## CONTENTS

### LETTERS TO THE EDITOR

**The Price of Love: how sleep, and dysregulated clocks may account for its obsessive-compulsive related behaviors?**

Miguel Meira e Cruz 647

**Standardized diagnostic assessment for child and adolescents mental health services: a leap forward in measurement-based care**

Mayank Gupta and Nihit Gupta 649

**Response to the letter to the editor: "The price of love: how sleep, and dysregulated clocks may account for its obsessive-compulsive related behaviors" by Miguel Meira e Cruz**

Donatella Marazziti 651

**Borderline personality disorder and cognition: unraveling the enigma one piece at a time!**

Sujita K. Kar and Saalya Chak 653

### EDITORIAL

**Anomic suicides on rise during recently emerging crises: revisiting Durkheim's model**

Sujita Kumar Kar and Shivangini Singh 655

### REVIEWS

**Neurological soft signs and schizophrenia**

Eva-Maria Tsapakis, Calypso A. Mitkani, and Konstantinos N. Fountoulakis 657

**Digital health technologies and major depressive disorder**

Roger S. McIntyre, Walter Greenleaf, Grzegorz Bulaj, Steven T. Taylor, Georgia Mitsi, Dylan Saliu, Andy Czysz, Greg Silvesti, Manny Garcia, and Rakesh Jain 662

### ORIGINAL RESEARCH

**Cognition in adults with borderline personality disorder**

Ibrahim H. Aslan, Jon E. Grant, and Samuel R. Chamberlain 674

**Lurasidone and risk of metabolic syndrome: results from short and long-term studies in patients with bipolar depression**

Michael Tocco, John W. Newcomer, Yongcai Mao, and Andrei Pikalov 680

**Impaired cognitive flexibility across psychiatric disorders**

Jon E. Grant and Samuel R. Chamberlain 688

**Clinical benefits of vortioxetine 20 mg/day in patients with major depressive disorder**

Michael C. Christensen, Roger S. McIntyre, Michael Adair, Ioana Florea, Henrik Loft, and Andrea Fagiolini 693

**Reduced left hippocampal perfusion is associated with insomnia in patients with cerebral small vessel disease**

Wei Yan, Duanlu Hou, Zhixin Li, Weijun Tang, Xiang Han, and Yuping Tang 702

**Associations between peripheral inflammation and clinical phenotypes of bipolar depression in a lower-middle income country**

Brett D.M. Jones, Urbee Mahmood, John Hodson, Imran B. Chaudhry, Ameer B. Khoso, Mohammed O. Husain, Abigail Ortiz, Nusrat Husain, Benoit H. Mulsant, Allan H. Young, and Muhammad I. Husain 710

**The prevalence of mental disorders among incarcerated adult men convicted of child sexual exploitation material offences**

Alexander Seiser, Reinhard Eher, Daniel Turner, and Martin Rettenberger 719

**Chronotype is differentially associated with lifetime mood and panic-agoraphobic spectrum symptoms in patients with bipolar disorder and healthy controls**

Francy Cruz-Sanabria, Miriam Violi, Andrea Bazzani, Simone Bruno, Leonardo Massoni, Carlo Antonio Bertelloni, Valerio Dell'Oste, Paolo Frumento, Ugo Faraguna, Liliana Dell'Osso, and Claudia Carmassi 726

**Pro-inflammatory markers are associated with response to sequential pharmacotherapy in major depressive disorder: a CAN-BIND-1 report**

M. Ishrat Husain, Jane A. Foster, Brittany L. Mason, Sheng Chen, Haoyu Zhao, Wei Wang, Susan Rotzinger, Sakina Rizvi, Keith Ho, Raymond Lam, Glenda MacQueen, Roumen Milev, Benicio N. Frey, Daniel Müller, Gustavo Turecki, Manish Jha, Madhukar Trivedi, and Sidney H. Kennedy 739

**Neuropsychiatric phenotypes in functional movement disorder**

Gabriela S. Gilmour, Laura K. Langer, Anthony E. Lang, Lindsey MacGillivray, and Sarah C. Lidstone 747

### Managing Editor

Lisa Arrington, Cambridge University Press ([lisa.arrington@cambridge.org](mailto:lisa.arrington@cambridge.org))

Information about editors and editorial board members is correct as of March 23, 2023. For the latest information please see <https://www.cambridge.org/core/journals/cns-spectrums/information/editorial-board>

**Aims & Scope**

*CNS Spectrums* covers all aspects of the clinical neurosciences, neurotherapeutics, and neuropsychopharmacology, particularly those pertinent to the clinician and clinical investigator. The journal features focused, in-depth reviews, perspectives, and original research articles. New therapeutics of all types in psychiatry, mental health, and neurology are emphasized, especially first in man studies, proof of concept studies, and translational basic neuroscience studies. Subject coverage spans the full spectrum of neuropsychiatry, focusing on those crossing traditional boundaries between neurology and psychiatry.
