STUDIES IN SECOND LANGUAGE ACQUISITION

Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the *SSLA* website at http://journals.cambridge.org/sla. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

Research Article. These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 10,000 word limit).

Research Report. These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Replication Study. These manuscripts are empirical studies that replicate the research design and methods of a previously published study, with or without changes. The study selected for replication should have impacted empirical and/or theoretical work relevant to SLA. Replications can be direct (exact, close, approximate) or conceptual, and should identify and motivate the study selected for replication as well as any changes made. The maximum length is 10,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication).

State-of-the-Scholarship Article. These manuscripts are essays that review the extant research on a particular theme or theoretical issue, offering a summary of findings and making critical observations on the research to date. Manuscripts in this category typically fall within the 10,000-word limit; however, longer manuscripts may be considered on a case-by-case basis.

Critical Commentary. These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Methods Forum. Recognizing the need to discuss and advance SLA research methods, these manuscripts seek to advance methodological understanding, training, and practices in the field. Submissions can be conceptual or empirical; we also encourage articles introducing novel techniques. All research paradigms, epistemologies, ontologies, and theoretical frameworks relevant to SLA are welcome. The target length is up to 10,000 words, although longer manuscripts will be considered with justification.

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in *SSLA*.

Studies in Second Language Acquisition
Volume 46 Number 4 September 2024

RESEARCH ARTICLES

Acceptance and engagement patterns of mobile-assisted language learning among non-conventional adult L2 learners: A survival analysis
Hyun-Bin Hwang, Matthew D. Coss, Shawn Loewen, and Kaitlyn M. Tagarelli 969–995

Bilingualism and flexibility in task switching: A close replication study
Rebecca Ward and Justin Awani 996–1012

Explicit information and practice type can affect the L2 acquisition of plural marking: Empirical insights from web-based contrastive instruction
Matt Lucas 1013–1044

Lexical coverage in L1 and L2 viewing comprehension
Marion Durbahn, Michael Rodgers, Marijana Macis, and Elke Peters 1045–1068

Differential effects of identification and discrimination training tasks on L2 vowel identification and discrimination
Juli Cebrian, Núria Gavaldà, Celia Gorba, and Angélica Carlet 1069–1093

Structural priming facilitates L2 learning of the dative alternation in Mandarin
Yanxin (Alice) Zhu and Theres Grüter 1094–1116

Is L2 pronunciation affected by increased task complexity in pronunciation-unfocused speaking tasks?
Ingrid Mora-Plaza, Joan C. Mora, Mireia Ortega, and Cristina Aliaga-Garcia 1117–1149

Exploring the roles of ideal L2 writing self, growth L2 writing mindset, and L2 writing grit in L2 writing achievement among EFL learners
Jalil Fathi, Mirosław Pawlak, and S. Yahya Hejazi 1150–1178

METHODS FORUM

Task-generated processes in second language speech production: Exploring the neural correlates of task complexity during silent pauses
Andrea Révész, Hyeonjeong Jeong, Shungo Suzuki, Haining Cui, Shunsui Matsuura, Kazuya Saito, and Motoaki Sugiura 1179–1205

Domain-general auditory processing as a conceptual and measurement framework for second language speech learning aptitude: A test-retest reliability study
Kazuya Saito and Adam Tierney 1206–1230

REPLICATION STUDIES

Learning without awareness revisited and reconsidered: A conceptual replication and extension
John N. Williams and Yuyan Xue 1231–1257

Explicit information and working memory in second-language acquisition of the Spanish subjunctive: A replication and extension of Fernández (2008)
Nick Henry, Briana Villegas, and Kara Morgan-Short 1258–1281

RESEARCH REPORT

Do reading times predict word learning? An eye–tracking study with novel words
Irina Elgort and Elisabeth (Lisi) Beyersmann 1282–1297
