

APPLICATION FOR FFPS MEMBERSHIP

Please complete in block letters

Name Title

Address

Membership categories (tick appropriate box)

Standard £20 Family £25 Concessionary (senior citizen, unwaged, student*) £12

Benefactor £35 Associate (no *Oryx*) £10 Life £1000

Airmail despatch (see inside cover for standard despatch details) £7.50

*If student please give date you expect to finish studies

METHODS OF PAYMENT

1. CHEQUE/ POSTAL OR MONEY ORDER/ GIRO CREDIT (Currency: £ sterling only)

I enclose £

2. CREDIT CARD (AMERICAN EXPRESS OR VISA – ONLY FOR OVERSEAS PAYMENTS)

Name of card Name of card holder

Card No. Expiry date

3. BANKER'S ORDER Please send to the FFPS, not to your bank.

Name Account No. Bank Sort Code .. - - ..

Name and address of bank

Please pay for the credit of Fauna and Flora Preservation Society, Account No. 60336130,

Barclays Bank plc (20-12-75), 139/142 North Street, Brighton BN1 1RU

my subscription of £ due on and the same amount on the same day each year until further notice. Signature

This cancels any previous order in favour of the FFPS.

DEED OF COVENANT

If you pay income tax in the UK you can greatly increase the value of your subscription to the FFPS, at no additional cost to yourself, by signing this Deed of Covenant.

I (full name) of

hereby covenant with the Fauna and Flora Preservation Society, whose office is 1 Kensington Gore London SW7 2AR, that for a period of four years from the date hereof, or until my death (whichever shall be the shorter period) I will pay annually to the said Society from the day of (this date should be later than the date of the signature) in every year such a sum as, after deduction of income tax at the standard rate for the time being in force, amounts to £ (please insert the actual amount of your subscription), such a sum to be paid from my general fund of taxed income.

Signed and sealed by me this * day of 19

Signature In the presence of Occupation

(signature of witness, who should not be your spouse)

Address

* The first payment must be received within 1 year from this date.

Geographical Population Analysis

Methods in Ecology Series

Brian A Maurer

Conservation biology has emerged as one of the most important areas of ecology; using concepts from traditional resource management and modern population biology to preserve biological diversity. In order to really understand the problems of decreasing diversity and the solutions to maintaining it, the attention of ecologists must be focussed on larger spatial and temporal scales than they are traditionally used to. The book discusses methods and statistical techniques that can be used to analyze spatial patterns in geographic populations. These techniques incorporate ideas from fractal geometry to develop measures of geographic range fragmentation, and can be used to ask questions regarding the conservation of biodiversity.

- ❖ full description of statistical methods
- ❖ uses innovative fractal geometry
- ❖ applications in the conservation of biodiversity

1994 . 144 pages . 35 illustrations . Paperback . £18.95 . 0632037415

Order Form

Please send me _____ copy/ies of *Geographical Population Analysis* @ £18.95 plus £1.75 postage and packing

I enclose a cheque for £_____ (made payable to Marston Book Services)

Please debit my AMEX/Diners Card/Eurocard/Mastercard/Visa

card number

expiry date _____ with the sum of £ _____

Signature _____ Date _____

ORYX: NOTES FOR CONTRIBUTORS

General *Oryx* publishes original articles and reports dealing with the conservation of species and habitats world-wide, with particular emphasis on those that are endangered. All submissions are reviewed by at least two referees. It is helpful if authors suggest at least one referee who is qualified to judge the work objectively.

Submissions should be sent to the Editor, FFPS, 1 Kensington Gore, London SW7 2AR.

After acceptance papers may be edited to enhance clarity. Where major changes have been made edited manuscripts are returned to authors before type-setting. Page proofs are sent to all authors for approval before going to press. Contributors receive two free copies of the journal and will be entitled to buy additional copies at £2.00 each, post free. Offprints may be ordered at cost price.

Contributions should be concise but informative, normally in English. Articles should be as short as possible, preferably under 2500 words, and very short articles are acceptable.

Manuscripts should be typed on one side only and double-spaced on A4 paper (208x298 mm). The left-hand margin must be at least 40 mm wide. Two copies should be submitted and authors are also invited to submit papers on disk (IBM compatible or Apple format).

Footnotes should be avoided but, if necessary, should be indicated with asterisks in the text. The author's name and postal address should follow any acknowledgments and references at the end of the article.

References in the text should give the author's name with the year of publication in parentheses. The reference list should be in alphabetical

order and include the full article title.

References should be given according to the abbreviations in the *World List of Scientific Periodicals*. Thus:

Aveling, C. and Harcourt, A.H. 1984. A census of the Virunga gorillas. *Oryx*, **18**, 8–13.

Hartshorn, M.G. 1983. Wildlife conservation in Central America. In: *Tropical Rain Forest: Ecology and Management* (eds S. L. Sutton, T. C. Whitmore and A. C. Chadwick), pp. 421–423. Blackwell Scientific Publications, Oxford.

Illustrations are welcomed and ideally should be glossy, black-and-white whole-plate prints. Good colour slides are acceptable if black-and-white photographs are not available.

Line drawings and maps should be in black ink on strong white or translucent paper. Lettering on maps and figures should be sent on a separate copy of the figure along with the unlabelled original.

Captions for figures should be typed consecutively on a separate sheet.

Tables. Each table should be self-explanatory and typed on a separate sheet with an appropriate caption.

Scientific names should be underlined and not placed in parentheses. Species' names should follow a checklist, which should be mentioned in a covering letter where there is a risk of confusion.

The first time a species is mentioned its scientific name should be given. English names should be in lower case throughout except where they incorporate a proper name.
