

PNS

PROCEEDINGS OF THE NUTRITION SOCIETY

Editor-in-Chief

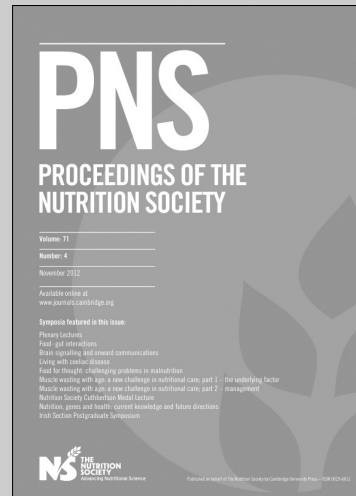

Maria O'Sullivan

Trinity College Medical Centre, Republic of Ireland

Proceedings of the Nutrition Society publishes papers and abstracts presented by members and invited speakers at the scientific meetings of The Nutrition Society. The journal provides an invaluable record of the scientific research currently being undertaken, contributing to 'the scientific study of nutrition and its application to the maintenance of human and animal health.'

Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 12 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 16, 2013 (12 issues):
Internet/print package: £886/\$1700 Americas only/€1420 EU only
Internet only: £675/\$1280 Americas only/€1420 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, including references.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system (eJournalPress). All manuscripts must be submitted online at <http://phn.msubmit.net/>. If any difficulties are encountered, please contact the Publications Office at phn.edoffice@cambridge.org

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Monitoring and surveillance

Prevalence of vitamin B₁₂ depletion and deficiency in Liechtenstein
V Koenig, Z Stanga, M Zerlauth, L Bernasconi, M Risch, A Huber and L Risch 241

Dietary intake of lycopene by the Belgian adult population
S Vandevijvere, T Cucu, C Vinkx, K Huvaere, I Huybrechts and J Van Loco 248

Trends in energy and macronutrient intakes by weight status over four decades
WS Yancy Jr, C-C Wang and ML Maciejewski 256

Assessment and methodology

Relative validity of the Children's Eating Habits Questionnaire—food frequency section among young European children: the IDEFICS Study
S Bel-Serrat, T Mouratidou, V Pala, I Huybrechts, C Böhrhorst, JM Fernández-Alvira, C Hadjigeorgiou, G Eiben, A Hebestreit, L Lissner, D Molnár, A Siani, T Veidebaum, V Krogh and LA Moreno 266

Test–retest reliability and construct validity of the DOIIT (Dutch Obesity Intervention in Teenagers) questionnaire: measuring energy balance-related behaviours in Dutch adolescents
EHC Janssen, AS Singh, F van Nassau, J Brug, W van Mechelen and MJM Chinapaw 277

A comprehensive FFQ developed for use in New Zealand adults: reliability and validity for nutrient intakes
CHY Sam, S Skeaff and PML Skidmore 287

Validation of an FFQ to assess short-term antioxidant intake against 30 d food records and plasma biomarkers
M Yang, Y Wang, CG Davis, SG Lee, ML Fernandez, SI Koo, E Cho, WO Song and OK Chun 297

Epidemiology

Associations of diet quality with dairy group membership, membership duration and non-membership for Kenyan farm women and children: a comparative study
C Walton, J Taylor, J VanLeeuwen, F Yeudall and S Mbugua 307

Adolescent television viewing and unhealthy snack food consumption: the mediating role of home availability of unhealthy snack foods
N Pearson, SJH Biddle, L Williams, A Worsley, D Crawford and K Ball 317

Predictors of high-energy foods and beverages: a longitudinal study among socio-economically disadvantaged adolescents
LD Stephens, SA McNaughton, D Crawford and K Ball 324

Nutrition and health

Association of beverage consumption with obesity in Mexican American children
AL Beck, J Tschann, NF Butte, C Penilla and LC Greenspan 338

Variation of BMI and anthropometric indicators of abdominal obesity in Brazilian adolescents from public schools, 2003–2008
EG Barros, RA Pereira, R Sichieri and GV da Veiga 345

Healthy behaviours and abdominal adiposity in adolescents from southern Italy
P Iaccarino Idelson, L Scalfi, N Vaino, S Mobilia, C Montagnese, A Franzese and G Valerio 353

Dietary risk factors for the development of insulin resistance in adolescent girls: a 3-year prospective study
J White, R Jago and JL Thompson 361

Behavioural patterns of protective and risk factors for non-communicable diseases in Brazil
EM Steele, RM Claro and CA Monteiro 369

Association of sociodemographic and nutritional factors with risk of neural tube defects in the North Indian population: a case–control study
R Deb, J Arora, KN Saraswathy and AK Kalla 376

Calcium intake and osteoporosis: the influence of calcium intake from dairy products on hip bone mineral density and fracture incidence – a population-based study in women over 55 years of age
D Włodarek, D Głąbska, A Kołota, P Adamczyk, A Czekajło, W Grzeszczak, B Drozdowska and W Pluskiewicz 383

Nutritional status and risk for disability in instrumental activities of daily living in older Brazilians
LP Corona, TR Pereira de Brito, DP Nunes, T da Silva Alexandre, JL Ferreira Santos, YA de Oliveira Duarte and ML Lebrão 390

Islamic fasting and weight loss: a systematic review and meta-analysis
B Sadeghirad, S Motaghipisheh, F Kolahdooz, MJ Zahedi and AA Haghdoost 396

Interventions

Strengthening the rigour of population-wide, community-based obesity prevention evaluations
L Wolfenden and J Wiggers 407

State-wide dissemination of a school-based nutrition education programme: a RE-AIM (Reach, Efficacy, Adoption, Implementation, Maintenance) analysis
GF Dunton, Y Liao, R Grana, R Lagloire, N Riggs, C-P Chou and T Robertson 422

Differential effects of the computer-tailored FATaintPHAT programme on dietary behaviours according to sociodemographic, cognitive and home environmental factors
NPM Ezendam, J Burg, G Borsboom, P van Empelen and A Oenema 431

Additional benefit in CVD risk indices derived from the consumption of fortified milk when combined with a lifestyle intervention
M Petrogianni, E Grammatikaki, N Kalogeropoulos, A Peristeraki, G Moschonis, C Pitsavos, S Antonopoulou and Y Manios 440

Marketing and communication

Availability of iodised table salt in the UK – is it likely to influence population iodine intake?
SC Bath, S Button and MP Rayman 450

Special groups

Serum micronutrient status and nutrient intake of elderly Yoruba people in a slum of Ibadan, Nigeria
IO Olayiwola, GT Fadupin, SO Agbato and DO Soyewo 455

Dietary patterns in Greenland and their relationship with type 2 diabetes mellitus and glucose intolerance
C Jeppesen, P Bjerregaard and ME Jørgensen 462

Consumption patterns of sweetened food and drink products in a Catholic Middle Eastern Canadian community
J-C Moubarac, O Receveur, M Cargo and M Daniel 471
