## Elements of Argumentation

Philippe Besnard  
and Anthony Hunter

"A landmark volume in the study of argumentation. For those of us who work in artificial intelligence, this will be the standard reference for years to come."

— Simon Parsons, Department of Computer and Information Science, Brooklyn College, City University of New York

320 pp., 12 illus., \$35 cloth

## Human Reasoning and Cognitive Science

Keith Stenning  
and Michiel van Lambalgen

"This deep and stimulating book, by a leading psychologist and a leading logician, is about the choice of logical formalisms for representing actual reasoning. This may be the first book in cognitive science that logicians can learn some new logic from."

— Wilfrid Hodges, Queen Mary, University of London

## Philosophical Logic

John P. Burgess

*Philosophical Logic* is a clear and concise critical survey of nonclassical logics of philosophical interest written by one of the world's leading authorities on the subject. Requiring minimal background and arranged to make the more technical material optional, the book offers a choice between an overview and in-depth study, and it balances the philosophical and technical aspects of the subject.

"This book is terrific. It covers the basics of philosophical logic in a lively, interesting, and informative way. Readers do not have to wade through pages and pages of technical material. Instead, they get the basics, and the big picture."

—Stewart Shapiro, editor of *The Oxford Handbook of Philosophy of Mathematics and Logic*
