTIN SAILER 298
- Data on face-to-face contacts in an office building suggest a low-cost vaccination strategy based on community linkers
MATHIEU GÉNOIS, CHRISTIAN L. VESTERGAARD, JULIE FOURNET, ANDRÉ PANISSON, ISABELLE BONMARIN AND ALAIN BARRAT 326
- Walk-modularity and community structure in networks
DAVID MEHRLE, AMY STROSSER AND ANTHONY HARKIN 348
- Diffusion and protection across a random graph
ANDREA GALEOTTI AND BRIAN W. ROGERS 361
- Human-mobility networks, country income, and labor productivity
GIORGIO FAGIOLO AND GIANLUCA SANTONI 377
- Clustering attributed graphs: Models, measures and methods
CECILE BOTHOREL, JUAN DAVID CRUZ, MATTEO MAGNANI AND BARBORA MICENKOVÁ 408

Manuscript Submission Guidelines

Manuscripts for consideration for *Network Science* should be submitted electronically, using the Manuscript Central System at <http://journals.cambridge.org/NWS>. This system will allow authors to benefit from faster review and earlier, online publication. Authors who are unable to submit online should contact the NWS Editorial Office (at networkscience@cambridge.org) for assistance.

For more detailed instructions for contributors please go to <http://journals.cambridge.org/NWS/contributors>.
